DOWNLOAD the newest Prep4cram CIPT PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1bjT60PxxHRHC0JWg9zOeek4Stl_seuHL

With regard to the Internet, if you use our CIPT study materials in a network environment, then you can use our products in a non-network environment. CIPT learning guide guarantee that you can make full use of all your free time to learn, if you like. The reason why we emphasize this is that we know you have a lot of other things to do. Many users stated that they can only use fragmented time to learn. Experts at CIPT practice prep also fully considered this point.

Our company is glad to provide customers with authoritative study platform. Our CIPT quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question on our CIPT exam braindump, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our CIPT Quiz prep, you will have the chance to enjoy the authoritative study platform provided by our company. We believe our latest CIPT exam torrent will be the best choice for you. More importantly, you have the opportunity to get the demo of our latest CIPT exam torrent for free.

Exam Dumps CIPT Free - New CIPT Test Blueprint

Three versions of CIPT exam torrent are available. Each version has its own feature, and you can choose the suitable one according your needs. CIPT PDF version is printable, and you can print it into the hard one, and if you prefer the paper one. CIPT Online test I engine is convenient and easy to learn, and it supports all web browsers, and can record the process of your training, you can have a general review of what you have learnt. CIPT Soft test engine can stimulate the real exam environment, and you can know how the real exam look like if you buy this version.

IAPP CIPT or Certified Information Privacy Technologist is a certification offered by the International Association of Privacy Professionals (IAPP) to professionals who are interested in enhancing their knowledge and expertise in privacy technology. Certified Information Privacy Technologist (CIPT) certification focuses on the technical aspects of privacy laws and regulations, including information security, data protection, and privacy-enhancing technologies.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q146-Q151):

NEW QUESTION # 146

SCENARIO - Please use the following to answer the next question:

Carol was a US-based glassmaker who sold her work at art festivals. She kept things simple by only accepting cash and personal checks.

As business grew, Carol couldn't keep up with demand, and traveling to festivals became burdensome. Carol opened a small boutique and hired Sam to run it while she worked in the studio. Sam was a natural salesperson, and business doubled. Carol told Sam, 'I don't know what you are doing, but keep doing it; But months later, the gift shop was in chaos. Carol realized that Sam

needed help so she hired Jane, who had business expertise and could handle the back-office tasks. Sam would continue to focus on sales. Carol gave Jane a few weeks to get acquainted with the artisan craft business, and then scheduled a meeting for the three of them to discuss Jane's first impressions.

At the meeting, Carol could not wait to hear Jane's thoughts, but she was unprepared for what Jane had to say.

"Carol, I know that he doesn't realize it, but some of Sam's efforts to increase sales have put you in a vulnerable position. You are not protecting customers' personal information like you should." Sam said, "I am protecting our information. I keep it in the safe with our bank deposit. It's only a list of customers' names, addresses and phone numbers that I get from their checks before I deposit them. I contact them when you finish a piece that I think they would like. That's the only information I have! The only other thing I do is post photos and information about your work on the photo sharing site that I use with family and friends. I provide my email address and people send me their information if they want to see more of your work. Posting online really helps sales, Carol. In fact, the only complaint I hear is about having to come into the shop to make a purchase." Carol replied, "Jane, that doesn't sound so bad. Could you just fix things and help us to post even more online?"

"I can," said Jane. "But it's not quite that simple. I need to set up a new program to make sure that we follow the best practices in data management. And I am concerned for our customers. They should be able to manage how we use their personal information. We also should develop a social media strategy." Sam and Jane worked hard during the following year. One of the decisions they made was to contract with an outside vendor to manage online sales. At the end of the year Carol shared some exciting news. "Sam and Jane, you have done such a great job that one of the biggest names in the glass business wants to buy us out!

And Jane, they want to talk to you about merging all of our customer and vendor information with theirs beforehand." When initially collecting personal information from customers, what should Jane be guided by?

- A. Digital rights management.
- B. Onward transfer rules.
- C. Digital rights management.
- **D. Data minimization principles.**
- E. Onward transfer rules.
- F. Data minimization principles.
- G. Vendor management principles.

When initially collecting personal information from customers, what should Jane be guided by?

- H. Vendor management principles.

Answer: D

NEW QUESTION # 147

SCENARIO

Looking back at your first two years as the Director of Personal Information Protection and Compliance for the Berry Country Regional Medical Center in Thorn Bay, Ontario, Canada, you see a parade of accomplishments, from developing state-of-the-art simulation based training for employees on privacy protection to establishing an interactive medical records system that is accessible by patients as well as by the medical personnel. Now, however, a question you have put off looms large: how do we manage all the data—not only records produced recently, but those still on hand from years ago? A data flow diagram generated last year shows multiple servers, databases, and work stations, many of which hold files that have not yet been incorporated into the new records system. While most of this data is encrypted, its persistence may pose security and compliance concerns. The situation is further complicated by several long-term studies being conducted by the medical staff using patient information. Having recently reviewed the major Canadian privacy regulations, you want to make certain that the medical center is observing them.

