

Valid NCP-MCI-6.10 Study Guide - Latest NCP-MCI-6.10 Study Materials

NCP study guide questions with complete solutions

Nutrition Care Process correct answer: Problem solving method for dietetics to use critically thinking and decision making to address nutrition related problems and provide safe, effective and high quality nutrition care

ADIME correct answer: Assessment
Diagnosis
Intervention
Monitoring
Evaluation

Standardized process correct answer: -Combines process of care and content of care
-(Evidence-based practice)
-Ability to clearly state patient goals and evaluate outcomes

NTR Assessment correct answer: collect timely and appropriate data
-Food/Ntr history
-Anthropometric Measurements (BMI)
-Biochemical Data, Med tests and Procedures (Lab data)
-Ntr-focused physical findings (physical appearance)
-Client History (personal history)

NTR Care Indicators measured correct answer: -Intake
-Lab Values
-Weights
-Physical activity
-Food diary

NTR Care criteria correct answer: DRI
Lab reference
BMI
Dietary guidelines
NTR prescription

NTR Diagnosis correct answer: -Intake
-Clinical
-Behavioral-Environmental
(PES)

PES correct answer: Problem or NTR Diagnosis Term (NTR status)
Etiology "related to"
Signs/Symptoms "how do you know"

Assessment correct answer: Data collected
Cluster individual data elements to identify nutrition diagnosis

P.S. Free 2026 Nutanix NCP-MCI-6.10 dumps are available on Google Drive shared by Exam4Free:
https://drive.google.com/open?id=1CWmTR77pwvZ__IobUp6BArme9QWr_s7P

For the purposes of covering all the current events into our NCP-MCI-6.10 study guide, our company will continuously update our training materials. And after payment, you will automatically become the VIP of our company, therefore you will get the privilege to enjoy free renewal of our NCP-MCI-6.10 practice test during the whole year. No matter when we have compiled a new version of our training materials our operation system will automatically send the latest version of the NCP-MCI-6.10 Preparation materials for the exam to your email, all you need to do is just check your email then download it.

The exam outline will be changed according to the new policy every year, and the NCP-MCI-6.10 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline. The NCP-MCI-6.10 Exam Questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the NCP-MCI-6.10 candidates presents the proposition scope and trend of each year.

Latest NCP-MCI-6.10 Study Materials, NCP-MCI-6.10 Exam Questions Fee

The efficiency of our Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) practice materials can be described in different aspects. Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) practice materials are not only financially accessible, but time-saving and comprehensive to deal with. The efficiency of our NCP-MCI-6.10 practice materials can be described in different aspects. NCP-MCI-6.10 practice materials are not only financially accessible, but time-saving and comprehensive to deal with the important questions trying to master them efficiently. You can obtain our NCP-MCI-6.10 practice materials within five minutes. Our NCP-MCI-6.10 practice materials are compiled specially for time-sensitive exam candidates if you are wondering. Eliminating all invaluable questions, we offer NCP-MCI-6.10 practice materials with real-environment questions and detailed questions with unreliable prices upon them and guarantee you can master them effectively.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q110-Q115):

NEW QUESTION # 110

Refer to Exhibit:

Cluster Details

Virtual IP / FQDN is used to access the PC VM Cluster.

Cluster Name

Unnamed

FQDN

Virtual IP

NUTANIX

In scale-out Prism Central deployment, what additional functionality does configuring an FQDN instead of a Virtual IP provide?

- A. Load balancing
- B. Segmentation
- C. Resiliency
- D. SSL Certificate

Answer: A

Explanation:

When using FQDN instead of a Virtual IP in a scale-out Prism Central deployment, Nutanix enables load balancing across multiple Prism Central instances.

- * Option A (Load balancing) is correct because it ensures that requests are distributed among multiple Prism Central nodes, improving performance and redundancy.
- * Option B (Resiliency) is incorrect because resiliency is achieved through HA and replication, not through FQDN configuration.
- * Option C (Segmentation) is incorrect because network segmentation is handled at the VLAN or security policy level.
- * Option D (SSL Certificate) is incorrect because SSL certificates can be applied regardless of whether FQDN or Virtual IP is used.

References:

- * Nutanix Prism Central Deployment Guide
- * Nutanix Best Practices for Scale-Out Prism Central
- * Nutanix Support KB: Configuring FQDN for Prism Central

NEW QUESTION # 111

Refer to Exhibit:

An administrator sees the alert shown in the exhibit.

What should the administrator do to ensure the nutanix user can no longer SSH to a CVM using a password?

- A. Delete the nutanix user.
- B. Rename the nutanix user.
- C. Enable Cluster Lockdown.
- D. Block port 22 on the CVM firewall.

Answer: C

Explanation:

Understanding the Exhibit & the Alert

The alert states:

* "The cluster is using password-based SSH access for the CVM."

* "Password-based remote login is enabled on the cluster."

* "It is recommended to use key-based SSH access instead of password-based SSH access for better security." This means that the nutanix user can log in to Controller VMs (CVMs) using a password, which is a security risk.

Corrective Action: Enabling Cluster Lockdown

#(C) Enable Cluster Lockdown. (Correct Answer)

* Cluster Lockdown Mode restricts password-based SSH access and forces key-based authentication.

