Reliable H19-301_V3.0 Braindumps & H19-301_V3.0 Reliable Braindumps Sheet

Many customers may doubt the quality of our Huawei H19-301_V3.0 learning quiz since they haven't tried them. But our H19-301_V3.0 training engine is reliable. What you have learnt on our HCSA-Presales-IP Network Certification V3.0 H19-301_V3.0 Exam Materials are going through special selection. The core knowledge of the real exam is significant.

Huawei HCSA-Presales-IP Network Certification V3.0 Sample Questions (Q54-Q59):

NEW QUESTION # 54

MACsec is an important feature to ensure security and reliability. Which of the following routers can support MACsec?

- A. NetEngine 8000 MIC
- B. NetEngine 8000 M6
- C. NetEngine 8000 M1A
- D. NetEngine 8000 F1A

Answer: B,C,D

NEW QUESTION # 55

Huawei keeps innovating and advancing datacom technologies, with 26 years of expertise. Huawei has more than 11,000 R&D staff.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Huawei has been a leader in the telecommunications and networking industry for over two decades. The company invests heavily in research and development (R&D), with over 11,000 R&D staff dedicated to advancing data communication technologies. This extensive R&D effort has enabled Huawei to innovate across various domains, including routing, switching, wireless, and security. The claim aligns with Huawei's official statements about its R&D capabilities and commitment to technological advancement.

NEW QUESTION # 56

The Adaptive Security Engine (ASE) is used to dynamically allocate CPU resources to service modules, maximizing resource utilization. In addition, component-based function delivery is available.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Huawei's Adaptive Security Engine (ASE) is a key feature in its security products, such as firewalls. ASE dynamically allocates CPU resources to different service modules (e.g., firewall, intrusion prevention, antivirus) based on real-time traffic demands. This ensures optimal resource utilization and performance.

Additionally, ASE supports component-based function delivery, allowing administrators to enable or disable specific security features as needed. This flexibility enhances scalability and reduces unnecessary resource consumption.

The statement accurately describes the functionality of ASE, making it TRUE.

NEW QUESTION # 57

Which product of Arista is similar to CE12800?

- A. 0
- B. 1
- C. 2

- D. 3

Answer: A

NEW QUESTION # 58

In order to simplify Huawei many access switches network configuration, we need to use dedicated stack ports or stack cards with iStack technology to support.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

* Understanding iStack Technology:

* iStack is Huawei's stacking technology that allows multiple switches to be managed as a single logical device. This simplifies network configuration, management, and troubleshooting.

* Dedicated Stack Ports or Stack Cards:

* To enable iStack functionality, Huawei switches require either dedicated stack ports or stack cards. These ports/cards facilitate high-speed interconnection between stacked switches.

* Benefits of iStack:

* Simplifies network topology by reducing the number of managed devices.

* Enhances scalability and reliability through unified management.

* Conclusion: The statement is TRUE because dedicated stack ports or stack cards are required to support iStack technology.
