Are you tired of feeling overwhelmed and unsure about how to prepare for your SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) exam? Are you ready to take control of your future and achieve the scores you want to get in the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) certification exam? If so, it's time to buy real SAP C-ACDET-2506 Dumps of BootcampPDF our team of experts has designed the product that has already helped thousands of students just like you pass the exam.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

C-ACDET-2506 Authorized Test Dumps | Real C-ACDET-2506 Question

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) exam questions with interest. BootcampPDF uses pictures that are related to the C-ACDET-2506 certification exam and can even add some charts, and graphs that show the numerical values. It will not let the reader feel bored with the C-ACDET-2506 Practice Test. They can engage their attention in SAP C-ACDET-2506 exam visual effects and pictures that present a lot of.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q50-Q55):

NEW QUESTION # 50

What are the key characteristics of a Bluefield deployment scenario? Note: There are 2 correct answers to this question.

- A. The Production site may have live transactions
- B. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed
- C. The Test site has been configured using the SAP Bluefield template
- D. Many team members have a naive perception of deploying software solutions

Answer: A,B

NEW QUESTION # 51

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- A. Use reporting workaround
- B. Ignore them
- C. Rebuild them manually in production
- D. Defer to post-go-live

Answer: C

NEW QUESTION # 52

Which of the following can be used to define relation types and establish a custom relationship? (Select 2 correct answers)

- A. A standard class such as `ariba.basic.core.CommodityCode`
- B. A custom Flex Master Data Template such as `vrealm_1936.fmd_58984.Hospital`
- C. A custom Form Template such as `vrealm_1936.formDoc_18697.LessonsLearned`
- D. A custom Enumeration such as `Contracts_Contract_Type`

Answer: A,B

Explanation:

In SAP Ariba, relation types can be defined using custom Flex Master Data (FMD) templates and standard classes such as `ariba.basic.core.CommodityCode`. These define valid relationships between fields, allowing dependent picklists or filtering logic in forms. Custom enumerations are static lists and are not used to establish dynamic relations, and custom form templates are for form layouts and do not define data relationships.

NEW QUESTION # 53

Which of the following considerations are important when creating custom fields? (Select 2 correct answers)

- A. There's a limit to the number of fields, by data type, that can be added to a class
- B. When a field has been created and published, that field type has been consumed from the number of available fields on the class
- C. Published field changes can be reverted via Un-publish to free up memory
- D. The data type of a field can be dynamically changed, depending on data type availability

Answer: A,B

Explanation:

SAP Ariba allocates a finite number of field "slots" per data type for each class. When a custom field is created and published, it consumes one of these slots. Therefore, there are limits to how many fields of each type you can create per class. The data type cannot be changed after creation, and un-publishing does not reclaim the allocated slot; you must delete the field to free resources. Planning field usage carefully avoids hitting these system limits.

NEW QUESTION # 54

Which of the following applies to Suite Integration?

- A. Suite Integration represents the out-of-the-box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud.
- B. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- C. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution.
- **D. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated.**

Answer: D

Explanation:

Suite Integration in SAP Ariba refers to the native, out-of-the-box integration among SAP Ariba Strategic Sourcing Suite components such as sourcing, contracts, and supplier lifecycle. This integration ensures seamless workflows, shared master data (suppliers, users, commodity codes), and a unified user experience without manual intervention. It is a key benefit differentiating SAP Ariba from fragmented solutions. Manual third-party integrations or ERP integrations like S/4HANA are separate and not referred to as Suite Integration.

NEW QUESTION # 55

.....

Every person in the IT industry has his own dream: to pass C-ACDET-2506 certification exam, or a promotion, a raise and so on in the IT career. The dream of BootcampPDF is to help you achieve C-ACDET-2506 exam certification. After you purchase our C-ACDET-2506 Exam Dumps training materials, we will provide one year free renewal service.