* This prevents users from logging into CVMs using passwords, enhancing cluster security.

* To enable Cluster Lockdown:

* Go to Prism Central or Prism Element.

* Navigate to Settings # Security # Cluster Lockdown.

* Enable Cluster Lockdown Mode.

Evaluating the Other Answer Choices

#(A) Rename the nutanix user. (Incorrect)

* The nutanix user is a built-in system account required for cluster operations.

* Renaming the user will not prevent SSH access via password.

#(B) Block port 22 on the CVM firewall. (Incorrect)

* Blocking port 22 (SSH) will completely disable SSH access, including key-based authentication.

* This may break cluster management and troubleshooting operations.

#(D) Delete the nutanix user. (Incorrect)

* The nutanix user is a critical system account required for cluster functionality.

* Deleting the account will cause serious issues with cluster management.

Multicloud Infrastructure References & Best Practices

* Nutanix Security Best Practices:

* Always use key-based SSH authentication instead of password-based logins.

* Enable Cluster Lockdown Mode to enforce security policies.

* Regularly audit user access to ensure security compliance.

* Cluster Lockdown Benefits:

* Prevents unauthorized SSH access via passwords.

* Enforces public key authentication, reducing brute-force attack risks.

* Strengthens CVM security against potential exploits.

NEW QUESTION # 112

An administrator needs to modify an AHV VM to support a large number of concurrent network connections.

The VM has:

* 4 vCPUs

* 20 GB RAM

* OS: Microsoft Windows Server 2022

Which modification can improve network performance for network I/O-intensive applications?

- A. Enable AHV Turbo Technology.
- **B. Enable RSS VirtIO-Net Multi-Queue.**
- C. Add more RAM.
- D. Add more vCPUs.

Answer: B

Explanation:

Receive Side Scaling (RSS) VirtIO-Net Multi-Queue improves network performance by distributing network processing across multiple CPU cores.

* Option C (Enable RSS VirtIO-Net Multi-Queue) is correct:

* This setting reduces CPU bottlenecks by allowing multiple queues to handle network packets.

* It is essential for high-throughput network applications.

* Option A (Add more vCPUs) is incorrect:

* CPU resources are important, but without enabling RSS, additional vCPUs will not optimize network traffic distribution.

* Option B (Enable AHV Turbo Technology) is incorrect:

* AHV Turbo improves disk I/O, not network I/O.

* Option D (Add more RAM) is incorrect:

* RAM does not directly impact network performance.

References:

NEW QUESTION # 113

An administrator needs to configure NTP on Prism Central running on a Hyper-V cluster.

How should the administrator complete this task?

- **A. Add an external NTP server.**
- B. Add the DNS server IP.
- C. Add the IP of the Domain Controller.
- D. Add a server with DNS hostname.

Answer: A

Explanation:

Nutanix platform timing guidelines state that Prism Central requires accurate clock synchronization to ensure proper authentication, event logging, certificate validation, and cluster orchestration. The documentation details that "NTP must be configured to a reachable, reliable time source, and best practice is to configure Prism Central to use an external, independent, standards-based NTP server." Using a Domain Controller is acceptable only if the DC itself is properly synchronized with an authoritative external NTP source, but Nutanix strongly recommends specifying the external source directly in Prism Central for consistency across hypervisors and multi-cluster environments. Adding a DNS server IP is not time-related. Adding a hostname is valid only if it resolves to a functioning NTP server, but the question requires the correct method, not the acceptable syntax. Therefore, selecting an external NTP server is the correct and recommended configuration.

NEW QUESTION # 114

An administrator is tasked with optimizing a VM's storage to leverage compression features. Currently, vDisks are in a storage container default-container-91753272703541 that has no optimization activated. The administrator must move the VM's storage to the storage container Production.

What is the most efficient way to achieve this operation?

- A. Recreate VM in the Production storage container configuration and copy data.
- B. Recreate vDisk in the Production storage container configuration and copy data.
- C. Migrate vDisks to the Production storage container.

- **D. Migrate VM to the Production storage container.**

Answer: D

Explanation:

The most efficient way to move a VM's storage to a container that has different storage optimization policies (like compression) is to perform a VM migration to the target container. This operation ensures that all the VM's vDisks are moved to the destination container and allows leveraging the configured optimizations on the Production container.

From the Nutanix Enterprise Cloud Administration (ECA) course materials:

"VM migration to another storage container in Nutanix Prism Central is supported and can be performed with minimal disruption. When moving a VM to a new container, it inherits the storage optimization policies of that container, including compression, deduplication, and encryption." Furthermore:

"Migrations can be initiated at the VM level in Prism Central or Prism Element. This is the most streamlined method to ensure all vDisks for a VM are moved together, preserving data integrity and performance characteristics." Recreating the VM or vDisks would be cumbersome and require manual data copying, introducing potential risks and downtime.

NEW QUESTION # 115

.....

With our NCP-MCI-6.10 test prep, you don't have to worry about the complexity and tediousness of the operation. Our NCP-MCI-6.10 exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the NCP-MCI-6.10 quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. And our NCP-MCI-6.10 Exam Torrent make it easy for you to take notes on it so that your free time can be well utilized and you can often consolidate your knowledge. Everything you do will help you successfully pass the exam and get the card.
