COBIT-2019考試證照 & COBIT-2019考古題推薦

NewDumps 培訓資源是個很了不起的資源網站，包括了ISACA 的 COBIT-2019 考試材料，研究材料，技術材料。認證培訓和詳細的解釋和答案。還有完善的售後服務，我們對所有購買 COBIT-2019 題庫學習資料的客戶提供跟蹤服務，在你購買 COBIT-2019 題庫學習資料后的半年內，享受免費升級題庫學習資料的服務。如果在這期間，ISACA COBIT-2019 的考試知識點發生變動，我們會在第一時間更新相關題庫學習資料，並免費提供給你下載。

最新的 COBIT Foundation COBIT-2019 免費考試真題 (Q169-Q174):

問題 #169

When making IT-related decisions, stakeholders will find the COBIT framework MOST useful for:

- A. deciding on the best solution in a given situation.
- B. obtaining prescribed decisions or solutions to specific problems and issues.
- C. defining the components and the levels at which decisions should be made.

答案： C

解題說明：

COBIT 2019 provides a comprehensive framework to support the decision-making process rather than prescribing specific solutions. It guides the structuring of governance and management objectives across different domains, such as EDM, APO, and BAI, enabling stakeholders to understand the components and decision levels required for efficient IT governance. This aligns with COBIT's goals to establish clear responsibilities and decision-making criteria for various roles, ensuring alignment with enterprise objectives and stakeholder needs.

問題 #170

Within the principles for a governance system, the value generated from the use of I&T reflects:

- A. a balance among benefits, risk and resources.
- B. the ratio of costs versus achieved service levels.
- C. maximized financial benefits to the investment portfolio.

答案： A

解題說明：

The value generated from the use of I&T reflects a balance among benefits, risk and resources. This is based on the principle of balance, which states that "governance of enterprise I&T should ensure that stakeholder needs, conditions and options are evaluated to determine balanced, agreed-on enterprise objectives to be achieved; setting direction through prioritization and decision making; and monitoring performance and compliance against agreed-on direction and objectives" 1. Value generation is not only about maximizing financial benefits or minimizing costs or risks, but also about optimizing them in relation to the expected outcomes⁷.

問題 #171

Which COBIT domain of management objectives incorporates managed risk?

- A. Build, acquire and implement (BAI)
- B. Align, plan and organize (APO)
- C. Deliver, service and support (DSS)

答案： B

解題說明：

Explanation/Reference: <https://graser.co.at/en/cobit-5-understand-the-framework/>

問題 #172

Which of the following domains deals with the definition of IT solutions and their integration in business processes?

- A. Deliver, Service and Support (DSS)
- B. Build, Acquire and Implement (BAI)
- C. Align, Plan and Organize (APO)

答案： B

解題說明：

Explanation

The Build, Acquire and Implement (BAI) domain deals with the definition of IT solutions and their integration in business processes. This domain covers the activities related to identifying, developing, acquiring, implementing, testing, integrating, and deploying IT solutions that meet business requirements. The BAI domain consists of 10 management objectives that describe the desired outcomes of these activities.¹⁴ References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance and Management Objectives

問題 #173

One year after IT governance is implemented, what KEY question should be asked and evaluated?

- A. Has the enterprise leveraged lessons learned?
- **B. Has the enterprise achieved expected benefits?**
- C. Has the enterprise reduced its risk exposure?

答案: B

解題說明:

Explanation

The key question that should be asked and evaluated one year after IT governance is implemented is whether the enterprise has achieved expected benefits. Benefits are the positive outcomes or value that are derived from a project or program. Benefits can be tangible (such as increased revenue, reduced costs, improved efficiency, etc.) or intangible (such as enhanced reputation, customer satisfaction, employee engagement, etc.). Benefits realization is the process of planning, managing, measuring, and reporting the benefits that are delivered by a project or program. Asking and evaluating whether the enterprise has achieved expected benefits one year after IT governance is implemented is important because it helps to determine whether the IT governance system is effective in creating value for the enterprise and its stakeholders. 12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution
