

# High Pass-Rate Valid AWS-Solutions-Associate Test Answers | Easy To Study and Pass Exam at first attempt & Excellent Amazon AWS Certified Solutions Architect - Associate (SAA-C03)

## AWS Certified Solutions Architect test-with 100% verified answers-2022-2023

1. A Solutions Architect is developing a document sharing application and needs a **storage layer**. The storage should provide automatic **support for versioning** so that users can easily roll back to a previous version or recover a deleted account. Which AWS service will meet the above requirements?
  - a. **Amazon S3**
  - b. Amazon EBS
  - c. Amazon EFS
  - d. Storage Gateway VTL
2. You have an application running in us-west-2 requiring 6 EC2 Instances running at all times. With 3 Availability Zones in the region viz. us-west-2a, us-west-2b, and us-west-2c, which of the following deployments provides fault tolerance if an Availability Zone in us-west-2 becomes unavailable?  
Choose 2 answers from the options given below.
  - a. 2 EC2 Instances in us-west-2a, 2 EC2 Instances in us-west-2b, and 2 EC2 Instances in **us-west-2c**
  - b. 3 EC2 Instances in us-west-2a, 3 EC2 Instances in us-west-2b, and no EC2 Instances in us-west-2c
  - c. 4 EC2 Instances in us-west-2a, 2 EC2 Instances in us-west-2b, and 2 EC2 Instances in us-west-2c
  - d. 6 EC2 Instances in us-west-2a, 6 EC2 Instances in us-west-2b, and no EC2 Instances in us-west-2c
  - e. **3 EC2 Instances in us-west-2a, 3 EC2 Instances in us-west-2b, and 3 EC2 Instances in us-west-2c**
3. An application allows a manufacturing site to upload files. Each uploaded **3 GB** file is processed to extract metadata, and this process takes a few seconds per file. The frequency at which the uploads happen is **unpredictable**. For instance, there may be no updates for hours, followed by several files being uploaded concurrently. What architecture addresses this workload in the most **cost efficient** manner?
  - a. A. Use a Kinesis Data Delivery Stream to store the file. Use Lambda for processing.
  - b. B. Use an SQS queue to store the file, to be accessed by a fleet of EC2 Instances.
  - c. C. Store the file in an EBS volume, which can then be accessed by another EC2 Instance for processing.
  - d. **D. Store the file in an S3 bucket. Use Amazon S3 event notification to invoke a Lambda function for file processing.**
4. A company is migrating an on-premise 10TB MySQL database to AWS. With a business requirement that the replica lag be under 100 milliseconds, the company expects this database to quadruple in size. Which Amazon RDS engine meets the above requirements?
  - a. A. MySQL
  - b. B. Microsoft SQL Server
  - c. C. Oracle
  - d. **D. Amazon Aurora**
5. **For which** of the following workloads should a Solutions Architect consider using Elastic Beanstalk? Choose 2 answers from the options given below.
  - a. **A. A Web application using Amazon RDS**
  - b. B. An Enterprise Data Warehouse
  - c. C. A long running worker process

P.S. Free 2026 Amazon AWS-Solutions-Associate dumps are available on Google Drive shared by TrainingQuiz:  
[https://drive.google.com/open?id=16Xwv-rCLire6HJ9kG\\_5msojYNI7U78A5](https://drive.google.com/open?id=16Xwv-rCLire6HJ9kG_5msojYNI7U78A5)

Are you finding it challenging to take the AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) Certification Exam due to your busy schedule? Well, worry no more! Preparing for your AWS-Solutions-Associate exam has become convenient and hassle-free. You can now study from the comfort of your home, without needing to attend any classes or disrupt your existing schedule. With TrainingQuiz, you have access to a reliable and comprehensive source of AWS-Solutions-Associate Exam Questions for your AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) exam, ensuring your success in the test. Let's explore how TrainingQuiz can assist you in acing your real AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) quiz quickly and smoothly.

Our AWS-Solutions-Associate practice dumps enjoy popularity throughout the world. So with outstanding reputation, many exam candidates have a detailed intervention with our staff before and made a plea for help. We totally understand your mood to achieve success at least the AWS-Solutions-Associate Exam Questions right now, so our team makes progress ceaselessly in this area to make better AWS-Solutions-Associate study guide for you. We supply both goods which are our AWS-Solutions-Associate practice materials as well as high quality services.

