

1z0-1080-25–100% Free Study Center | High Hit-Rate Reliable Oracle Planning 2025 Implementation Professional Test Tutorial

BONUS!!! Download part of TroytecDumps 1z0-1080-25 dumps for free: <https://drive.google.com/open?id=1oPPUWKWzvXovrYahRvnjesSybnlY1OVv>

To keep with the fast-pace social life, we provide the fastest delivery services on our 1z0-1080-25 exam questions. As most of the people tend to use express delivery to save time, our 1z0-1080-25 preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant 1z0-1080-25 Exam Materials to your mailbox within the given time. Our company attaches great importance to overall services, if there is any problem about the delivery of 1z0-1080-25 exam materials, please let us know, a message or an email will be available.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 2	<ul style="list-style-type: none">Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 3	<ul style="list-style-type: none">This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 4	<ul style="list-style-type: none">Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 5	<ul style="list-style-type: none">Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 6	<ul style="list-style-type: none">Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 7	<ul style="list-style-type: none">Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.

Topic 8	<ul style="list-style-type: none"> Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 9	<ul style="list-style-type: none"> Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 10	<ul style="list-style-type: none"> Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 11	<ul style="list-style-type: none"> Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 12	<ul style="list-style-type: none"> Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 13	<ul style="list-style-type: none"> Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 14	<ul style="list-style-type: none"> Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 15	<ul style="list-style-type: none"> Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 16	<ul style="list-style-type: none"> Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 17	<ul style="list-style-type: none"> Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 18	<ul style="list-style-type: none"> Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 19	<ul style="list-style-type: none"> Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 20	<ul style="list-style-type: none"> Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 21	<ul style="list-style-type: none"> Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 22	<ul style="list-style-type: none"> Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 23	<ul style="list-style-type: none"> Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 24	<ul style="list-style-type: none"> Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system
Topic 25	<ul style="list-style-type: none"> Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.

Reliable 1z0-1080-25 Test Tutorial | 1z0-1080-25 Latest Test Practice

The Oracle Planning 2025 Implementation Professional 1z0-1080-25 certification offers a great opportunity for beginners and professionals to demonstrate their skills and abilities to perform a certain task. For the complete, comprehensive, for Oracle Planning 2025 Implementation Professional 1z0-1080-25 Exam Preparation you can get assistance from Oracle Planning 2025 Implementation Professional Exam Questions.

Oracle Planning 2025 Implementation Professional Sample Questions (Q82-Q87):

NEW QUESTION # 82

You must assign a Planning user with a Cloud EPM predefined role that allows them to create and administer Planning or Planning Modules and service components. This role should also allow them to grant permissions to other users. Which of the following predefined role must you assign this Planning user?

- **A. Service Administrator**
- B. Approvals Administrator
- C. System Administrator
- D. Identity Role Administrator

Answer: A

Explanation:

In Oracle Planning 2024, predefined roles in Cloud EPM determine user permissions. The requirement is for a role that allows a Planning user to create and administer Planning or Planning Modules and service components, as well as grant permissions to other users. Among the options:

* A. System Administrator: Incorrect. This role exists in some Oracle systems but is not a Cloud EPM predefined role specific to Planning. It's too broad and not aligned with EPM terminology.

* B. Approvals Administrator: Incorrect. This role manages approval processes (e.g., workflows) but does not include creating/administering applications or granting permissions beyond approvals.

* C. Identity Role Administrator: Incorrect. While this role manages identity and access (e.g., assigning roles), it does not allow creating or administering Planning applications or service components.

* D. Service Administrator: Correct. The Service Administrator role in Cloud EPM allows users to create and manage Planning applications, configure modules and service components (e.g., forms, rules), and assign permissions to other users via access control.

The Service Administrator role is the highest-level predefined role in Oracle EPM Cloud for Planning, encompassing application management and user permission assignments, making it the correct choice.

Oracle Planning 2024 Implementation Study Guide: "Predefined Roles in Cloud EPM" (docs.oracle.com, Published 2024-08-25).

