Nonprofit-Cloud-Consultant Exam Vce Format & Nonprofit-Cloud-Consultant Valid Test Notes

If you have purchased our Nonprofit-Cloud-Consultant exam braindumps, you are advised to pay attention to your emails. Our system will automatically send you the updated version of the Nonprofit-Cloud-Consultant preparation quiz via email. If you do not receive our email, you can directly send an email to ask us for the new version of the Nonprofit-Cloud-Consultant Study Materials. We will soon solve your problems at the first time. And according to our service, you can enjoy free updates for one year.

Salesforce Nonprofit-Cloud-Consultant Exam is regularly updated to reflect changes in the Salesforce platform and the evolving needs of nonprofit organizations. The most recent version of the exam, SP20, reflects the latest features and capabilities of the Salesforce Nonprofit Cloud. Candidates who pass the exam demonstrate that they have the latest knowledge and skills needed to help nonprofit organizations succeed in a rapidly changing digital landscape.

Salesforce Nonprofit-Cloud-Consultant certification exam is a valuable credential for professionals who want to advance their careers in the nonprofit sector. It validates one's skills and expertise in designing and implementing Salesforce solutions for nonprofits, and it is a great way to demonstrate to employers and clients that one has the knowledge and experience to help nonprofits achieve their goals using the Salesforce platform. With the right preparation and experience, one can successfully pass the exam and become a Salesforce Certified Nonprofit Cloud Consultant.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q55-Q60):

NEW QUESTION # 55

A Household Account has Contacts with Affiliations, Relationships, and Closed/Won donations associated with it. What is the outcome when a system admin attempts to delete this Household Account record?

- A. Since Affiliations and Relationships are associated with the Contacts in this Account, an error message displays.
- **B. Since Closed/Won donations are associated with the Account record, an error message displays.**
- C. The Household Account record and its standard related records remain.
- D. The Household Account record and its standard related records are deleted.

Answer: B

Explanation:

When a system admin attempts to delete a Household Account record that has Contacts with Affiliations, Relationships, and Closed/Won donations associated with it, Salesforce will prevent the deletion and display an error message. Here's why:

Closed/Won Donations:

Salesforce prevents the deletion of records that have important related records, such as Closed/Won donations, to maintain data integrity.

Closed/Won Opportunities represent actual donations that are crucial for reporting and financial tracking. Deleting the associated Household Account would disrupt this data integrity.

Error Message:

Salesforce will display an error message indicating that the record cannot be deleted because of its associated Closed/Won donations. This safeguard ensures that critical financial data is preserved.

NEW QUESTION # 56

A nonprofit organization has engaged a consultant to implement NPSP and has a large membership program it wants to manage in Salesforce. Which two things does the consultant need to set up to ensure that the membership rollups in NPSP will work properly?

- A. Check that the grace period is set up for memberships.
- B. Ensure there is a custom field created for Membership Amount and selected for membership rollups
- **C. Ensure there is an Opportunity record type set up for memberships**
- **D. Check that the membership record type is selected for membership rollups.**

Answer: C,D

NEW QUESTION # 57

What is a common cause of the NPSP upgrade failing when run in Production and there were no issues running it in the sandbox?

- **A. Not having adequate test code coverage**
- B. Not having one or more of the packages in NPSP installed
- C. Not running the NPSP Health Check before trying to upgrade in production
- D. Not changing the account model to the Household Account Model before trying to upgrade

Answer: A

Explanation:

A common cause of the NPSP (Nonprofit Success Pack) upgrade failing when run in Production, despite no issues in the sandbox, is not having adequate test code coverage. This is essential for successful deployments in Salesforce environments.

Test Code Coverage:

Salesforce requires a minimum of 75% test code coverage for deploying Apex code to a production environment.

This means that automated tests must cover at least 75% of the codebase, ensuring that most functionalities are validated and reducing the risk of errors during deployment.

Sandbox vs. Production Differences:

Sandbox environments often have less data and different configurations compared to production, which might not fully mimic real-world scenarios.

In production, there could be additional triggers, validation rules, or workflows that are not present or not active in the sandbox.

Mitigating Upgrade Failures:

Ensure that all custom code, including Apex triggers, classes, and batch processes, has adequate test coverage.
Review and test all dependent packages and configurations in a full sandbox environment that closely replicates the production setup.
Additional Considerations:
Conduct a comprehensive review of all customizations and integrations.
Run the NPSP Health Check Tool and Salesforce Optimizer in sandbox before the actual upgrade to identify potential issues.

NEW QUESTION # 58

A nonprofit wants to record which services are provided to families. The nonprofit just installed the Program Management Module. How should the consultant configure the Program Management Module?

- A. Create a Program Cohort record for each family and select the cohort on the Program Engagement record.
- B. Create a Program Cohort record for each family and select the Program on the record.
- C. Create a Program Engagement record and select each family's Household Account.
- **D. Create a Program Engagement record and select the head of each family's household for the Contact.**

Answer: D

Explanation:

To configure the Program Management Module (PMM) to record services provided to families, follow these steps:

Create Program Engagement Records:

Navigate to the "Program Engagements" tab.

Click "New" to create a new Program Engagement record.

Fill in the necessary details, ensuring to select the head of the household for the "Contact" field. This links the engagement to the primary contact within the family.

Select the Program:

In the Program Engagement record, select the relevant program that the family is engaged in. This helps in categorizing the services under specific programs.

Specify the Services:

Use the "Service Deliveries" related list to add services provided to the family. Click "New Service Delivery" and select the appropriate service. This ensures each service provided is tracked and recorded against the Program Engagement.
