SAP Certified Associate - Validating Business Transformation Sample Questions (Q16-Q21):

NEW QUESTION # 16

What tool offers access to SAP Activate roadmaps?

- A. Cloud ALM Dashboard
- B. Process Explorer
- C. Roadmap Viewer
- D. Readiness Check

Answer: C

NEW QUESTION # 17

What analysis does SAP Signavio support to compare company performance with peers?

- A. Value discovery
- B. Regression modelling
- C. SWOT analysis
- D. Performance benchmarking

Answer: D

Explanation:

SAP Signavio includes powerful benchmarking tools that allow organizations to compare their business process performance with internal and external peers. This capability, known as performance benchmarking, provides insights into how an organization's process KPIs—such as cycle times, automation rates, exception ratios, throughput, or backlog levels—measure up against industry standards or best-in-class performers. Performance benchmarking helps identify whether processes are lagging behind competitors or operating efficiently relative to market expectations.

Through SAP Signavio Process Insights and Process Intelligence, businesses can analyze large volumes of operational data to pinpoint where bottlenecks occur and identify root causes of inefficiency. Benchmarking goes beyond simple reporting by categorizing processes into performance segments and highlighting improvement potential. These insights are particularly valuable during transformation planning, as they guide prioritization and help justify investment decisions by quantifying the potential value of

change.

Options A, B, and D do not represent benchmarking. Value discovery identifies opportunities, regression modeling is statistical analysis not used in this context, and SWOT is a strategic planning tool unrelated to system process analytics. Thus, performance benchmarking is the correct and recognized approach in SAP Signavio for comparing company performance with peers.
