

Databricks-Certified-Data-Analyst-Associate

Trainingsunterlagen & Databricks-Certified-Data-Analyst-Associate Fragenkatalog

P.S. Kostenlose 2026 Databricks Databricks-Certified-Data-Analyst-Associate Prüfungsfragen sind auf Google Drive freigegeben von Zertpruefung verfügbar: <https://drive.google.com/open?id=1gmU8r4L8BJTWLeVrYuMlfw91o8cw6P9G>

Sind Sie neugierig, warum so viele Menschen die schwierige Databricks Databricks-Certified-Data-Analyst-Associate Prüfung bestehen können? Ich können Sie beantworten. Der Kunstgriff ist, dass Sie haben die Prüfungsunterlagen der Databricks Databricks-Certified-Data-Analyst-Associate von unsere Zertpruefung benutzt. Wir bieten Ihnen: reichliche Prüfungsaufgaben, professionelle Untersuchung und einjährige kostenlose Aktualisierung nach dem Kauf. Mit Hilfe der Databricks Databricks-Certified-Data-Analyst-Associate Prüfungsunterlagen können Sie wirklich die Erhöhung Ihrer Fähigkeit empfinden. Sie können auch das echte Zertifikat der Databricks Databricks-Certified-Data-Analyst-Associate erwerben!

Die Freude, der Erfolg mitbringt, ist riesig. Wir hoffen, dass die anspruchsvolle Software von uns Ihnen das Freude des Bestehens der Databricks Databricks-Certified-Data-Analyst-Associate mitbringen. Ihr Erfolg ist auch unsere Erfolg. Deshalb bemühen uns für Sie um Ihre Prüfungszertifizierung der Databricks Databricks-Certified-Data-Analyst-Associate. Wir tun unser Bestes, die Databricks Databricks-Certified-Data-Analyst-Associate Prüfungsunterlagen zu herstellen und den allseitigen Kundendienst zu bieten.

Databricks-Certified-Data-Analyst-Associate Prüfungsfragen

Prüfungsvorbereitungen, Databricks-Certified-Data-Analyst-Associate Fragen und Antworten, Databricks Certified Data Analyst Associate Exam

Alle IT-Fachleute sind mit der Databricks Databricks-Certified-Data-Analyst-Associate Zertifizierungsprüfung vertraut und träumen davon, ein Databricks-Certified-Data-Analyst-Associate Zertifikat zu bekommen. Die Databricks Databricks-Certified-Data-Analyst-Associate Zertifizierungsprüfung ist die höchste Zertifizierung. Sie werden einen guten Beruf haben. Haben Sie es? Diese Prüfung ist schwer zu bestehen. Das macht doch nichts. Mit den Schulungsunterlagen zur Databricks Databricks-Certified-Data-Analyst-Associate Zertifizierungsprüfung von Zertpruefung können Sie ganz einfach die Prüfung bestehen. Sie werden den Erfolg sicher erlangen.

Databricks Databricks-Certified-Data-Analyst-Associate Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Data Management: The topic describes Delta Lake as a tool for managing data files, Delta Lake manages table metadata, benefits of Delta Lake within the Lakehouse, tables on Databricks, a table owner's responsibilities, and the persistence of data. It also identifies management of a table, usage of Data Explorer by a table owner, and organization-specific considerations of PII data. Lastly, the topic it explains how the LOCATION keyword changes, usage of Data Explorer to secure data.

Thema 2	• Data Visualization and Dashboarding: Sub-topics of this topic are about of describing how notifications are sent, how to configure and troubleshoot a basic alert, how to configure a refresh schedule, the pros and cons of sharing dashboards, how query parameters change the output, and how to change the colors of all of the visualizations. It also discusses customized data visualizations, visualization formatting, Query Based Dropdown List, and the method for sharing a dashboard.
Thema 3	• SQL in the Lakehouse: It identifies a query that retrieves data from the database, the output of a SELECT query, a benefit of having ANSI SQL, access, and clean silver-level data. It also compares and contrasts MERGE INTO, INSERT TABLE, and COPY INTO. Lastly, this topic focuses on creating and applying UDFs in common scaling scenarios.
Thema 4	• Databricks SQL: This topic discusses key and side audiences, users, Databricks SQL benefits, complementing a basic Databricks SQL query, schema browser, Databricks SQL dashboards, and the purpose of Databricks SQL endpoints • warehouses. Furthermore, the delves into Serverless Databricks SQL endpoint • warehouses, trade-off between cluster size and cost for Databricks SQL endpoints • warehouses, and Partner Connect. Lastly it discusses small-file upload, connecting Databricks SQL to visualization tools, the medallion architecture, the gold layer, and the benefits of working with streaming data.
Thema 5	• Analytics applications: It describes key moments of statistical distributions, data enhancement, and the blending of data between two source applications. Moreover, the topic also explains last-mile ETL, a scenario in which data blending would be beneficial, key statistical measures, descriptive statistics, and discrete and continuous statistics.

Databricks Certified Data Analyst Associate Exam Databricks-Certified-Data-Analyst-Associate Prüfungsfragen mit Lösungen (Q41-Q46):

41. Frage

A data organization has a team of engineers developing data pipelines following the medallion architecture using Delta Live Tables. While the data analysis team working on a project is using gold-layer tables from these pipelines, they need to perform some additional processing of these tables prior to performing their analysis.

