Braindumps ISO-IEC-27001-Foundation Downloads - ISO-IEC-27001-Foundation Latest Learning Material

To increase your chances of passing APMG-International's certification, we offer multiple formats for braindumps for all ISO-IEC-27001-Foundation exam at Dumpleader. However, since not all takers have the same learning styles, we devise a customizable module to suite your needs. More importantly, our commitment to help you become ISO-IEC-27001-Foundation Certified does not stop in buying our products. We offer customer support services that offer help whenever you'll be need one.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample

Questions (Q21-Q26):

NEW QUESTION # 21

What is the definition of a threat according to ISO/IEC 27000?

- A. A potential cause of an unwanted incident which can result in harm to a system or organization
- B. A weakness of an asset or a control that can be exploited
- C. The risk remaining after risk treatment
- D. A single or a series of unwanted or unexpected information security events

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

NEW QUESTION # 22

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Competence
- B. Communication
- C. Awareness
- D. Nonconformity and corrective action

Answer: C

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

NEW QUESTION # 23

Which statement describes Annex A of ISO/IEC 27001?

- A. Provides a reference list of information security controls and their requirements
- B. Defines a mandatory list of controls that shall be implemented
- C. Provides measures to determine risk treatment effectiveness
- D. Defines the criteria for accepting risks

Answer: A

Explanation:

Annex A of ISO/IEC 27001:2022 is titled:

"Reference control objectives and controls." It provides a reference list of information security controls, structured into 4 themes: organizational, people, physical, and technological.

The standard explicitly states in Clause 6.1.3: "Organizations can design controls as required or identify them from any source. Annex A contains a list of possible information security controls." This means controls in Annex A are not mandatory (eliminating option C). Risk acceptance criteria (A) are defined in Clause 6.1.2, not Annex A. Annex A also does not provide measures for treatment effectiveness (D).

Thus, Annex A is best described as a reference list of information security controls. Correct answer: B.

NEW QUESTION # 24

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Maintain contact with legal authorities
- B. Regular review of contractual compliance
- C. Regular review of compliance
- D. Return assets to their legal owners

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

NEW QUESTION # 25

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security risks are assessed and the probability and/or impact reduced
- B. Information security compliance will increase stakeholder trust in the organization
- C. Information security controls are tailored to suit the organization's specific circumstances
- D. Information security staff will be qualified to ISO/IEC 27001 Foundation level

Answer: D

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed." Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

NEW QUESTION # 26