Oracle EPM Cloud Documentation: "Managing Users and Roles" (docs.oracle.com, Published 2023-10-30, updated for 2024).

NEW QUESTION # 83

Which three principles of assigning permissions to artifacts, rules and folders are valid?

- A. Users and Power Users have Write permissions to all dimension members and to all artifacts.
- **B. Users and Power Users can design artifacts.**
- **C. Users and Power Users can work only with members to which they have permissions.**
- **D. Users who are assigned permissions to a folder can access the items in that folder, unless they are assigned.**

Answer: B,C,D

NEW QUESTION # 84

Which two features can help users create business rules?

- **A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on.**

- B. Add calculations in calculation script syntax by switching to Script Mode.
- C. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule.
- D. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules.

Answer: A,D

Explanation:

In Oracle Planning 2024 Implementation, business rules are essential for automating calculations, data manipulations, and complex logic within the application. The platform provides multiple features to assist users in creating these rules efficiently, as outlined in the Oracle documentation. The two features that directly help users create business rules are:

* A. Add calculations by using preformed system templates, such as clearing data, copying data, aggregating data, and so on: Oracle Planning offers predefined system templates that simplify rule creation. These templates enable users to quickly implement common operations like clearing data, copying data between dimensions, or aggregating data without writing complex code from scratch. This feature is particularly useful for users who may not have advanced scripting skills, as it provides a guided, template-driven approach to rule design.

* C. Design sophisticated rules that solve use cases that normal business rules cannot solve by using Groovy business rules: Groovy business rules extend the capabilities of standard business rules by allowing users to write custom logic using the Groovy scripting language. This feature is designed for advanced use cases, such as dynamic calculations based on runtime conditions or complex data manipulations that go beyond the scope of traditional rules. It empowers users to address specialized business requirements efficiently.

* B. Add calculations in calculation script syntax by switching to Script Mode: While Script Mode exists and allows users to write calculations using a script-based syntax (e.g., Essbase calc scripts), it is not highlighted as a primary "feature" for creating business rules in the Oracle Planning 2024 context. It is more of a mode of operation rather than a distinct feature assisting rule creation.

* D. Rules are represented graphically in a flow chart into which you can drag and drop components to design the rule: Although graphical rule design was a feature in older Hyperion Planning versions (e.g., Calculation Manager's graphical interface), Oracle Planning 2024 documentation does not emphasize a drag-and-drop flowchart interface as a current primary method for rule creation. Instead, it focuses on templates and Groovy scripting.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Business Rules" (docs.oracle.com, updated 2024). This section details the use of "system templates for calculations" and

"Groovy business rules" as key features for rule creation.

* Oracle Planning 2024 Implementation Study Guide: Confirms that predefined templates (e.g., for clearing or aggregating data) and Groovy rules are core features to assist users in designing business rules.

NEW QUESTION # 85

Which three application types can you create and edit Groovy Rules?

- A. Custom
- B. FreeForm
- C. Reports
- D. Module (Enterprise)
- E. Hybrid

Answer: A,B,D

NEW QUESTION # 86

Which three security design principles can help reduce overall security maintenance and troubleshooting?

- A. Using inherited permissions
- B. Creating groups over assigning individual access permission to users
- C. Assigning read access to each cube, and then none and write access within dimension security
- D. Having a single Identity Domain Administrator to ensure seamless operations
- E. Configuring single sign-on (SSO)

Answer: A,B,E

NEW QUESTION # 87

.....

The browser-based version has all features of the desktop 1z0-1080-25 practice exam. You don't need special plugins or software installations to operate the web-based Oracle Planning 2025 Implementation Professional (1z0-1080-25) practice exam. This Oracle Planning 2025 Implementation Professional (1z0-1080-25) practice test is compatible with every browser such as MS Edge, Chrome, Internet Explorer, Firefox, Opera, and Safari. TroytecDumps's web-based 1z0-1080-25 practice exam promotes self-assessment and self-study.
