

NetSec-Analyst Valid Exam Tips | NetSec-Analyst Certification Test Answers

BONUS!!! Download part of PrepPDF NetSec-Analyst dumps for free: <https://drive.google.com/open?id=1WnjaEflzFNCAUvy4DrdHXQaS3mFkf0>

PrepPDF is the leading position in this field and famous for high pass rate of the NetSec-Analyst learning guide. If you are headache about your qualification exams, our NetSec-Analyst learning guide materials will be a great savior for you. Now it is your opportunity that we provide the best valid and professional NetSec-Analyst Study Guide materials which have 100% pass rate. If you really want to clear exam and gain success one time, choosing us will be the wise thing for you. If you hesitate about us please pay attention on below about our satisfying service and high-quality NetSec-Analyst guide torrent.

Our NetSec-Analyst exam dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the Palo Alto Networks certification. To deliver on the commitments of our NetSec-Analyst Test Prep that we have made for the majority of candidates, we prioritize the research and development of our NetSec-Analyst test braindumps, establishing action plans with clear goals of helping them get the Palo Alto Networks certification. You can totally rely on our products for your future learning path.

Ultimate NetSec-Analyst Prep Guide & NetSec-Analyst Valid Exam Tips

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for infrequently examined contents. NetSec-Analyst test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With NetSec-Analyst Exam Torrent, you will no longer learn blindly but in a targeted way. With NetSec-Analyst exam guide, you only need to spend 20-30 hours to study and you can successfully pass the exam. You will no longer worry about your exam because of bad study materials. If you decide to choose and practice our NetSec-Analyst test questions, our life will be even more exciting.

Palo Alto Networks Network Security Analyst Sample Questions (Q87-Q92):

NEW QUESTION # 87

A Security Administrator is tasked with preventing the exfiltration of sensitive HR data (e.g., employee salaries, national ID numbers) from the internal network through unencrypted channels. They have identified that this data often appears within PDF and Microsoft Office documents. Which combination of Palo Alto Networks security profiles and policy configurations would be most effective in addressing this specific data exfiltration risk, while minimizing false positives?

- A. Enable 'WildFire Analysis' on the outbound security policy for unknown file types and configure a custom URL Filtering profile to block access to cloud storage sites.
- B. Implement an 'Antivirus' profile with strict heuristics and an 'Anti-Spyware' profile on all outbound security policies, and enable 'SSL Decryption' for all outbound traffic.
- C. Utilize a 'Vulnerability Protection' profile with a 'Strict' setting and an 'Anti-Spyware' profile for outbound traffic, focusing on signature-based detection.
- D. Create a 'Data Filtering' profile with a 'File Blocking' rule for PDF and Office documents, and apply it to a 'Security Policy' rule allowing outbound traffic.
- E. **Configure a 'Data Filtering' profile utilizing 'Predefined Data Patterns' for PII and 'Custom Data Patterns' for specific HR document keywords, then apply this profile to a 'Security Policy' rule with 'Action: Block' and 'Log at Session End'.**

Answer: E

Explanation:

Option C is the most effective. 'Data Filtering' is specifically designed for preventing sensitive data exfiltration. Using 'Predefined Data Patterns' covers common PII, and 'Custom Data Patterns' allows for highly specific detection of HR-related keywords within documents. Applying this profile with a 'Block' action on outbound security policies directly addresses the exfiltration risk. Logging helps with auditing. Other options are less targeted: WildFire is for malware, File Blocking might be too broad, Antivirus/Anti-Spyware/Vulnerability Protection are for threats, not data content.

NEW QUESTION # 88

Which two matching criteria are used when creating a Security policy involving NAT? (Choose two.)

- A. Post-NAT address
- B. **Pre-NAT address**
- C. Pre-NAT zone
- D. **Post-NAT zone**

Answer: B,D

NEW QUESTION # 89

Access to which feature requires PAN-OS Filtering licens?

- A. URL external dynamic lists
- B. Custom URL categories
- C. **PAN-DB database**
- D. DNS Security

Answer: C

Explanation:

Reference: <https://docs.paloaltonetworks.com/pan-os/8-1/pan-os-admin/getting-started/activate-licenses-and-subscriptions.html>

NEW QUESTION # 90

What two authentication methods on the Palo Alto Networks firewalls support authentication and authorization for role-based access control? (Choose two.)

- A. Kerberos
- B. TACACS+
- C. SAML
- D. LDAP

Answer: B,C

Explanation:

Reference: <https://docs.paloaltonetworks.com/pan-os/9-1/pan-os-admin/firewall-administration/manage-firewall-administrators/administrative-authentication.html> The administrative accounts are defined on an external SAML, TACACS+, or RADIUS server. The server performs both authentication and authorization. For authorization, you define Vendor-Specific Attributes (VSAs) on the TACACS+ or RADIUS server, or SAML attributes on the SAML server. PAN-OS maps the attributes to administrator roles, access domains, user groups, and virtual systems that you define on the firewall.

NEW QUESTION # 91

A Palo Alto Networks firewall is configured with an External Dynamic List of type 'URL' for blocking known malicious URLs. The list is extensive, containing millions of entries. The security team notices a significant increase in firewall management plane CPU utilization and occasional delays in policy commit operations after implementing this large EDL. Which two adjustments or considerations are most critical to mitigate these performance impacts without compromising security efficacy?

- A. Reduce the EDL's 'Repeat' refresh interval to a longer duration (e.g., from hourly to daily).
- B. Utilize a dedicated log collector or Panorama appliance to offload EDL processing.
- C. Ensure the EDL source server is highly available and responsive to minimize timeout errors.
- D. Split the single large EDL into multiple smaller EDLs based on threat categories or geography.
- E. Consider upgrading the firewall model to one with higher management plane resources and more memory.

Answer: A,E

Explanation:

Handling extremely large EDLs can significantly impact firewall performance, especially the management plane. Option A (Correct): Reducing the refresh frequency is a primary mitigation. Each refresh involves downloading, parsing, and committing the EDL entries, which are CPU-intensive operations on the management plane. Fewer refreshes mean less overhead. Option E (Correct): For 'millions of entries,' the current firewall model might simply be undersized. Larger EDLs consume more memory and require more CPU cycles for processing and lookup, directly impacting management plane performance. Upgrading to a model with more resources is a direct solution. Option B is important for successful updates, but it doesn't directly address the firewall's internal processing burden once the file is downloaded. Option C might help organize but doesn't fundamentally reduce the total number of entries the firewall has to process or store. The aggregate impact remains. Option D (log collector/Panorama) is for log processing and centralized management; it does not offload the firewall's internal EDL processing.

NEW QUESTION # 92

.....

We are so proud that we own the high pass rate of our NetSec-Analyst exam braindumps to 99%. This data depend on the real number of our worthy customers who bought our NetSec-Analyst exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding NetSec-Analyst Exam Materials. We have the definite superiority over the other NetSec-Analyst exam dumps in the market. If you choose to study with our NetSec-Analyst exam guide, your success is 100 guaranteed.
