Trustable Sample 350-401 Questions Pdf - Pass 350-401 Exam

Cisco 350-401 dumps may be the best method for candidates who are preparing for their exam and eager to clear exam as soon as possible. People's success lies in their good use of every change to self-improve. Our Cisco 350-401 Dumps will be the best resources for your real test. If you choose our products, we will choose efficient and high-passing preparation materials.

What Are the Details of the Cisco ENCOR 300-401 Certification Exam?

Even though the vendor doesn't give details on the total number of questions that the test includes, there is still some information disclosed. Thus, candidates should be ready to solve questions of multiple formats such as drag and drop, scenario-based, multiple-choice, or multiple-answer items. One will need to answer correctly about 80 to 85% of the total exam questions in 120 minutes.

ENCOR test is available in Japanese and English. The registration fee is of \$300. When it comes to the enrollment process, candidates will have to follow four simple steps. They will first need to create an account on the Pearson VUE platform and log in.

The next step would be to go to the “proctored exam” section. The third action involves searching for the test’s code which is 350-401. Finally, they will need to follow the instructions that appear on the screen and finalize the registration.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q337-Q342):

NEW QUESTION # 337

Refer to the exhibit.

The screenshot shows the Cisco WLAN security settings configuration page. The 'Security' tab is selected, and the 'Layer 3' sub-tab is active. The configuration is as follows:

- Fast Transition:** Unchecked.
- Protected Management Frame:** PMF is set to 'Disabled'.
- WPA+WPA2 Parameters:** WPA Policy is unchecked, and WPA2 Policy-AES is checked.
- Authentication Key Management:** 802.1X, CCKM, FT 802.1X, and FT PSK are all unchecked, while PSK is checked. The PSK Format is set to ASCII.

Based on the configuration in this WLAN security setting, which method can a client use to authenticate to the network?

- A. certificate
- B. username and password
- C. RADIUS token
- D. text string

Answer: D

NEW QUESTION # 338

Drag and drop characteristics of PIM dense mode from the left to the right.

Answer:

Explanation:

NEW QUESTION # 339

Refer to the exhibit. External users require HTTP connectivity to an internal company web server that is listening on TCP port 8080. Which command set accomplishes this requirement?

- A)
- B)

```

interface G0/0
ip address 209.165.200.225 255.255.255.224
ip nat outside

interface G0/1
ip address 10.1.1.1 255.255.255.0
ip nat inside

ip nat inside source static tcp 10.1.1.100 8080 interface G0/0 80
  
```

- C)
- D)
- E)

- A. Option C
- B. Option E
- C. Option D
- D. Option A
- E. Option B

Answer: E

NEW QUESTION # 340

Which statement describes the IP and MAC allocation requirements for virtual machines on types 1 hypervisors?

- A. Each virtual machine requires a unique IP and MAC addresses to be able to reach to other nodes.
- B. Each virtual machine requires a unique IP address but shares the MAC address with the physical server
- C. Each virtual machines requires a unique IP address but shares the MAC address with the address of the physical server.
- D. Each virtual machine requires a unique MAC address but shares the IP address with the physical server.

Answer: A

Explanation:

Explanation

A virtual machine (VM) is a software emulation of a physical server with an operating system.

From an application's point of view, the VM provides the look

and feel of a real physical server, including all its components, such as CPU, memory, and network interface cards (NICs).

The virtualization software that creates VMs and performs the hardware abstraction that allows multiple VMs to run concurrently is known as a hypervisor.

There are two types of hypervisors: type 1 and type 2 hypervisor.

In type 1 hypervisor (or native hypervisor), the hypervisor is installed directly on the physical server. Then instances of an operating system (OS) are installed on the hypervisor. Type 1 hypervisor has direct access to the hardware resources. Therefore they are more efficient than hosted architectures. Some examples of type 1 hypervisor are VMware vSphere/ESXi, Oracle VM Server, KVM and Microsoft Hyper-V.

In contrast to type 1 hypervisor, a type 2 hypervisor (or hosted hypervisor) runs on top of an operating system and not the physical hardware directly. answer 'Each virtual machine requires a unique IP and MAC addresses to be able to reach to other nodes' big advantage of Type 2 hypervisors is that management console software is not required. Examples of type 2 hypervisor are VMware Workstation (which can run on Windows, Mac and Linux) or Microsoft Virtual PC (only runs on Windows).

NEW QUESTION # 341

Refer to the exhibit.

An engineer is installing a new pair of routers in a redundant configuration. Which protocol ensures that traffic is not disrupted in the event of a hardware failure?

- A. VRRP
- B. GLBP
- C. HSRPv2
- D. HSRPv1

Answer: D

Explanation:

Explanation

The virtual MAC address is 0000.0c07.acXX (XX is the hexadecimal group number) so it is using HSRPv1.

Note: HSRP Version 2 uses a new MAC address which ranges from 0000.0c9f.f000 to 0000.0c9f.ffff.

NEW QUESTION # 342

.....

To make an open entrance and cash, everybody should gather themselves with the right and built up base on material for Cisco 350-401. The top-notch highlights are given to clients to affect the essential undertaking in certification. Every one of you can test your course of action with Cisco 350-401 Dumps by giving the phony test. Mock tests are outstandingly worked for you to make heads or tails of your goofs while giving Cisco 350-401.
