

# Avail Updated and Latest New NCP-EUC Exam Papers to Pass NCP-EUC on the First Attempt

BONUS!!! Download part of Dupleader NCP-EUC dumps for free: [https://drive.google.com/open?id=1dMXADQUOppKwQ9FTIL0h\\_PaVtVLmRmSe](https://drive.google.com/open?id=1dMXADQUOppKwQ9FTIL0h_PaVtVLmRmSe)

The price for NCP-EUC training materials are reasonable, and no matter you are an employee in the company or a student at school, you can afford it. Besides NCP-EUC exam materials are high quality and accuracy, therefore, you can pass the exam just one time. In order to strengthen your confidence for NCP-EUC Exam Braindumps, we are pass guarantee and money back guarantee. We will give you full refund if you fail to pass the exam. We offer you free update for one year for NCP-EUC training materials, and the update version will be sent to your email address automatically.

Nutanix Certified Professional - End-User Computing (NCP-EUC) certification exam is a highly sought-after certification for those who are looking to validate their skills and knowledge in Nutanix end-user computing solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is designed to test the candidate's understanding of Nutanix products and services related to end-user computing, including VDI, DaaS, and mobility solutions. With this certification, candidates can demonstrate their expertise in deploying and managing Nutanix end-user computing solutions effectively.

## New NCP-EUC Exam Papers - Quiz Nutanix First-grade NCP-EUC Valid Test Cram

No matter you are a fresh man or experienced IT talents, here, you may hear that NCP-EUC certifications are designed to take advantage of specific skills and enhance your expertise. While, if you want to be outstanding in the crowd, it is better to get the NCP-EUC certification. While, where to find the latest NCP-EUC Study Material for preparation is another question. Nutanix NCP-EUC exam training will guide you and help you to get the NCP-EUC certification. Hurry up, download NCP-EUC test practice torrent for free, and start your study at once.

Earning the NCP-EUC Certification can help IT professionals advance their careers by demonstrating their expertise in Nutanix EUC solutions. It is also a valuable credential for organizations that use Nutanix technology to ensure that their IT staff has the necessary skills and knowledge to manage and maintain their EUC environments.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q177-Q182):

### NEW QUESTION # 177

An administrator suspects that Windows desktop VMs are using less than their configured memory, resulting in wasted cluster resources.

How can an administrator verify if this is true?

- A. Use Task Manager on each desktop VM.
- B. Run a NCC health check report.
- C. Review the capacity runway summary.
- **D. View the over-provisioned VMs list.**

**Answer: D**

Explanation:

Nutanix Prism Central includes Behavioral Learning and Efficiency reporting tools designed to identify inefficient resource usage.<sup>7</sup> To verify if VMs are "using less than their configured memory" (wasted resources), the administrator should view the Over-provisioned VMs list within the Efficiency widget. Nutanix defines an "Over-provisioned VM" as one that is sized with more resources (CPU/Memory) than it actually consumes based on historical performance data.<sup>8</sup> This list explicitly identifies these VMs, allowing the administrator to right-size them and reclaim cluster resources, whereas Task Manager (Option A) is manual/individual, and Capacity Runway (Option D) focuses on global cluster storage/resource exhaustion time rather than individual VM efficiency.

### NEW QUESTION # 178

An administrator is using Citrix Studio to configure policies for their existing CVAD environment on to a Nutanix Files share. The administrator would like to use Citrix Director to reset user profiles.

How should the user profiles be configured?

- A. Redirect user's Desktop, Documents and Favorites to a Nutanix Files home share.
- **B. use Nutanix Files distributed shares. Deploy Citrix Profile Management user stores inside the user's top-level directory.**
- C. Redirect user's Desktop, Documents and Favorites to a Nutanix Files general share.
- D. use Nutanix Files standard shares  
Deploy Citrix Profile Management user stores inside the user's top-level directory

**Answer: B**

Explanation:

This is because this option will allow the administrator to use Citrix Director to reset user profiles on a Nutanix Files share that provides high performance, scalability, and resilience<sup>3</sup>.

Citrix Profile Management is a solution that allows administrators to manage user profiles and settings across different devices and sessions<sup>12</sup>. Nutanix Files is a software-defined file storage solution that provides high performance and scalability for file data<sup>12</sup>.

