#### **NEW QUESTION # 154**

Aw computing wants to prevent user from updating the Account Annual Revenue field to be a negative value or an amount more than \$100 billion.

How should an administrator accomplish this request?

- A. Build a scheduled report displaying Account with Account revenue that is negative or greater than 100 billion.
- B. Make the Account Revenue field required on the page layout.
- C. Create a validation rule that displays an error if Account revenue is below 0 or greater than 100 billion.
- D. Enable the Account Revenue limits in setup, with 0 as minimum and 100 billion as maximum

**Answer: C**

Explanation:

A validation rule is a tool that allows administrators to enforce data quality and integrity by preventing users from saving records that do not meet certain criteria or conditions. For example, a validation rule can display an error message if a user enters an invalid value in a field. In this case, the administrator can create a validation rule on the account object that displays an error if the account annual revenue field is below 0 or greater than 100 billion.
