## Tableau Certified Data Analyst 認定 TDA-C01 試験問題 (Q168-Q173):

### 質問 # 168

You have a database that includes field named sales, City and Region.

You have the following chart that shows the number of sales made in different cities.

You want to dynamically show the corresponding region when users hover their mouse over any of the bars.

What should you do?

- A. Right-click a in the chat, select Annotate and then select Mark.
- B. Edit the aliases for City.
- C. Drag Region to Tooltip on the Marks card
- D. Right-click a bar in the chart select Mark Label and then select Always show.

正解: C

解説:

To show the corresponding region when users hover their mouse over any of the bars, you need to drag Region to Tooltip on the Marks card. This will add Region as a field in the tooltip text that appears when users hover over a mark. You can also customize the tooltip text by editing it in the Tooltip dialog box. Reference: [https://help.tableau.com/current/pro/desktop/en-us/buildmanual\\_shelves.htm](https://help.tableau.com/current/pro/desktop/en-us/buildmanual_shelves.htm) [https://help.tableau.com/current/pro/desktop/en-us/formatting\\_tooltips.htm](https://help.tableau.com/current/pro/desktop/en-us/formatting_tooltips.htm)

### 質問 # 169

You have a dashboard that contains confidential information about patients health. The data needs to always be up to date for a team of healthcare workers How should you share me dashboard with the healthcare workers?

- A. Publish the dashboard to Tableau Public
- B. Publish the dashboard to Tableau Server
- C. Print the dashboard to PDF
- D. Export the dashboard as a .twbx

正解: B

解説:

To share a dashboard that contains confidential information about patients health and needs to always be up to date for a team of healthcare workers, you should publish it to Tableau Server. This will allow you to control who can access and interact with your dashboard, as well as schedule automatic refreshes of your data source or extract. Publishing to Tableau Public would expose your data to anyone on the internet, printing to PDF would not update your data, and exporting as a .twbx would require sending a large file that might not be compatible with other versions of Tableau. References:

[https://help.tableau.com/current/pro/desktop/en-us/publish\\_workbooks\\_share.htm](https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_share.htm)

[https://help.tableau.com/current/pro/desktop/en-us/publish\\_workbooks\\_tableauserver.htm](https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_tableauserver.htm) When sharing sensitive and confidential information that needs to be kept up-to-date, such as patient health data for a team of healthcare workers, the best practice is to publish the dashboard to Tableau Server. Tableau Server is designed for secure, controlled access and can be configured to ensure that data is refreshed as needed. Publishing to Tableau Public is not secure for confidential data, printing to PDF or exporting as a .twbx does not allow for live data updates.

### 質問 # 170

You connect to a database server by using Tableau Prep. The database server has a data role named Role1.

You have the following field in the data.

You need to apply the Role1 data role to the Material field.

Which two actions should you perform? Choose two.

- A. From the More actions menu of Materials, filter the selected values.
- B. From the More actions menu of Materials, select Valid in the Show values section.
- C. From the More actions menu of Materials, select Group Values, and then select Spelling.

- D. For the data type of the Material field, select Custom, and then select Role1.

正解: C、D

解説:

To apply a custom data role to a field, you need to select the data type of the field and then choose the data role from the list of available roles. This will validate the values in the field against the data role and mark any invalid values with a red exclamation mark. To fix the invalid values, you can use the Group Values option and select the Spelling algorithm, which will group values that are close in spelling and replace them with the most frequent value in the group. This will help you standardize the values in the Material field and match them with the Role1 data role. References: The information is based on the following sources:

\* Use Data Roles to Validate your Data - Tableau

\* New in Tableau Prep: Automatically identify data quality issues with Data Roles

#### 質問 # 171

You have a line chart on a worksheet.

You want to add a comment to March 2020 as shown in the following visualization.

What should you do?

- A. Annotate March 2020
- B. Drag the growth rate to Text on the Marks card
- C. Enable captions
- D. Add a tooltip

正解: A

解説:

To add a comment to March 2020 on a line chart, you need to annotate that mark. You can right-click on the mark and select Annotate > Mark from the menu. This will open a dialog box where you can type your comment and format it as you like. You can also drag and drop the annotation to position it on the worksheet.

Dragging the growth rate to Text on the Marks card will add a label to every mark on the line chart, enabling captions will show a description of the worksheet at the bottom, and adding a tooltip will show a text box when users hover over a mark. References:

<https://help.tableau.com/current/pro/desktop/en-us>

[/formatting\\_annotations.htm](https://help.tableau.com/current/pro/desktop/en-us) <https://help.tableau.com/current/pro/desktop/en-us>

[/formatting\\_annotations\\_create.htm](https://help.tableau.com/current/pro/desktop/en-us)

To add a comment to a specific point on a line chart, such as March 2020 in the provided visualization, you would use the 'Annotate' feature. Right-clicking on the data point for March 2020 and selecting 'Annotate' allows you to add a text annotation directly to the chart, which can be used to highlight and comment on that particular data point.

#### 質問 # 172

You need the top 10 values to appear in a different color. The top 10 values must be colored dynamically.

What should you do?

- A. Create a group field that groups the top 10 values into one group and the rest of the values into another group. Drag the group field to Color on the Marks card.
- B. Select the top 10 bars, create a set, and then drag the set to Color on the Marks card.
- C. Create a set that has a top 10 condition, and then drag the set to Color on the Marks card.
- D. Select the top 10 bars, and then change the color by selecting Color on the Marks card.

正解: C
