SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q27-Q32):

NEW QUESTION # 27

You are asking Joule to create a new purchase requisition. Which interaction pattern does your request represent?

- **A. Transactional**
- B. Informational
- C. Financial
- D. Commercial

Answer: A

Explanation:

Creating a new purchase requisition with Joule represents a transactional interaction pattern. As per SAP Business AI documentation, transactional interactions involve executing specific business processes, such as creating, updating, or managing records within SAP systems. Joule's ability to handle such tasks streamlines operations by automating workflows and reducing manual effort. Informational interactions focus on retrieving data, commercial and financial are not defined interaction patterns in SAP's framework, and the act of creating a requisition is distinctly transactional. This capability enhances efficiency in procurement processes, allowing users to focus on strategic tasks while Joule manages operational activities seamlessly.

NEW QUESTION # 28

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- **A. AI System engineering**
- **B. AI Ethics Steering Committee**
- C. Executive Sponsorship
- **D. Organizational practice**

Answer: A,B,D

Explanation:

SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.

AI-generated context	<input type="text"/>	Enhanced decision making based on more complete data Improved application owner productivity Increased to-do assignee productivity Expanded product accessibility
AI-assisted text	<input type="text"/>	Enhanced decision making based on more complete data Improved application owner productivity Increased to-do assignee productivity Expanded product accessibility

NEW QUESTION # 30

Which of the following are included in SAP's Responsible AI framework? Note: There are 3 correct answers to this question.

- A. Ethical governance
- B. Transparency and accountability
- C. ESG reporting
- D. SAP Global Human Rights commitment

Answer: A,B,D

Explanation:

SAP's Responsible AI framework includes the SAP Global Human Rights commitment, transparency and accountability, and ethical governance, as detailed in SAP documentation. The SAP Global Human Rights commitment ensures AI respects human rights, aligning with global standards. Transparency and accountability mandate clear documentation of AI processes and decision-making, fostering trust. Ethical governance establishes policies and oversight to ensure fairness, mitigate bias, and comply with regulations. ESG reporting, while part of SAP's sustainability efforts, is not a core component of the Responsible AI framework, and human-centered design is a principle but not explicitly listed. These elements ensure SAP's AI solutions are trustworthy and ethical.

NEW QUESTION # 31

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Tenant isolation
- B. SAP-hosted AI infrastructure
- C. Consent-based model training
- D. Clean core maintenance

Answer: A,B,C

Explanation:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data. Reference:

NEW QUESTION # 32

.....