## Amazon AWS-Solutions-Associate Updated Demo | AWS-Solutions-Associate Testdump

Our AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) PDF dumps format contains Amazon AWS-Solutions-Associate questions that are real and updated. You can print these AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) questions if you prefer an off-screen study. Otherwise, you can use this AWS-Solutions-Associate PDF document from any location via your laptops, tablets, and smartphones. Time restrictions do not halt AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) exam preparation as you can use AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) exam dumps pdf whenever you have free time.

### Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q386-Q391):

#### NEW QUESTION # 386

A meteorological startup company has a custom web application to sell weather data to its users online. The company uses Amazon DynamoDB to store its data and wants to build a new service that sends an alert to the managers of four internal teams every time a new weather event is recorded. The company does not want the new service to affect the performance of the current application. What should a solutions architect do to meet these requirements with the LEAST amount of operational overhead?

- A. Enable Amazon DynamoDB Streams on the table. Use triggers to write to a single Amazon Simple Notification Service (Amazon SNS) topic to which the teams can subscribe.
- B. Add a custom attribute to each record to flag new items. Write a cron job that scans the table every minute for items that are new and notifies an Amazon Simple Queue Service (Amazon SQS) queue to which the teams can subscribe.
- C. Use DynamoDB transactions to write new event data to the table. Configure the transactions to notify internal teams.
- D. Have the current application publish a message to four Amazon Simple Notification Service (Amazon SNS) topics. Have each team subscribe to one topic.

**Answer: A**

Explanation:

Explanation

The best solution to meet these requirements with the least amount of operational overhead is to enable Amazon DynamoDB Streams on the table and use triggers to write to a single Amazon Simple Notification Service (Amazon SNS) topic to which the teams can subscribe. This solution requires minimal configuration and infrastructure setup, and Amazon DynamoDB Streams provide a low-latency way to capture changes to the DynamoDB table. The triggers automatically capture the changes and publish them to the SNS topic, which notifies the internal teams.

#### NEW QUESTION # 387

A company hosts an application on AWS Lambda functions that are invoked by an Amazon API Gateway API. The Lambda functions save customer data to an Amazon Aurora MySQL database. Whenever the company upgrades the database, the Lambda functions fail to establish database connections until the upgrade is complete. The result is that customer data is not recorded for some of the event. A solutions architect needs to design a solution that stores customer data that is created during database upgrades. Which solution will meet these requirements?

- A. Store the customer data in an Amazon Simple Queue Service (Amazon SQS) FIFO queue. Create a new Lambda function that polls the queue and stores the customer data in the database.
- B. Persist the customer data to Lambda local storage. Configure new Lambda functions to scan the local storage to save the customer data to the database.
- C. Provision an Amazon RDS proxy to sit between the Lambda functions and the database. Configure the Lambda functions to connect to the RDS proxy.
- D. Increase the run time of the Lambda functions to the maximum. Create a retry mechanism in the code that stores the customer data in the database.

**Answer: A**

Explanation:

<https://www.learnaws.org/2020/12/13/aws-rds-proxy-deep-dive/>

RDS proxy can improve application availability in such a situation by waiting for the new database instance to be functional and maintaining any requests received from the application during this time. The end result is that the application is more resilient to issues.

with the underlying database.

This will enable solution to hold data till the time DB comes back to normal. RDS proxy is to optimally utilize the connection between Lambda and DB. Lambda can open multiple connection concurrently which can be taxing on DB compute resources, hence RDS proxy was introduced to manage and leverage these connections efficiently.

#### NEW QUESTION # 388

A company is hosting its website by using Amazon EC2 instances behind an Elastic Load balancer across multiple Availability Zones. The instances run in an EC2 Scaling group. The website uses Amazon Elastic Block Store (Amazon EBS) volume to store product manuals for users to download. The company updates the product content often, so new instances launched by the Auto Scaling group often have data. It can take to 30 minutes for the new instances to receive all the updates. The updates also require the EBS volumes to be resized during business hours.

The company wants to ensure that the product manuals are always up to data on all instances and that the architecture adjusts quickly to increased user demand. A solutions architect needs to meet these requirements without causing the company to update its application code or adjust its website. What should the solutions architect do to accomplish this goal?

- A. Store the product manuals in an Amazon S3 bucket. Redirect the downloads to this bucket.
- B. Store the product manuals in an EBS volume. Mount that volume to the EC2 instances.
- C. Store the product manuals in an Amazon S3 Standard-Infrequent Access (S3 Standard-IA) bucket. Redirect the downloads to this bucket.
- **D. Store the product manuals in an Amazon Elastic File System (Amazon EFS) volume. Mount that volume to the EC2 instances.**

**Answer: D**

#### NEW QUESTION # 389

A company has AWS Lambda functions that use environment variables. The company does not want its developers to see environment variables in plaintext.

