QUESTION 1

Complete the sentence.

The Architecture Landscape is divided into levels known as _____.

- A. Gaps Plateaus, and Target Architectures
- B. Baseline, Transition and To Be Architectures
- C. Segment Strategic and Capability Architectures
- D. Transitional Complete and incremental Architectures

Answer: C

Explanation:

The Architecture Landscape is divided into levels known as Segment Strategic and Capability Architectures. These levels correspond to different scopes and purposes of architectures within an enterprise. Segment Architectures are architectures that address specific business units, functions, or processes within an enterprise. Strategic Architectures are architectures that provide a high-level view of the enterprise's vision, goals, and direction. Capability Architectures are architectures that address specific business capabilities or services that span multiple segments or domains.

QUESTION 2

Which of the following supports the need to govern Enterprise Architecture?

- A. The Architecture Project mandates the governance of the target architecture
- B. The TOGAF standard cannot be used without executive governance
- C. Best practice governance enables the organization to control value realization
- D. The Stakeholders preferences may go beyond the architecture project scope and needs control

Answer: C

Explanation:

This statement best supports the need to govern Enterprise Architecture. Best practice governance enables the organization to control value realization by ensuring that architectures are aligned with the enterprise's strategy and objectives, meet the quality and performance requirements, and deliver the expected benefits and outcomes. The Architecture Project does not mandate the governance of the target architecture, but rather follows the governance framework established by the enterprise. The TOGAF standard can be used without executive governance, but it is recommended that executive sponsorship and support are obtained for successful architecture development and transition. The Stakeholders preferences may go beyond the architecture project scope and need control, but this is not the primary reason for governing Enterprise Architecture.

QUESTION 3

Which section of the TOGAF template for Architecture Principles should describe the relationship to other principles?

Many candidates ask us if your OGEA-103 original questions are really valid, if our exam file is really edited based on first-hand information & professional experts and if your OGEA-103 original questions are really 100% pass-rate. Maybe you have a bad purchase experience before. I want to know that if you chose providers attentively before. Hereby, I can assure you that please rest assured all we guaranteed will be achieved. We are a legal authorized company which provides valid OGEA-103 Original Questions more than 6 years and help thousands of candidates clear exams and obtain certification every year.

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The OGEA-103 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of OGEA-103 Quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam exam dumps, better meet the needs of users of various kinds of cultural level.

OGEA-103 Valid Exam Pdf & OGEA-103 Reliable Dumps

As the old saying goes, Rome was not built in a day. For many people, it's no panic passing the OGEA-103 exam in a short time. Luckily enough, as a professional company in the field of OGEA-103 practice questions, our products will revolutionize the issue. The OGEA-103 Study Materials that our professionals are compiling which contain the most accurate questions and answers will effectively solve the problems you may encounter in preparing for the OGEA-103 exam.

The Open Group Architecture Framework (TOGAF) is a well-known and widely adopted framework for enterprise architecture. It provides a comprehensive approach to designing, planning, implementing, and managing an enterprise architecture. TOGAF certification is highly valued and sought after by professionals in the field of enterprise architecture. The Open Group offers several levels of certification, including the OGEA-103 Exam, which combines Part 1 and Part 2 of the TOGAF Enterprise Architecture certification.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

Complete the following sentence. In the ADM documents which are under development and have not undergone any formal review and approval process are _____.

- A. Known as "Version 0.1"
- B. In between phases
- C. Called "draft"
- D. Invalid

Answer: C

Explanation:

In the ADM documents which are under development and have not undergone any formal review and approval process are called "draft". This indicates that they are subject to change and refinement as the architecture development progresses. Reference: The TOGAF Standard | The Open Group Website, Section 4.2.5 Architecture Deliverables.

NEW QUESTION # 26

Which of the following statements about architecture partitioning are correct*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 1 & 4
- B. 2 & 4
- C. 1 & 3
- D. 2 & 3

Answer: C

Explanation:

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture.

Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries. Reference: The TOGAF Standard | The Open Group Website, Section 2.5 Architecture Partitioning.