You also recall a recent visit to the Records Storage Section, often termed "The Dungeon" in the basement of the old hospital next to the modern facility, where you noticed a multitude of paper records. Some of these were in crates marked by years, medical condition or alphabetically by patient name, while others were in undifferentiated bundles on shelves and on the floor. The back shelves of the section housed data tapes and old hard drives that were often unlabeled but appeared to be years old. On your way out of the dungeon, you noticed just ahead of you a small man in a lab coat who you did not recognize. He carried a batch of folders under his arm, apparently records he had removed from storage.

Which regulation most likely applies to the data stored by Berry Country Regional Medical Center?

- **A. Personal Information Protection and Electronic Documents Act**
- B. Health Insurance Portability and Accountability Act
- C. The European Union Directive 95/46/EC
- D. The Health Records Act 2001

Answer: A

Explanation:

In this scenario, the Berry Country Regional Medical Center in Ontario, Canada, needs to manage data in compliance with privacy

regulations.

Detailed Explanation:

* Option A (PIPEDA): The Personal Information Protection and Electronic Documents Act (PIPEDA) is the federal privacy law for private-sector organizations in Canada. It applies to personal data collected, used, or disclosed in the course of commercial activities.

* Option B (HIPAA): The Health Insurance Portability and Accountability Act (HIPAA) is a U.S. law and does not apply to Canadian entities.

* Option C (Health Records Act 2001): This act pertains to health records in Victoria, Australia, and is not applicable in Canada.

* Option D (EU Directive 95/46/EC): This directive is applicable to the European Union and not relevant to Canadian entities.

References:

* PIPEDA and its applicability to private sector organizations handling personal data in Canada.

* Requirements under PIPEDA for protecting personal information and ensuring compliance with privacy principles.

* Guidance from the Office of the Privacy Commissioner of Canada on PIPEDA compliance.

Conclusion: The regulation most likely to apply to the data stored by Berry Country Regional Medical Center is the Personal Information Protection and Electronic Documents Act (PIPEDA) (Option A), as it governs the handling of personal information in commercial activities within Canada.

NEW QUESTION # 148

Which is NOT a suitable method for assuring the quality of data collected by a third-party company?

- A. Tracking changes to data through auditing.
- B. Validating the company's data collection procedures.
- C. Introducing erroneous data to see if it is detected.
- D. Verifying the accuracy of the data by contacting users.

Answer: D

NEW QUESTION # 149

SCENARIO

Wesley Energy has finally made its move, acquiring the venerable oil and gas exploration firm Lancelot from its long-time owner David Wilson. As a member of the transition team, you have come to realize that Wilson's quirky nature affected even Lancelot's data practices, which are maddeningly inconsistent. "The old man hired and fired IT people like he was changing his necktie," one of Wilson's seasoned lieutenants tells you, as you identify the traces of initiatives left half complete.

For instance, while some proprietary data and personal information on clients and employees is encrypted, other sensitive information, including health information from surveillance testing of employees for toxic exposures, remains unencrypted, particularly when included within longer records with less-sensitive data.

You also find that data is scattered across applications, servers and facilities in a manner that at first glance seems almost random. Among your preliminary findings of the condition of data at Lancelot are the following:

* Cloud technology is supplied by vendors around the world, including firms that you have not heard of.

You are told by a former Lancelot employee that these vendors operate with divergent security requirements and protocols.

* The company's proprietary recovery process for shale oil is stored on servers among a variety of less-sensitive information that can be accessed not only by scientists, but by personnel of all types at most company locations.

* DES is the strongest encryption algorithm currently used for any file.

* Several company facilities lack physical security controls, beyond visitor check-in, which familiar vendors often bypass.

* Fixing all of this will take work, but first you need to grasp the scope of the mess and formulate a plan of action to address it.

Which is true regarding the type of encryption Lancelot uses?

- A. It is a data masking methodology.
- B. It employs the data scrambling technique known as obfuscation.
- C. Its decryption key is derived from its encryption key.
- D. It uses a single key for encryption and decryption.

Answer: D

Explanation:

Data Encryption Standard (DES) is a symmetric-key algorithm, which means it uses the same key for both encryption and decryption. This is a fundamental characteristic of symmetric encryption, distinguishing it from asymmetric encryption, where a pair of keys (public and private) are used. In the scenario described, DES is noted as the strongest encryption algorithm used, indicating that Lancelot's encryption method involves a single key for both processes.

Reference: IAPP CIPT Certification Textbook, Chapter on Encryption Methods, detailing the differences between symmetric and asymmetric encryption, with specific mention of DES as a symmetric algorithm.

NEW QUESTION # 150

What is true of providers of wireless technology?

- A. They can see all unencrypted data that crosses the system.
- **B. They have the legal right in most countries to control and use any data on their systems.**
- C. They are typically exempt from data security regulations.
- D. They routinely backup data that crosses their system.

Answer: B

NEW QUESTION # 151

.....

We have to admit that the exam of gaining the CIPT certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the CIPT Certification is a good choice for you. Now it is time for you to take an exam for getting the certification.
