

IAPP AIGP Exam Materials | Passing AIGP Score

BONUS!!! Download part of Exam4Tests AIGP dumps for free: <https://drive.google.com/open?id=1o0dDdVFifNJPPfiS9v4FNBikyllcFtle>

If you face any problem while using the offline or online software IAPP Certified Artificial Intelligence Governance Professional (AIGP) practice exam of Exam4Tests, contact our customer service team. Our team of experts is available 24/7 for your assistance while using updated AIGP Exam Prep material. Many takers of the IAPP Certified Artificial Intelligence Governance Professional (AIGP) practice test suffer from money loss because it introduces new changes in the content of the test.

Our AIGP simulating materials let the user after learning the section of the new curriculum can through the way to solve the problem to consolidate, and each section between cohesion and is closely linked, for users who use the AIGP exam prep to build a knowledge of logical framework to create a good condition. And our pass rate for AIGP learning guide is high as 98% to 100%, which is also proved the high-quality of our exam products. You can totally rely on our AIGP exam questions.

Passing IAPP AIGP Score | AIGP New Guide Files

Our AIGP study tools not only provide all candidates with high pass rate AIGP study materials, but also provide them with good service. If you have some question or doubt about us or our products, you can contact us to solve it. The thoughtfulness of our AIGP study guide services is insuperable. What we do surly contribute to the success of AIGP practice materials. Therefore, the AIGP practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.

IAPP AIGP Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 2	<ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
Topic 3	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Topic 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q157-Q162):

NEW QUESTION # 157

Which of the following AI uses is best described as human-centric?

- A. Pattern recognition algorithms are used to improve the accuracy of weather predictions, which benefits many industries and everyday life.
- B. Autonomous robots are used to move products within a warehouse, allowing human workers to reduce physical strain and alleviate monotony.
- C. Machine learning is used for demand forecasting and inventory management, ensuring that consumers can find products they want when they want them.
- **D. Virtual assistants are used adapt educational content and teaching methods to individuals, offering personalized recommendations based on ability and needs.**

Answer: D

Explanation:

Human-centric AI focuses on improving the human experience by addressing individual needs and enhancing human capabilities.

Option D exemplifies this by using virtual assistants to tailor educational content to each student's unique abilities and needs, thereby supporting personalized learning and improving educational outcomes. This use case directly benefits individuals by providing customized assistance and adapting to their learning pace and style, aligning with the principles of human-centric AI.

Reference: AIGP BODY OF KNOWLEDGE, sections on trustworthy AI and human-centric AI principles.

NEW QUESTION # 158

Scenario:

A distributor operating in the EU is responsible for selling imported high-risk AI systems to businesses. The distributor wants to ensure they fulfill all applicable obligations under the EU AI Act.

All of the following are obligations of a distributor of high-risk AI systems under the EU AI Act EXCEPT?

- A. Verification of CE marking
- B. Corrective actions
- C. Registration in EU Database
- D. Communication with national authorities

Answer: C

Explanation:

The correct answer is C. Registration in the EU database is an obligation of providers of high-risk AI systems-not distributors.

From the AIGP ILT Guide - Roles & Obligations Module:

"Distributors must verify CE marking, ensure instructions for use are provided, inform authorities of risks, and take corrective action when necessary. However, registration duties in the EU database lie with the provider." Also from the AI Governance in Practice Report 2024:

"The AI Act differentiates responsibilities for developers, providers, importers, and distributors. Only providers of high-risk systems are obligated to register their systems in the EU AI Database." Distributors focus on verification and communication, not formal registration.

NEW QUESTION # 159

Scenario:

A company is using different types of AI systems to enhance consumer engagement. These include chatbots, recommendation engines, and automated content generation tools.

Which of the following situations would be least likely to raise concerns under existing consumer protection laws?

- A. An AI customer service system claiming that it is as accurate as a human support agent
- B. An online platform offering recommendations to its users by displaying user-specific content and targeted advertisements
- C. An AI algorithm being used in a credit decision-making process by a financial institution
- D. An AI tool using scraped digital content to generate news summaries on a publishing website

Answer: B

Explanation:

The correct answer is D. Personalized content and advertisements, as long as properly disclosed and non-deceptive, are not generally a consumer protection issue under current legal regimes.

From the AI Governance in Practice Report 2025 (Consumer Protection Section):

"Standard practices like targeted advertising and recommendations are widely accepted provided they comply with transparency and consent requirements." Meanwhile, credit decision-making and misleading AI performance claims (Answers A and B) have already led to regulatory enforcement.

The AIGP ILT Guide highlights:

"Deceptive claims, biased financial decisions, and unauthorized data use may violate consumer protection and privacy laws. Advertising personalization is routine but must be disclosed appropriately."

NEW QUESTION # 160

MULTI-SELECT

Please select 3 of the 5 options below. No partial credit will be given.

What are the roles and responsibilities of deployers of a proprietary model?

- A. Ethical design.
- B. Technical performance.
- C. Regulatory compliance.
- D. System documentation.
- E. Ethical testing.

Answer: B,C,E

Explanation:

Deployers of proprietary models are not responsible for design, but they are accountable for how the system performs in their context of use, including ensuring ethical behavior, performance, and legal compliance.

From the AI Governance in Practice Report 2025:

"Deployers of AI systems must take reasonable steps to ensure that systems are used ethically, perform safely, and align with applicable laws and standards." (p. 11-12)

"Operational governance... includes performance monitoring protocols, incident management plans, and regulatory oversight." (p. 12) Thus:

- * #A. Ethical testing- Required to mitigate misuse and unintended harms.
- * #B. Ethical design- Belongs to developers/providers, not deployers.
- * #C. Technical performance- Deployers must ensure that AI performs as expected.
- * #D. System documentation- This is the provider's obligation.
- * #E. Regulatory compliance- Deployers must ensure system use complies with applicable laws.

NEW QUESTION # 161

All of the following are examples of biometric data in the US EXCEPT?

- A. Iris scans.
- B. Keystroke dynamics.
- C. GPS location of a user's fitness watch.
- D. Walking gait.

Answer: C

Explanation:

Biometric data in the U.S. refers to data that relates to measurable biological and behavioral characteristics that can be used to identify an individual. Examples include fingerprints, facial recognition, iris scans, and behavior-based data like gait or keystrokes.

According to definitions and discussions from the AI Governance in Practice Report 2025 and U.S. privacy frameworks:

"Biometric data includes physical and behavioral human characteristics that can be used to digitally identify a person to grant access to systems, devices, or data. Examples include facial images, iris patterns, gait analysis, and voice recognition." (Report context based on common frameworks in U.S. AI law and the use of biometrics in AI governance.) Here's how the options relate:

- * A. Iris scans- These are physical biometric identifiers.
- * B. Walking gait- Behavioral biometric used increasingly in surveillance and identification.
- * C. Keystroke dynamics- Behavioral biometric based on typing patterns.
- * D. GPS location of a user's fitness watch- This is not biometric data. It is location data, which may be sensitive or personal, but not biometric.

NEW QUESTION # 162

.....

The competition in the tech sector is getting tougher and tougher day by day. Therefore, Exam4Tests is offering updated and latest IAPP AIGP Questions so aspirants can ace the IAPP AIGP test in a short time and stay competitive in today's challenging job market.
