

Actual Microsoft DP-420 Exam Dumps - Pass Exam With Good Scores

2026 Latest PrepAwayExam DP-420 PDF Dumps and DP-420 Exam Engine Free Share: <https://drive.google.com/open?id=1NRewH2-5zqfoWFiaBeleVadNspAVxnTC>

As we all know, time and tide waits for no man. If you really want to pass the DP-420 exam, you should choose our first-class DP-420 study materials. And you cannot miss the opportunities this time for as the most important and indispensable practice materials in this line, we have confidence in the quality of our DP-420 practice materials, and offer all after-sales services for your consideration and acceptance.

As is known to us, there are best sale and after-sale service of the DP-420 certification training dumps all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the best and most suitable DP-420 latest questions for all customers. More importantly, it is evident to all that the DP-420 Training Materials from our company have a high quality, and we can make sure that the quality of our products will be higher than other study materials in the market. If you want to pass the DP-420 exam and get the related certification in the shortest time, choosing the DP-420 training materials from our company will be in the best interests of all people.

>>> Simulation DP-420 Questions <<<

DP-420 Latest Exam Online | DP-420 Latest Study Materials

Our DP-420 exam torrent is highly regarded in the market of this field and come with high recommendation. Choosing our DP-420 exam guide will be a very promising start for you to begin your exam preparation because our DP-420 practice materials with high reputation. We remunerate exam candidates who fail the DP-420 Exam Torrent after choosing our DP-420 study tools, which kind of situation is rare but we still support your dream and help you avoid any kind of loss. Just try it do it, and we will be your strong backup.

Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which of the following is the most optimal method of managing referential integrity between different containers in Azure Cosmos DB?

- A. Using an Azure Function trigger for Azure Cosmos DB to leverage on the change feed processor to update the referenced containers
- B. Creating an Azure Cosmos DB Function that will periodically search for changes done to your containers and replicate those changes to the referenced containers
- C. All are equally efficient

- D. When any changes are created by your app to one container, also ensure it duplicates the changes on the referenced container

Answer: A

Explanation:

The change feed APIs help in keeping the track of all the Insert and Updates on a container, creating a trigger depending upon the change feed, will allow the users to send those changes to other containers that also require those changes.

Option A is incorrect. Azure Cosmos DB functions don't modify data and their scope is limited only within the container they are defined in.

Option B is correct. Using an Azure Function trigger for Azure Cosmos DB to leverage the change feed processor to update the referenced containers is the most optimal way to manage referential integrity between different containers in Azure Cosmos DB.

Option C is incorrect. While it can be possible to add this logic to your app, adding the code to the application won't add complexity to your environment, but also it won't guarantee that any changes carried out outside of the app would be replicated to the other containers.

Option D is incorrect. Using an Azure Function trigger for Azure Cosmos DB to leverage the change feed processor to update the referenced containers is the most optimal method.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/advanced-modeling-patterns-azure-cosmos-db/4-manage-referential-integrity-with-change-feed>

NEW QUESTION # 30

You have a database named db1 in an Azure Cosmos DB for NoSQL account named account1. The db1 database has a manual throughput of 4,000 request units per second (RU/s).

You need to move db1 from manual throughput to autoscale throughput by using the Azure CLI. The solution must provide a minimum of 4,000 RU/s and a maximum of 40,000 RU/s.

How should you complete the CLI statements? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
az cosmosdb sql database throughput
  -a "account1" \
  -g "cosmosdbrg" \
  -n "db1" \
  --throughput
```

Options:

- migrate
- show
- update

Throughput values:

- 400
- 4000
- 40000

Microsoft

Answer:

Explanation:

Answer Area

