and opportunities. By passing Nonprofit-Cloud-Consultant Exam, candidates can demonstrate their proficiency in Salesforce Nonprofit Cloud and their commitment to helping nonprofits achieve their mission.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q105-Q110):

NEW QUESTION # 105

A user at a nonprofit is trying to run a mailing list report on a campaign using the NPSP Household Mailing List button. They receive an error saying, "the data you are trying to access is unavailable." The button works as expected for the system administrator. What should the consultant advise to troubleshoot the issue?

- A. Check if the user has the View Reports in Public Folders system permission.
- **B. Check if the user has access to the Apex Class for Manage Households.**
- C. Check if the user has access to Households via Role hierarchy.
- D. Check if the Campaign ID filter in the Campaign Household Mailing List report is unlocked.

Answer: B

Explanation:

The error message "the data you are trying to access is unavailable" when running a mailing list report on a campaign using the NPSP Household Mailing List button likely indicates a permissions issue. Since the button works as expected for the system administrator, the issue is probably related to user permissions.

Apex Class Access (A): The most likely cause is that the user does not have access to the necessary Apex Class for Manage Households. Ensure that the user has the required permissions to access and execute this Apex Class.

NEW QUESTION # 106

A nonprofit organization is using Cases in Salesforce for case management with its clients. The nonprofit organization wants to relate Cases for the same client to each other. How should the consultant advise the organization?

- **A. Use Case Hierarchy to connect all Cases for the client to a parent case and click on View Hierarchy to see the connected Cases**
- B. Create a custom field for an ID number and assign the same number to all cases that need to be connected
- C. Create a custom object that connects Cases to each other with two Case lookup fields and add a check box field to designate the parent Case.
- D. Use Case Comments and paste the URL of the first Case opened for the client in each new Case related to them.

Answer: A

NEW QUESTION # 107

A consultant is planning to use Accounting Subledger and migrate 20 years of donation data into NPSP for a nonprofit that receives more than 200,000 donations each year.

Which two features should the consultant consider implementing to improve search performance?

Choose 2 answers

- **A. Custom Index**
- B. Salesforce Optimizer
- C. Salesforce Object Search Language (SOSL)
- **D. Skinny Tables**

Answer: A,D

NEW QUESTION # 108

A Nonprofit Cloud Administrator enables Automatic Person Account Mailing Address Synchronization. Which object's related list should be added to Person Account record pages to see additional addresses?

- A. Address
- **B. Contact Point Address**
- C. Location

Answer: B

Explanation:

The Nonprofit Cloud has adopted the standard Salesforce Information Model for address management. In this model, the "Mailing Address" fields on the Person Account are merely a simplified view of a more robust underlying record.

When Automatic Person Account Mailing Address Synchronization is enabled, the system looks for the Contact Point Address (CPA) record marked as Is Primary and mirrors its values onto the Account header.

Managing Multiple Addresses:

* Contact Point Address Object: This is the "source of truth" for all locations associated with a person.

* The Related List: To manage a donor who has a "Home," "Office," and "Summer House" address, the consultant must add the Contact Point Addresses related list to the Person Account page layout.

* Adding Records: From this related list, users can create new addresses, specify the Address Type, and set Seasonal Dates.

* Synchronization: If a user changes the "Primary" flag from the Home CPA record to the Office CPA record, the synchronization feature will automatically update the Account's standard mailing fields to reflect the Office information.

Why other options are incorrect:

* Location (Option A): This object is part of Field Service or Facilities Management and is used for physical sites/buildings, not for constituent mailing addresses.

* Address (Option C): While there is a generic "Address" object, NPC specifically utilizes the Contact Point Address record, which is part of the "Contact Point" family of objects (alongside Email and Phone) used for communication preferences.

NEW QUESTION # 109

A major donor officer needs to capture wealth scoring to support individual cultivations.

How is this best represented in the NPSP?

- A. Using an AppExchange application, collect and rank other nonprofits' wealth information to understand how best to cultivate individual donations.
- **B. Using an AppExchange application, collect and rank donor prospects' wealth information to understand how to best cultivate individual donations.**
- C. Report on the total amount of an individual's donations summarized on their Contact record and rank it against donations to the nonprofit by other individual donors to best cultivate individual donations.
- D. Report on the total amount of donations received by the nonprofit in the past year, and rank it against peer institutions to best cultivate individual donations.

Answer: B

Explanation:

To capture and analyze wealth scoring for donors in Salesforce, leveraging an AppExchange application is the most effective approach. These applications can provide comprehensive wealth data and insights to support donor cultivation efforts. Here's how to do it:

* Identify Suitable AppExchange Applications:

* Search the Salesforce AppExchange for wealth screening and donor prospecting tools (e.g., WealthEngine, DonorSearch).

* Install the Application:

* Follow the installation instructions provided by the selected application.

* Ensure necessary permissions and configurations are set up.

* Configure Wealth Scoring:

* Set up the application to pull in wealth data for your donor contacts.

* Use the provided features to rank and score donors based on their wealth data.

* Integrate with NPSP:

* Ensure the wealth data integrates with your existing NPSP setup.

* Create reports and dashboards to visualize and analyze donor wealth information.

"WealthEngine for Salesforce" on AppExchange: WealthEngine

"DonorSearch for Salesforce" on AppExchange: DonorSearch
