With years of experience in compiling top-notch relevant Fortinet FCP_FMGI_AD-7.6 dumps questions, we also offer the Fortinet FCP_FMGI_AD-7.6 practice test (online and offline) to help you get familiar with the actual exam environment. Therefore, if you have struggled for months to pass Fortinet FCP_FMGI_AD-7.6 Exam, be rest assured you will pass this time with the help of our Fortinet FCP_FMGI_AD-7.6 exam dumps. Every FCP_FMGI_AD-7.6 exam candidate who has used our exam preparation material has passed the exam with flying colors.

Fortinet FCP_FMGI_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

Topic 2	<ul style="list-style-type: none"> This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 4	<ul style="list-style-type: none"> Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 5	<ul style="list-style-type: none"> Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

New FCP_FM_G AD-7.6 Test Pdf - Valid FCP_FM_G AD-7.6 Test Objectives

What is more difficult is not only passing the Financials in FCP - FortiManager 7.6 Administrator (FCP_FM_G AD-7.6) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the FCP - FortiManager 7.6 Administrator (FCP_FM_G AD-7.6) certification. If you are going through the same tough challenge, do not worry because Itcertkey is here to assist you.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which is recommended when you are managing a high volume of logs in your network?

- A. Store logs on FortiManager and use FortiView.
- **B. Add and manage FortiAnalyzer from FortiManager.**
- C. Enable advanced ADOM mode on FortiManager.
- D. Forward logs from FortiAnalyzer to FortiManager daily.

Answer: B

Explanation:

When managing a high volume of logs in your network, FortiAnalyzer is specifically designed to handle log storage, analysis, and reporting. It provides centralized log management and can scale more effectively than relying on FortiManager or FortiGate alone for log storage.

NEW QUESTION # 33

Refer to the exhibit. What can you conclude from the failed installation log shown in the exhibit?

FORTINET

Installation log

-----Executing time:-----

Starting log (Run on device)

```

Local-FortiGate $ config user local
Local-FortiGate {local} $ edit student
Local-FortiGate {student} $ set type ldap
Local-FortiGate {student} $ set status enable
Local-FortiGate {student} $ next
Attribute 'ldap-server' MUST be set.
Command fail. Return code 1
Local-FortiGate {local} $ end
Local-FortiGate $ config firewall policy
Local-FortiGate {policy} $ edit 2
Local-FortiGate {2} $ set srcintf port3
Local-FortiGate {2} $ set dstintf port1
Local-FortiGate {2} $ set srcaddr all
Local-FortiGate {2} $ set dstaddr all
Local-FortiGate {2} $ set action accept
Local-FortiGate {2} $ set schedule always
Local-FortiGate {2} $ set service ALL
Local-FortiGate {2} $ set users student
entry not found in datasource

value parse error before 'student'
Command fail. Return code -3
Local-FortiGate {2} $ set nat enable
Local-FortiGate {2} $ next
Local-FortiGate {policy} $ end
Local-FortiGate $
```

-----End of Log-----

- A. Policy ID 2 is installed without a source address.
- **B. Policy ID 2 is installed without the remote user student.**
- C. Policy ID 2 will not be installed.
- D. Policy ID 2 is installed in the disabled state.

Answer: B

Explanation:

Similar to the case presented here, but with different end. In the guide, the policy does not install because the element "dstintf" is not set, and it's mandatory. So, the policy in the end is not installed.

However, the case in the exhibit is different. Since "users" is not mandatory, and all the other elements are set, the policy will be created.

After the command "set users student" fails, we're still into the policy id 2 configuration as shown in the prompt: (2). And, after "next", there is no error message, so the policy id 2 was saved.

NEW QUESTION # 34

An administrator has a FortiGate-HQ device with VDOMs-root, HR and Facilities, currently managed under the FortiManager ADOM-Site1. They try to move VDOM HR to the FortiManager ADOM-Site2, but it does not work.

Why is the administrator not able to move FortiGate-HQ VDOM HR to FortiManager ADOM-Site2?

- A. The administrator must have full access in the device layer of FortiGate-HQ VDOM-root before they can VDOMs to different ADOMs.
- B. FortiManager must be in ADOM normal mode, which does not allow VDOMs to be managed separately.

- C. The administrator must delete the FortiGate-HQ device from FortiManager and add it again using the Add Device wizard before moving the VDOM.
 - D. The FortiGate-HQ must be managed under the FortiManager ADOM-root to allow moving its VDOMs to different ADOMs.

Answer: D

Explanation:

FortiGate devices must be managed under the FortiManager ADOM corresponding to the root VDOM to allow their individual VDOMs to be moved and managed in different ADOMs. Managing the root VDOM in a different ADOM prevents moving subordinate VDOMs across ADOMs.

NEW QUESTION # 35

Refer to the exhibit.

An administrator assigned a new policy package to FortiGate HQ-NGFW-1. In the installation preview, they noticed some settings they did not modify and are unsure about the changes.

Based on the exhibit, which two things will happen if they continue with the installation? (Choose two.)

- A. FortiGate HQ-NGFW-1 will use the root_CA3 certificate in firewall address objects or policies.
 - B. FortiGate HQ-NGFW-1 can use FortiManager firmware templates to upgrade firmware and ratings.
 - C. FortiManager will install the CA certificate named root_CA3 to authenticate FortiGate-to-FortiManager communication protocol (FGFM) tunnel connections with FortiGate HQ- NGFW-1.
 - D. FortiGate HQ-NGFW-1 can contact the FortiManager acting as FortiGuard Distribution Server (FDS) to download FortiGuard updates.

Answer: C,D

Explanation:

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ- NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

The installation includes a root_CA3 certificate, which FortiManager will install on FortiGate HQ-NGFW-1 to authenticate FGFM tunnel connections between the devices.

NEW QUESTION # 36

Refer to the exhibit. Which two statements about the output are true? (Choose two.)

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE          OID      SN          HA      IP          NAME          ADOM      IPS          FIRMWARE      HW_GenX
fmgfaz-managed 188      FGVM02TM24013504 - 100.65.1.111  BR1-FGT-1  My_ADOM  7.0 MR6 (3401)  N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: pending; dm: installed; conn: up; template:[modified]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[ imported]BR1-FGT-1
```

- A. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- B. The system template default will override device-level database configurations.
- C. Configuration changes have been installed on FortiGate, updating policy and device-level database.
- D. The latest revision history for the managed FortiGate does not match the device-level database.

Answer: B,D

Explanation:

The status "pending" indicates the latest revision history does not match the device-level database, meaning there are unapplied changes.

The template is marked as [modified], so the system template default will override device-level database configurations when installed.

NEW QUESTION # 37

.....

We follow the career ethic of providing the first-class FCP_FMGM_AD-7.6 exam materials for you. Because we endorse customers' opinions and drive of passing the FCP_FMGM_AD-7.6 certificate, so we are willing to offer help with full-strength. With years of experience dealing with FCP_FMGM_AD-7.6 Actual Exam, we have thorough grasp of knowledge which appears clearly in our FCP_FMGM_AD-7.6 practice questions. All exam questions you should know are written in them with three versions to choose from
