Instant Web-Development-Applications Access, Reliable Web-Development-

Applications Learning Materials

Web-Development-Applications study engine is very attentive to provide a demo for all customers who concerned about our products, whose purpose is to allow customers to understand our product content before purchase. Many students suspect that if Web-Development-Applications learning material is really so magical? Does it really take only 20-30 hours to pass such a difficult certification exam successfully? It is no exaggeration to say that you will be able to successfully pass the exam with our Web-Development-Applications Exam Questions.

WGU Web Development Applications Sample Questions (Q109-Q114):

NEW QUESTION # 109
A web developer need to ensure that a message appears if the user's browser does not support the audio files on a web page. How should this designer code the audio element?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: B

Explanation:
To ensure that a message appears if the user's browser does not support the audio files on a web page, the developer should use the <audio> element correctly. The <audio> element supports fallback content, which is displayed if the browser does not support the specified audio formats.
* Correct Usage:
* Fallback Content: Place the message as fallback content inside the <audio> element. Browsers that do not support the audio format will display this message.
* Example:
<audio>
<source src="audio/song.mp3" type="audio/mpeg" />
No mpeg support.
</audio>
* Explanation of Options:
* Option A: Incorrect. The alt attribute is not valid for the <source> element.
* Option B: Incorrect. The alt attribute is not valid for the <audio> element.
* Option C: Incorrect. The alt attribute is used incorrectly in the <audio> element.
* Option D: Correct. The message "No mpeg support." is placed correctly as fallback content inside the <audio> element.
* References:
* W3C HTML5 Specification - The audio element
* MDN Web Docs - <audio>
Using the fallback content inside the <audio> element ensures that users with unsupported browsers receive a meaningful message, improving the overall user experience.

NEW QUESTION # 110
A web page has the following CSS code:
☐
Which selector should a developer use to invoke the CSS?

- A. class
- B. Style
- C. Attribute
- D. id

Answer: D

Explanation:
To invoke the CSS provided, an ID selector is used. In CSS, the ID selector is used to style the element with the specific id attribute.
* CSS ID Selector: The syntax for the ID selector is #id, where id is the id attribute value of the HTML element.
* Usage Example:

```
#black {
color: black;
}
```
This CSS rule will apply the color: black; style to the element with id="black".
* Example in HTML:
<div id="black">This text will be black.</div>
References:
* MDN Web Docs on ID Selectors
* W3C CSS Specification on Selectors

NEW QUESTION # 111
What is the default behavior of overlay elements?

- A. First element listed is transparent
- B. First element listed is invisible
- C. Last element listed appears on top
- D. Last element listed appears on bottom

Answer: C

Explanation:
In CSS, when elements overlap, the default behavior is that the last element listed in the HTML document appears on top.
* Stacking Context:
* Default Behavior: Elements are stacked in the order they appear in the HTML. The last element in the document tree is rendered on top.
* z-index: You can control stacking order using thez-indexproperty, but without it, the default order applies.
* Example:
* Given HTML:
<div style="position: absolute; width: 100px; height: 100px; background-color: red;"></div>
<div style="position: absolute; width: 100px; height: 100px; background-color: blue;"></div>
* The bluedivwill be on top of the reddivbecause it appears later in the HTML document.
:
MDN Web Docs - Stacking context
W3C CSS Positioned Layout Module Level 3
By understanding these fundamental CSS concepts, developers can create more effective and visually appealing web layouts.

NEW QUESTION # 112
Given the following code:
What is occurring?

- A. An event handler is tracking keyboard strokes.
- B. JavaScript is using the DOM to make a style change.
- C. In-line CSS is styling the <h1> tag.

Answer: B

Explanation:
The given code snippet demonstrates how JavaScript can manipulate the DOM to change the style of an element.
* Code Analysis:
* Given the HTML:
<h1 id="id1">Blog Title</h1>
<button type="button" onclick="document.getElementById('id1').style.color = 'red'">Click Here</button>
* When the button is clicked, the JavaScript code within the onclick attribute changes the color of the h1 element to red.
* Explanation:
* Option A: An event handler tracking keyboard strokes is incorrect because the event handler is tracking a mouse click, not keyboard strokes.
* Option B: JavaScript is using the DOM to make a style change is correct because the onclick attribute contains JavaScript code that modifies the style of the h1 element.
* Option C: In-line CSS is styling the <h1> tag is incorrect because the style change is done via JavaScript, not inline CSS.

* References:
* MDN Web Docs - Document.getElementById()
* W3Schools - JavaScript HTML DOM

NEW QUESTION # 113
Which attribute should a developer add to an HTML element to enable the HTML5 drag-and-drop application programming interface (API)?

* A. ondragstart
* B. ondragover
* C. draggable
* D. dragstart

Answer: C

Explanation:
> "The `draggable` attribute is a global attribute in HTML5 that indicates whether an element is draggable.
When set to `true`, the element becomes draggable using the drag-and-drop API." Example:
```html
<div draggable="true">Drag me</div>
```
* `ondragover` and `ondragstart` are event handlers, not attributes enabling drag.
* `dragstart` is an event, not an attribute.
References:
* MDN Web Docs: draggable attribute
* HTML Drag and Drop API Specification

NEW QUESTION # 114
......

Our product backend port system is powerful, so it can be implemented even when a lot of people browse our website can still let users quickly choose the most suitable for his Web-Development-Applications qualification question, and quickly completed payment. Once the user finds the Web-Development-Applications learning material that best suits them, only one click to add the Web-Development-Applications Study Tool to their shopping cart, and then go to the payment page to complete the payment, our staff will quickly process user orders online. In general, users can only wait about 5-10 minutes to receive our Web-Development-Applications learning material,

Instant Web-Development-Applications Access: https://www.braindumpquiz.com/Web-Development-Applications-exam-material.html

I believe that you will be more inclined to choose a good service product, such as Web-Development-Applications learning question, Our company have the higher class operation system than other companies, so we can assure you that you can start to prepare for the Web-Development-Applications exam with our study materials in the shortest time, We arrange the experts to check the update every day, if there is any update about the Web-Development-Applications pdf vce, the latest information will be added into the Web-Development-Applications exam dumps, and the useless questions will be remove of it to relief the stress for preparation.

Such visualization is explored in this lesson, Beware defining what you do by a job description, I believe that you will be more inclined to choose a good service product, such as Web-Development-Applications learning question.

2026 Web-Development-Applications Exam Practice | Efficient Instant Web-Development-Applications Access: WGU Web Development Applications 100% Pass
