Our Plat-Dev-301 practice materials keep exam candidates motivated and efficient with useful content based wholly on the real Plat-Dev-301 guide materials. There are totally three versions of Plat-Dev-301 practice materials which are the most suitable versions for you: pdf, software and app versions.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q140-Q145):

NEW QUESTION # 140

A developer is building a Lightning web component that searches for Contacts. The component must communicate the search results to other unrelated Lightning web components, that are in different DOM trees, when the search completes. What should the developer do to implement the communication?

- A. Fire a custom component event.
- **B. Publish a message on a message channel.**
- C. Publish an event on an event channel.
- D. Fire an application event.

Answer: B

Explanation:

For communication between unrelated Lightning web components that are in different DOM trees, the most suitable approach is to use the Lightning Message Service (LMS). This service allows components to communicate with each other using a message channel, which is particularly useful when the components are not in the same containment hierarchy. By publishing and subscribing to messages on a message channel, components can exchange data and notifications, which is ideal for the scenario described. Lightning Web Components Developer Guide - Communicate Across the DOM with Lightning Message Service

NEW QUESTION # 141

A developer is asked to build a solution that will automatically send an email to the customer when an Opportunity stage changes. The solution must scale to allow for 10,000 emails per day. The criteria to send the email should be evaluated after certain conditions are met. What is the optimal way to accomplish this?

- **A. Use an Email Alert with Flow Builder.**
- B. Use a Workflow Email Alert.
- C. Use MassEmailMessage () With an Apex trigger.
- D. Use SingleEmailMessage() with an Apex trigger.

Answer: A

Explanation:

Using an Email Alert with Flow Builder allows for scalable solutions that can handle large volumes of emails, and it offloads the processing from Apex to Salesforce's declarative automation tools. This approach is also bulk-safe, as it does not rely on Apex code that could hit governor limits.

NEW QUESTION # 142

Refer to the component code and requirements below:

- ☐ A)
- ☐ B)
- ☐ C)
- ☐ D)

- **A. Option B**
- B. Option D
- C. Option C
- D. Option A

Answer: A

NEW QUESTION # 143

Consider the following code snippet:

☐ Which two steps should the developer take to add flexibility to change the endpoint and credentials without needing to modify code? Choose 2 answers

- A. Use red. setEndpoint (Label.endPointURL) ;.
- B. Store the URL of the endpoint in a custom Label named endpointURL.
- C. Use req. setEndpoint ('callout:endpoint_NC'); within the callout request.
- D. Create a Named Credential, endpointNC, to store the endpoint and credentials.

Answer: B,C

NEW QUESTION # 144

A developer wrote a trigger on Opportunity that will update a custom Last Sold Date field on the Opportunity's Account whenever an Opportunity is closed. In the test class for the trigger, the assertion to validate the Last Sold Date field fails.

What might be causing the failed assertion?

- A. The test class has not defined an Account owner when inserting the test data.
- B. The test class is not using System.run() to run tests as a Salesforce administrator.
- C. The test class has not implemented seeAllData=true in the test method.
- D. The test class has not re-queried the Account record after updating the Opportunity.

Answer: D

Explanation:

The test class may not be re-querying the Account record after updating the Opportunity, which is necessary to verify the updated field values. If the test does not query the database to get the most recent data after the trigger runs, it will not see the changes made by the trigger.

NEW QUESTION # 145

.....

We provide first-rate service on the Plat-Dev-301 learning prep to the clients and they include the service before and after the sale, 24-hours online customer service and long-distance assistance, the refund service and the update service.