NEW QUESTION # 27

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Which deliverables match these descriptions?

- A. 1 Architecture Principles - 2 Architecture Requirements Specification - 3 Request for Architecture Work - 4 Statement of Architecture Work
- B. 1 Architecture Requirements Specification - 2 Request for Architecture Work - 3 Statement of Architecture Work - 4 Architecture Principles
- C. 1 Request for Architecture Work - 2 Statement of Architecture Work - 3 Architecture Principles - 4 Architecture Requirements Specification
- D. 1 Statement of Architecture Work - 2 Architecture Principles - 3 Architecture Requirements Specification - 4 Request for Architecture Work

Answer: C

Explanation:

The Request for Architecture Work is a deliverable that is sent from the sponsor and triggers the start of an architecture development cycle. It defines the scope, budget, schedule, and deliverables for a specific architecture project. The Statement of Architecture Work is a deliverable that is produced by the architect and defines the approach and resources needed to complete an architecture project. It forms the basis of a contractual agreement between the sponsor and the architecture organization. The Architecture Principles are a deliverable that is produced by the architect and defines the general rules and guidelines for the architecture work. They reflect the business principles, business goals, and business drivers of the organization. The Architecture Requirements Specification is a deliverable that is produced by the architect and defines the requirements that govern the architecture work. It covers both functional and non-functional requirements as well as constraints and assumptions.

NEW QUESTION # 28

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2and3
- B. 3and4
- C. 1and4
- D. 1and2

Answer: D

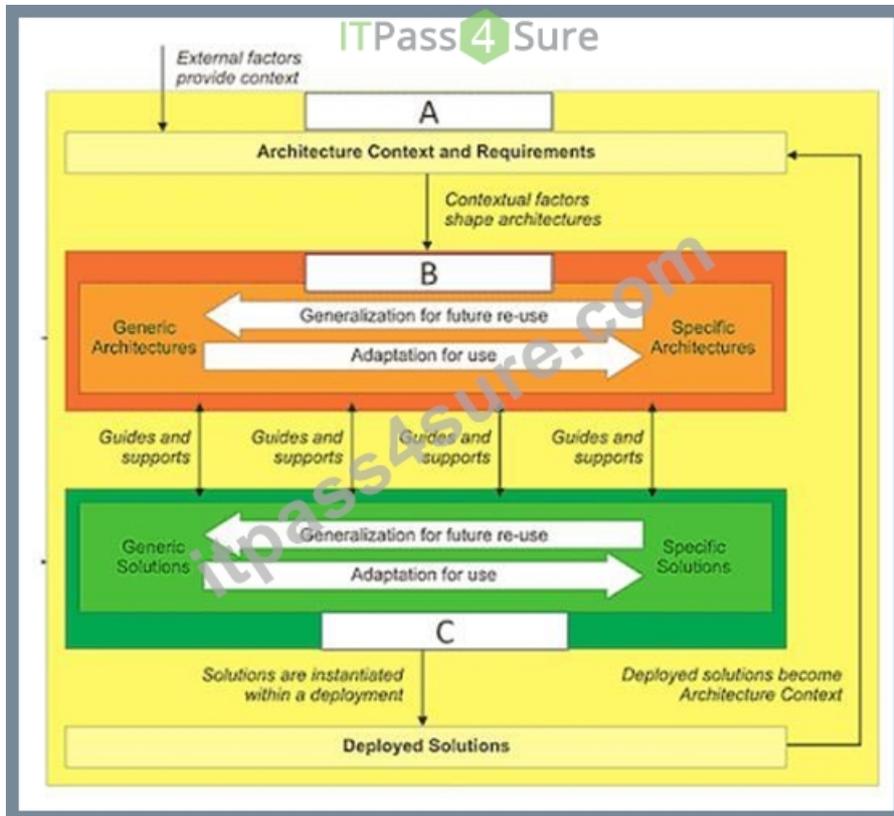

Explanation:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they

emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect. The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 29: Architecture Governance

NEW QUESTION # 29

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- **B. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- C. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- D. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture

Answer: B

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. References:
