SAP C_ACT_2403 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to SAP Activate: This section of the exam measures skills of SAP Project Managers and introduces the SAP Activate methodology framework. It explores its phases, guiding principles, and how Activate helps streamline SAP S • 4HANA implementations.
Topic 2	• Agile Project Planning: This section of the exam measures skills of SAP Project Managers and covers how to plan agile projects using SAP Activate. It tests your ability to define project scope, organize sprints, and set up backlog and stakeholder expectations in a way that aligns with agile principles and SAP best practices.

Topic 3	• Transition Path "System Conversion" and "Selective Data Transition": This section of the exam measures skills of Implementation Consultants and deals with converting existing SAP systems to S • 4HANA or migrating selected data. It tests knowledge of conversion strategies, migration tools, and how to handle legacy data while minimizing disruption.
Topic 4	• Transition Path Private and Public Cloud: This section of the exam measures skills of SAP Project Managers and covers hybrid and pure cloud deployment options. It compares and contrasts strategies for private and public cloud paths and how to choose the right one given business, technical, and operational requirements.
Topic 5	• Agile Project Delivery: This section of the exam measures skills of Implementation Consultants and examines how you deliver agile projects in practice. It focuses on how to execute iterations, manage changes, incorporate feedback, and ensure continuous value delivery through incremental releases.
Topic 6	• Transition Path "New Implementation SAP S • 4HANA Cloud, public edition": This section of the exam measures skills of Implementation Consultants and lays out the approach for new cloud-based S • 4HANA projects. It focuses on tasks, activities, and strategies specific to deploying S • 4HANA in a public cloud environment using Activate.
Topic 7	• Workstreams Overview: This section of the exam measures skills of Implementation Consultants and gives an overview of the key workstreams in a SAP Activate project. It presents how different streams such as configuration, integration, testing, and governance interact across the project lifecycle.

SAP Certified Associate - Project Manager - SAP Activate Sample Questions (Q44-Q49):

NEW QUESTION # 44
Which of the following are Selective Data Transition scenarios? Note: There are 3 correct answers to this question

- A. Migration of selected applications
- B. Migration of open items
- C. Migration of business units
- D. Migration of transactional data
- E. Consolidation

Answer: C,D,E

Explanation:
* A is correct because migration of business units is one of the Selective Data Transition scenarios. It allows the customer to move specific business units or company codes from their source system to SAP S/4HANA, while keeping the rest of the system unchanged.
* B is correct because consolidation is one of the Selective Data Transition scenarios. It allows the customer to merge multiple source systems into one SAP S/4HANA system, while harmonizing and simplifying the data and processes.
* E is correct because migration of transactional data is one of the Selective Data Transition scenarios. It allows the customer to move selected transactional data (such as open items, balances, and documents) from their source system to SAP S/4HANA, while preserving the historical data in the source system.

NEW QUESTION # 45
When applying a cloud mindset in a greenfield Implementation, which of the following should you consider?Note: There are 2 correct answers to this question.

- A. Ensure transparency on deviations
- B. Use quality gates
- C. Apply SAP quality principles
- D. Use supported extensibility technologies

Answer: A,D

Explanation:
* A is correct because a cloud mindset means embracing the cloud capabilities and avoiding unnecessary customizations that could impact the performance, scalability, and maintainability of the solution.
Therefore, using supported extensibility technologies is important to ensure compatibility and compliance with the cloud environment.
* D is correct because a cloud mindset also means ensuring transparency on deviations from the standard SAP functionality and documenting the rationale and impact of any customizations or extensions that are required to meet the customer needs. Verified References:

NEW QUESTION # 46
When deploying a new implementation on-premise, which of the following is recommended when performing custom development?

- A. SAP API Business Hub
- B. SAP Best Practices
- C. SAP Business Technology Platform
- D. SAP ABAP Workbench

Answer: D

Explanation:
* D is correct because when deploying a new implementation on-premise, it is recommended to use SAP ABAP Workbench for custom development. SAP ABAP Workbench is a tool that allows developers to create, modify, and enhance ABAP programs and applications in an on-premise system. It provides various features, such as syntax check, debugging, testing, and transport management. Verified References:
* : ABAP Workbench

NEW QUESTION # 47
Which of the following are workshop design principles/guidelines? Note: There are 2 correct answers to this question.

- A. Fit-to-standard
- B. Validation by end users
- C. Expert configuration definitions
- D. Active participation

Answer: A,D

Explanation:
The fit-to-standard approach and active participation are key principles in SAP Activate workshops. Fit-to-standard ensures alignment with SAP Best Practices, while active participation engages stakeholders in solution design, ensuring their needs are incorporated.

NEW QUESTION # 48
Which of the following are levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package?Note: There are 2 correct answers to this question.

- A. Business Process Scenarios
- B. Building Blocks
- C. Configuration Guides
- D. Scope Items

Answer: B,D

Explanation:
* B is correct because Scope Items are one of the levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package. A Scope Item is a unit of business functionality that covers one or more business processes. A Scope Item has a

description, a list of configuration steps, and a set of test cases.
* C is correct because Building Blocks are one of the levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package. A Building Block is a reusable component that contains configuration data, master data, or transactional data for a specific business area. A Building Block can be assigned to one or more Scope Items. Verified References:
