Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q31-Q36):

NEW QUESTION # 31
You have an Azure Repos repository named repo1.
You delete a branch named features/feature11.
You need to recover the deleted branch.
Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 32
Your development team is building a new web solution by using the Microsoft Visual Studio integrated development environment

(IDE).

You need to make a custom package available to all the developers. The package must be managed centrally, and the latest version must be available for consumption in Visual Studio automatically.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a new feed in Azure Artifacts.
- B. Add the package URL to the NuGet Package Manager settings in Visual Studio.
- C. Add the package URL to the Environment settings in Visual Studio.
- D. Publish the package to a feed.
- E. Create a Git repository in Azure Repos.
- F. Upload a package to a Git repository.

Answer: A,B,D

Explanation:

B: By using your custom NuGet package feed within your Azure DevOps (previously VSTS) instance, you'll be able to distribute your packages within your organization with ease.

Start by creating a new feed.

A: We can publish, pack and push the built project to our NuGet feed.

E: Consume your private NuGet Feed

Go back to the Packages area in Azure DevOps, select your feed and hit "Connect to feed". You'll see some instructions for your feed, but it's fairly simple to set up.

Just copy your package source URL, go to Visual Studio, open the NuGet Package Manager, go to its settings and add a new source. Choose a fancy name, insert the source URL. Done.

Search for your package in the NuGet Package Manager and it should appear there, ready for installation.

Make sure to select the appropriate feed (or just all feeds) from the top right select box.

NEW QUESTION # 33

You manage the Git repository for a largeenterprise application.

You need to minimize the data size of the repository.

How should you complete the commands? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: --aggressive

Cleanup unnecessary files and optimize the local repository:

get gc --aggressive

Box 2: prune

Prune all unreachableobjects from the object database:

git prune
