## Reliable 156-836 Mock Test, 156-836 Latest Practice Questions

In a field, you can try to get the 156-836 certification to improve yourself, for better you and the better future. With it, you are acknowledged in your profession. The 156-836 exam braindumps can prove your ability to let more big company to attention you. Then you have more choice to get a better job and going to suitable workplace. You may have been learning and trying to get the 156-836 Certification hard, and good result is naturally become our evaluation to one of the important indices for one level.

## CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q29-Q34):

### NEW QUESTION # 29

What will happen in case of NAT of the traffic passing through Management network?

- A. Orchestrator will disable NAT and traffic will pass with no issue
- B. This traffic will pass with no inspection
- C. Since Management traffic is always going to SMO, it will take a care for Correction Layer and will re- distribute traffic to other Appliances
- D. This traffic will not pass correction, since it will be dropped

**Answer: A**

Explanation:

According to the Check Point MAESTRO R80.20SP Administration Manual, NAT is not supported on the management network. If you configure NAT on the management network, the Orchestrator will disable NAT and allow the traffic to pass without translation. This is to ensure that the management traffic can reach the Security Group members and the SmartConsole without any

issues.

### NEW QUESTION # 30

What Maestro component is automatically designated the SMO Master?

- A. The MDS that pushes policy to the SMO is considered the SMO Master.
- B. The SGM with the highest member ID (the last one added to the security group.)
- **C. The SGM with the lowest member ID (the first one added to the security group.)**
- D. The first MHO configured is considered the SMO Master.

**Answer: C**

Explanation:

The SMO Master is the SGM that is responsible for synchronizing the configuration and policy with the other SGMs in the security group. The SMO Master is automatically designated as the SGM with the lowest member ID, which is usually the first one added to the security group. The SMO Master can be changed manually if needed.

### NEW QUESTION # 31

What is the default Distribution mode?

- A. Manual-General
- **B. Auto-topology**
- C. Network
- D. User

**Answer: B**

Explanation:

Auto-topology is the default distribution mode for Maestro Security Groups. In this mode, the Orchestrator assigns packets to a Security Group Member based on the topology of the port defined in the gateway object.

Each port is either in user mode or network mode depending on the topology. User mode means that the port is connected to the internal network and network mode means that the port is connected to the external network. The Orchestrator uses a hash function to map each source IP or destination IP to a specific SGM, depending on the mode of the port. This mode ensures that all packets with the same source IP or destination IP are processed by the same SGM, regardless of the port or protocol.

### NEW QUESTION # 32

Splitter cannot be used \_\_\_\_\_

- A. To connect single port on Appliance to multiple ports on the orchestrator
- **B. To connect single port on orchestrator to the same Appliance**
- C. To connect single port on orchestrator to multiple port on external switch
- D. To connect single port on orchestrator to multiple Appliances

**Answer: B**

### NEW QUESTION # 33

Which feature is used to force trusted non-F2F traffic into the fully accelerated path for handling by SecureXL.

- A. SecureXL
- B. hypersync
- C. rate limiting
- D. Fast Accelerator

**Answer: A**

Explanation:

SecureXL is typically used to accelerate trusted traffic, including non-F2F (face-to-face) traffic, through a secure, fast path.