Which of the following terms is used to describe this type of work?

- A. Data testing
- B. Data blending
- C. Data enhancement
- **D. Last-mile ETL**
- E. Last-mile

Antwort: D

Begründung:

Last-mile ETL is the term used to describe the additional processing of data that is done by data analysts or data scientists after the data has been ingested, transformed, and stored in the lakehouse by data engineers. Last-mile ETL typically involves tasks such as data cleansing, data enrichment, data aggregation, data filtering, or data sampling that are specific to the analysis or machine learning use case. Last-mile ETL can be done using Databricks SQL, Databricks notebooks, or Databricks Machine Learning. Reference: Databricks - Last-mile ETL, Databricks - Data Analysis with Databricks SQL

42. Frage

Delta Lake stores table data as a series of data files, but it also stores a lot of other information.

Which of the following is stored alongside data files when using Delta Lake?

- A. Owner account information
- B. Table metadata, data summary visualizations, and owner account information
- C. Data summary visualizations
- D. None of these

- E. Table metadata

Antwort: E

Begründung:

Delta Lake stores table data as a series of data files in a specified location, but it also stores table metadata in a transaction log. The table metadata includes the schema, partitioning information, table properties, and other configuration details. The table metadata is stored alongside the data files and is updated atomically with every write operation. The table metadata can be accessed using the DESCRIBE DETAIL command or the DeltaTable class in Scala, Python, or Java. The table metadata can also be enriched with custom tags or user-defined commit messages using the TBLPROPERTIES or userMetadata options. Reference:

Enrich Delta Lake tables with custom metadata

Delta Lake Table metadata - Stack Overflow

Metadata - The Internals of Delta Lake

43. Frage

A data analyst creates a Databricks SQL Query where the result set has the following schema:

region STRING

number_of_customer INT

When the analyst clicks on the "Add visualization" button on the SQL Editor page, which of the following types of visualizations will be selected by default?

- A. IBar Chart
- B. There is no default. The user must choose a visualization type.
- C. Violin Chart
- D. Histogram
- E. Line Chart

Antwort: A

Begründung:

According to the Databricks SQL documentation, when a data analyst clicks on the "Add visualization" button on the SQL Editor page, the default visualization type is Bar Chart. This is because the result set has two columns: one of type STRING and one of type INT. The Bar Chart visualization automatically assigns the STRING column to the X-axis and the INT column to the Y-axis. The Bar Chart visualization is suitable for showing the distribution of a numeric variable across different categories. Reference:

Visualization in Databricks SQL, Visualization types

44. Frage

How can a data analyst determine if query results were pulled from the cache?

- A. Go to the SQL Warehouse (formerly SQL Endpoints) tab and click on Cache. The Cache file will show the contents of the cache.
- B. Go to the Query History tab and click on the text of the query. The slideout shows if the results came from the cache.
- C. Go to the Queries tab and click on Cache Status. The status will be green if the results from the last run came from the cache.
- D. Go to the Alerts tab and check the Cache Status alert.
- E. Go to the Data tab and click Last Query. The details of the query will show if the results came from the cache.

Antwort: B

Begründung:

Databricks SQL uses a query cache to store the results of queries that have been executed previously. This improves the performance and efficiency of repeated queries. To determine if a query result was pulled from the cache, you can go to the Query History tab in the Databricks SQL UI and click on the text of the query. A slideout will appear on the right side of the screen, showing the query details, including the cache status. If the result came from the cache, the cache status will show "Cached". If the result did not come from the cache, the cache status will show "Not cached". You can also see the cache hit ratio, which is the percentage of queries that were served from the cache. Reference: The answer can be verified from Databricks SQL documentation which provides information on how to use the query cache and how to check the cache status. Reference link: Databricks SQL - Query Cache

45. Frage

Which of the following should data analysts consider when working with personally identifiable information (PII) data?

- A. Legal requirements for the area in which the analysis is being performed
- B. None of these considerations
- **C. All of these considerations**
- D. Legal requirements for the area in which the data was collected
- E. Organization-specific best practices for PII data

Antwort: C

Begründung:

Data analysts should consider all of these factors when working with PII data, as they may affect the data security, privacy, compliance, and quality. PII data is any information that can be used to identify a specific individual, such as name, address, phone number, email, social security number, etc. PII data may be subject to different legal and ethical obligations depending on the context and location of the data collection and analysis. For example, some countries or regions may have stricter data protection laws than others, such as the General Data Protection Regulation (GDPR) in the European Union. Data analysts should also follow the organization-specific best practices for PII data, such as encryption, anonymization, masking, access control, auditing, etc. These best practices can help prevent data breaches, unauthorized access, misuse, or loss of PII data. 46. Frage

.....

Manchmal muss man mit große Menge von Prüfungsaufgaben üben, um eine wichtige Prüfung zu bestehen. Die Databricks Databricks-Certified-Data-Analyst-Associate von uns hat diese Forderung gut erfüllt. Und mit den fachlichen Erklärungen können Sie besser die Antworten verstehen. Die Demo der Databricks Databricks-Certified-Data-Analyst-Associate von unterschiedlichen Versionen werden von uns gratis angeboten. Probieren Sie mal und wählen Sie die geeignete Version für Sie! Mit unserer gemeinsamen Arbeit werden Sie bestimmt die Databricks Databricks-Certified-Data-Analyst-Associate Prüfung erfolgreich bestehen!