```
az cosmosdb sql database throughput
  -a "account1" \
  -g "cosmosdbrg" \
  -n "db1" \
  --throughput
```

Options:

- migrate
- show
- update

Throughput values:

- 400
- 4000
- 40000

Microsoft

Explanation

Migrate

40000

According to the Azure CLI reference¹, you need to use the `az cosmosdb sql database throughput migrate` command to migrate the throughput of the SQL database between autoscale and manually provisioned. You also need to use the `--throughput-type` parameter to specify the type of throughput to migrate to, and the `--max-throughput` parameter to specify the maximum throughput resource can scale to (RU/s).

To complete the CLI statements, you should replace the missing values with:

`--throughput-type autoscale`

`--max-throughput 40000`

The final command should look like this:

`az cosmosdb sql database throughput migrate \`

`--account-name account1 \`

`--name db1 \`

`--resource-group rg1 \`

`--throughput-type autoscale \`

`--max-throughput 40000`

NEW QUESTION # 31

You have a database in an Azure Cosmos DB for NoSQL account that is configured for multi-region writes.

You need to use the Azure Cosmos DB SDK to implement the conflict resolution policy for a container. The solution must ensure that any conflict sent to the conflict feed.

Solution: You set `ConflictResolutionMode` to Custom. You Set `ResolutionProcedures` to a custom stored procedure. You configure the custom stored procedure to use the `isTomstone` parameter to resolve conflict.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

The solution is incorrect because there is no "isTom" parameter in the Azure Cosmos DB SDK. The correct parameter is "isTombstone".

NEW QUESTION # 32

You have a database named db1 in an Azure Cosmos DB. You have a third-party application that is exposed through an OData endpoint. You need to migrate data from the application to a container in Azure Cosmos DB. What should you use?

- A. Database Migration Assistant
- B. Azure Migrate
- C. Azure Data Factory

Answer: C

Explanation:

Explanation

You can migrate data from various data sources to Azure Cosmos DB using different tools and methods. The choice of the migration tool depends on factors such as the data source, the Azure Cosmos DB API, the size of data, and the expected migration duration¹. Some of the common migration tools are:

Azure Cosmos DB Data Migration tool: This is an open source tool that can import data to Azure Cosmos DB from sources such as JSON files, MongoDB, SQL Server, CSV files, and Azure Cosmos DB collections. This tool supports the SQL API and the Table API of Azure Cosmos DB.

Azure Data Factory: This is a cloud-based data integration service that can copy data from various sources to Azure Cosmos DB using connectors. This tool supports the SQL API, MongoDB API, Cassandra API, Gremlin API, and Table API of Azure Cosmos DB.

Azure Cosmos DB live data migrator: This is a command-line tool that can migrate data from one Azure Cosmos DB container to another container within the same or different account. This tool supports live migration with minimal downtime and works with any Azure Cosmos DB API.

For your scenario, if you want to migrate data from a third-party application that is exposed through an OData endpoint to a container in Azure Cosmos DB for NoSQL, you should use Azure Data Factory. Azure Data Factory has an OData connector that

can read data from an OData source and write it to an Azure Cosmos DB sink using the SQL API5. You can create a copy activity in Azure Data Factory that specifies the OData source and the Azure Cosmos DB sink, and run it on demand or on a schedule.

NEW QUESTION # 33

You have an Azure Cosmos DB for NoSQL account named account1 that supports an application named App1. App1 uses the consistent prefix consistency level.

You configure account1 to use a dedicated gateway and integrated cache.

You need to ensure that App1 can use the integrated cache.

Which two actions should you perform for APP1? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Change the account endpoint to <https://account1.documents.azure.com>
- **B. Change the consistency level of requests to session.**
- C. Change the connection mode to direct
- **D. Change the account endpoint to <https://account1.sqlx.cosmos.azure.com>**
- E. Change the consistency level of requests to strong.

Answer: B,D

Explanation:

Explanation

the Azure Cosmos DB integrated cache is an in-memory cache that is built-in to the Azure Cosmos DB dedicated gateway. The dedicated gateway is a front-end compute that stores cached data and routes requests to the backend database. You can choose from a variety of dedicated gateway sizes based on the number of cores and memory needed for your workload1. The integrated cache can reduce the RU consumption and latency of read operations by serving them from the cache instead of the backend containers2.

For your scenario, to ensure that App1 can use the integrated cache, you should perform these two actions:

* Change the account endpoint to <https://account1.sqlx.cosmos.azure.com>. This is the dedicated gateway endpoint that you need to use to connect to your Azure Cosmos DB account and leverage the integrated cache. The standard gateway endpoint (<https://account1.documents.azure.com>) will not use the integrated cache2.

* Change the consistency level of requests to session. This is the highest consistency level that is supported by the integrated cache.

If you use a higher consistency level (such as strong or bounded staleness), your requests will bypass the integrated cache and go directly to the backend containers

NEW QUESTION # 34

.....

Our company PrepAwayExam abides by the industry norm all the time. By virtue of the help from professional experts, who are conversant with the regular exam questions of our latest DP-420 real dumps. They can satisfy your knowledge-thirsty minds. And our DP-420 Exam Quiz is quality guaranteed. By devoting ourselves to providing high-quality DP-420 practice materials to our customers all these years we can guarantee all content is of the essential part to practice and remember.

DP-420 Latest Exam Online: <https://www.prepawayexam.com/Microsoft/braindumps.DP-420.etc.file.html>

Buy Microsoft DP-420 latest questions of PrepAwayExam now and get ready to crack the DP-420 certification exam in a single attempt, DP-420 exam cram PDF will be the right shortcut for your exam, We strongly recommend that you should prepare your Microsoft DP-420 Azure Cosmos DB Developer Specialty Exam exam with Our Testing Engine, Microsoft Simulation DP-420 Questions Simulation for the APP version.

He described an environment where hard work DP-420 and skill were appreciated, Cancellations could not be confirmed, Buy Microsoft DP-420 Latest Questions of PrepAwayExam now and get ready to crack the DP-420 certification exam in a single attempt.

Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Updated Torrent - DP-420 exam pdf & Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Practice questions

DP-420 exam cram PDF will be the right shortcut for your exam, We strongly recommend that you should prepare your Microsoft DP-420 Azure Cosmos DB Developer Specialty Exam exam with Our Testing Engine.

Simulation for the APP version, DP-420 Reliable Test Practice So it makes it easy for you to judge your own self.