Nutanix Files supports all forms of profile management with efficient metadata caching techniques that optimize for faster VDI logon times<sup>12</sup>. Nutanix Files offers two types of shares: standard shares and distributed shares<sup>3</sup>. Standard shares are hosted on a single file server, while distributed shares are hosted on multiple file servers for load balancing and high availability<sup>3</sup>.

### NEW QUESTION # 179

Shutterstock

An administrator is using EUC broker software to manage and direct connections to virtual desktops and applications. The administrator is being asked to make sure traffic is distributed across the broker VMs and wants to make sure the best solution is being implemented.

How can the administrator best accomplish this goal?

- A. Use Flow Virtual Networking and external load balancers.
- B. Use the virtual switch in active-active mode across all hosts.
- **C. Use round-robin DNS to distribute connections.**
- D. Use Nutanix Data Lens to provide efficiency across VMs.

**Answer: C**

Explanation:

In the context of distributing connections across multiple broker VMs (such as Citrix Delivery Controllers or Horizon Connection Servers) without introducing complex third-party infrastructure dependencies like strict SDN overlays (Option A), Round-robin DNS is the standard supported method for connection distribution mentioned in basic Nutanix EUC architecture guides.

While enterprise production environments often use dedicated External Load Balancers (like Citrix ADC), Option A implies the mandatory use of Flow Virtual Networking (an overlay SDN solution) to achieve this, which is not a standard requirement for simple

broker load balancing. Therefore, among the available choices, creating multiple DNS A-records for the broker FQDN (Round-robin DNS) is the valid mechanism to distribute incoming user traffic across the available broker nodes.

### NEW QUESTION # 180

An administrator is migrating Citrix back-end infrastructure to Citrix Cloud.  
What three pieces of information are needed to connect Prism to Citrix Cloud?

- A. Prism Data Service IP Address, Client ID, Passphrase
- B. Customer ID, Citrix Cloud Provider, Prism Data Service IP Address
- C. Citrix Login, Secret Key, Passphrase
- **D. Customer ID, Client ID, Secret Key**

**Answer: D**

Explanation:

<https://docs.citrix.com/en-us/citrix-workspace/integrate.html>

The Prism Citrix Cloud integration feature allows you to configure the Citrix Cloud settings in Prism Central and connect your Nutanix cluster as a resource location in Citrix Cloud<sup>4</sup>. This enables you to use Citrix Virtual Apps and Desktops service to deliver applications and desktops to your end users.

To use this feature, you need to meet some prerequisites, such as:

The Prism Central version must be 2020.11 or later.

The AOS version must be 5.15 LTSR or later.

The hypervisor must be AHV or ESXi.

You must have a valid Citrix Cloud account with access to Citrix Virtual Apps and Desktops service<sup>4</sup>.

One of the steps for configuring the Prism Citrix Cloud integration is to establish the connection to Citrix Cloud. To do this, you need to provide three pieces of information:

Customer ID: This is a unique identifier for your Citrix Cloud account that can be found in your profile settings<sup>2</sup>.

Client ID: This is a unique identifier for an API client that can access your Citrix Cloud account. You can create an API client in your identity and access management settings<sup>2</sup>.

Secret Key: This is a secret string that authenticates the API client. You can generate a secret key when you create an API client<sup>2</sup>.

### NEW QUESTION # 181

A company based out of San Jose, CA, USA is considering deploying a global virtual desktop environment.

Currently, there is no solution for virtual desktops. The company has employees globally and decides to leverage the Public Cloud across multiple regions for their deployment.

Which factor is the most important for choosing a public cloud data center location to optimize for end-user performance?

- A. The combined distance the corporate headquarters, the data center, and the users should be minimized.
- B. The data center should be in the same state or country as the end users.
- **C. The network latency between the end user and the data center should be minimized,**
- D. The distance from the data center to the end users should be minimized.

**Answer: C**

Explanation:

one of the factors that affects end-user performance in a virtual desktop environment is network latency, which is the time it takes for data packets to travel between two points on a network.

Therefore, if the company wants to optimize end-user performance, they should choose a public cloud data center location that minimizes the network latency between the end user and the data center.