Which solution will meet these requirements?

- A. Configure SSL encryption on the Lambda functions to use AWS CloudHSM to store and encrypt the environment variables.
- B. Deploy code to Amazon EC2 instances instead of using Lambda functions.
- C. Create a certificate in AWS Certificate Manager (ACM). Configure the Lambda functions to use the certificate to encrypt the environment variables.
- **D. Create an AWS Key Management Service (AWS KMS) key. Enable encryption helpers on the Lambda functions to use the KMS key to store and encrypt the environment variables.**

**Answer: D**

Explanation:

AWS Lambda supports encrypting environment variables at rest using AWS KMS. You can use encryption helpers (or Lambda's built-in support) to encrypt sensitive environment variable values using a KMS key.

These encrypted variables are not visible in plaintext to developers, either in the console or when running the code.

AWS Documentation Extract:

"AWS Lambda automatically encrypts environment variables at rest. For additional security, you can use AWS KMS keys and encryption helpers to encrypt environment variables, ensuring they are never exposed in plaintext." (Source: AWS Lambda documentation, Environment Variables Security) A: Does not address the issue (and adds more management overhead).

B, C: There is no native support for environment variable encryption via CloudHSM or ACM.

Reference: AWS Certified Solutions Architect - Official Study Guide, Lambda Security Best Practices.

#### NEW QUESTION # 390

A company is reviewing a recent migration of a three-tier application to a VPC. The security team discovers that the principle of least privilege is not being applied to Amazon EC2 security group ingress and egress rules between the application tiers.

What should a solutions architect do to correct this issue?

- A. Create security group rules using the VPC CIDR blocks as the source or destination.
- B. Create security group rules using the subnet CIDR blocks as the source or destination.

- C. Create security group rules using the instance ID as the source or destination.
- **D. Create security group rules using the security group ID as the source or destination.**

**Answer: D**

## NEW QUESTION # 391

.....

In order to further strengthen your confidence to buy the AWS-Solutions-Associate Training Materials of us, we offer you 100% money back guarantee in case you fail the exam. The money will be refund to your account and no extra questions will be asked. Additionally, AWS-Solutions-Associate exam braindumps of us have helped many candidates pass the exam successfully with their high-quality. And we have professional technicians examine the update every day, and once we have new version, our system will send the latest version to your email automatically.

**AWS-Solutions-Associate Updated Demo:** <https://www.trainingquiz.com/AWS-Solutions-Associate-practice-quiz.html>

They can compile the most professional AWS-Solutions-Associate guide torrent materials based on the latest information & past experience, Because we think our candidates must want to practice the exam material as soon as possible, so our candidates can receive the mail about our AWS-Solutions-Associate: AWS Certified Solutions Architect - Associate (SAA-C03) actual test questions in ten minutes after you complete your purchase, you can practice the AWS-Solutions-Associate test training dumps immediately after the candidates land our website, Our goal is to aid your preparation of the AWS-Solutions-Associate exam.

In engineering, incorporating sustainability into products, processes, AWS-Solutions-Associate technology systems, and services generally means integrating environmental, economic, and social factors in the evaluation of designs.

## Free PDF Quiz 2026 Amazon Updated Valid AWS-Solutions-Associate Test Answers

Understanding how to work with text data in AWS-Solutions-Associate Study Tool Python is important when your dataset has text data that needs to be processed, They can compile the most professional AWS-Solutions-Associate Guide Torrent materials based on the latest information & past experience.

Because we think our candidates must want to practice the exam material as soon as possible, so our candidates can receive the mail about our AWS-Solutions-Associate: AWS Certified Solutions Architect - Associate (SAA-C03) actual test questions in ten minutes after you complete your purchase, you can practice the AWS-Solutions-Associate test training dumps immediately after the candidates land our website.

Our goal is to aid your preparation of the AWS-Solutions-Associate exam, To this end, the AWS Certified Solutions Architect - Associate (SAA-C03) exam dumps have summarized some types of questions in the qualification examination, so that AWS-Solutions-Associate Study Tool users will not be confused when they take part in the exam, to have no emphatic answers.

Passing the AWS-Solutions-Associate real exam test would be easy as long as you can guarantee 20 to 30 hours learning with our AWS-Solutions-Associate exam practice torrent, and your certificate is going to be a catalyst toward a brighter career.
