ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q134-Q139):

NEW QUESTION # 134
Which of the following statements best characterizes the relationship between a requirements engineer and a stakeholder in the role of a tester? (1 Point)

- A. The stakeholder monitors the work of the requirements engineer.
- B. The output from the requirements engineer is managed by the stakeholder.
- C. The stakeholder delivers input for the requirements engineer.
- D. The requirements engineer delivers input for the work of the stakeholder.
- E. The work of the requirements engineer is not related to the role of the stakeholder.

Answer: D

NEW QUESTION # 135
Choose the right sentence regarding glossaries.

- A. The glossary should be managed and maintained in a decentralised manner.
- B. All the other options are wrong.
- C. The usage of a glossary should be elective.
- D. A good glossary should contain all items relevant for the system, but not everyday terms.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The handbook advises that a glossary be centrally managed by an identified owner or small team to ensure consistency and controlled updates; decentralised ownership easily leads to divergence, so A is wrong. To realize its benefits, glossary use must be mandatory-documents should be checked against it-so B is incorrect. Everyday words that receive a special meaning in the project (e.g., "customer", "case") must be included, so C also fails. Therefore, the only correct choice is that all other statements are wrong.

NEW QUESTION # 136
Which of the following is a major source for requirements?

- A. Documents
- B. Regulations
- C. Constraints
- D. Elicitation

Answer: A

NEW QUESTION # 137
Choose the correct sentence about system context.

- A. It is synonymous with system environment.

- B. It is synonymous with system boundary.
- C. It is a part of the system environment.
- D. It is a part of the system boundary.

Answer: C

NEW QUESTION # 138

One activity in managing requirements includes prioritization of the requirements. Which of the following criteria is not a sensible criterion for prioritization? (1 Point)

- A. The effort for the validation of the requirements
- B. The costs resulting from the implementation of the requirements
- C. The influence on the overall success of the business
- D. The impact on the existing operational system (operating environment)
- E. Which requirements must be implemented in which release

Answer: A
