Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q534-Q539):

NEW QUESTION # 534
You plan to use Desired State Configuration (DSC) to maintain the configuration of a server that runs Windows Server 2022. The server must have the following features installed:
* A web server
* An email server
How should you complete the DSC configuration file? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
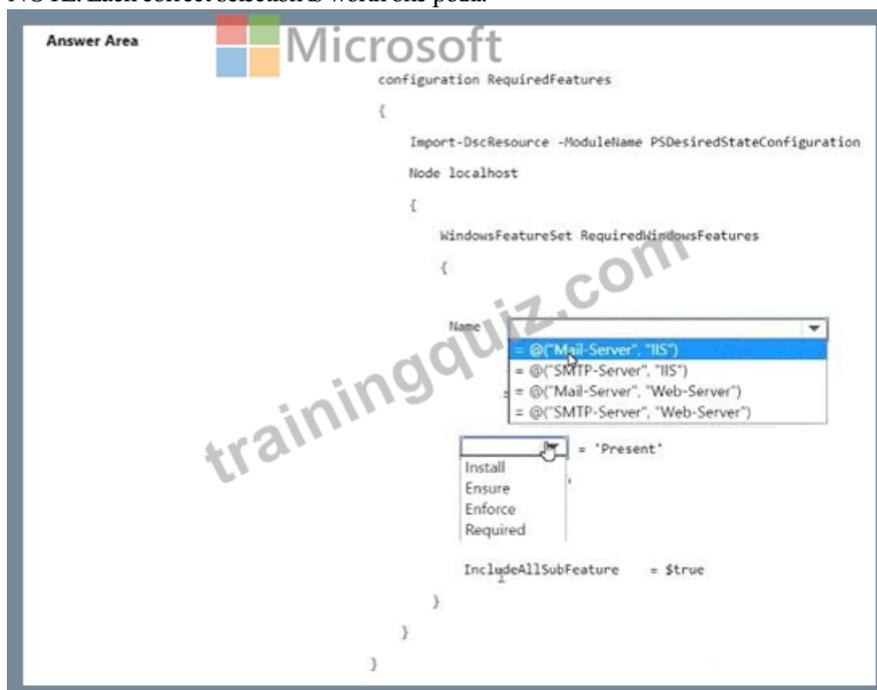

Answer:

Explanation:

Answer Area

```
configuration RequiredFeatures

{

        Import-DscResource -ModuleName PSDesiredStateConfiguration

        Node localhost

        {

                WindowsFeatureSet RequiredWindowsFeatures

                {

                        Name              ▼
                           = @("Mail-Server", "IIS")
                           = @("SMTP-Server", "IIS")
                           = @("Mail-Server", "Web-Server")
                           = @("SMTP-Server", "Web-Server")

                                          = 'Present'
                        Install
                        Ensure
                        Enforce
                        Required

                        IncludeAllSubFeature    = $true

                }

        }

}
```
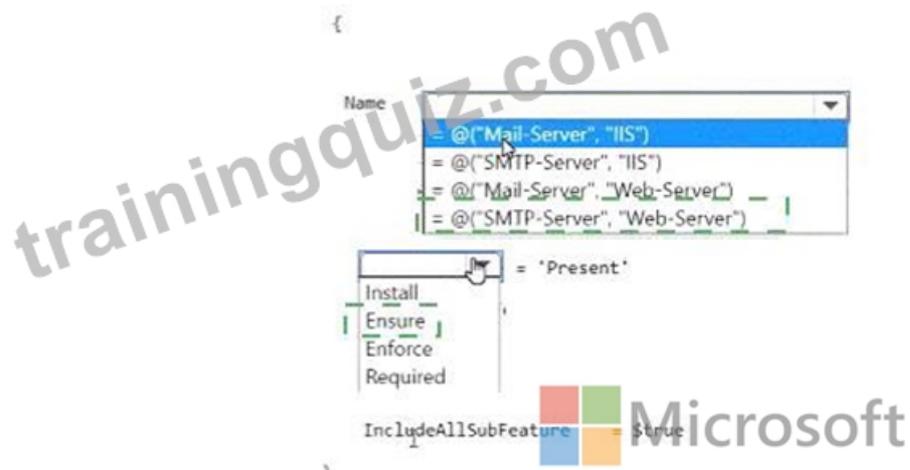

Explanation:

```
configuration RequiredFeatures
{

        Import-DscResource -ModuleName PSDesiredStateConfiguratio

        Node localhost

        {

                WindowsFeatureSet RequiredWindowsFeatures

                {

                        Name      = @("SMTP-Server", "Web-Server")   ▼

                        Ensure    ▼  = 'Present'

                        IncludeAllSubFeature    = $true

                }

        }

}
```

NEW QUESTION # 535

You need to increase the security of your team's development process.

Which type of security tool should you recommend for each stage of the development process? To answer, drag the appropriate security toots to the correct stages. Each security tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
https://docs.microsoft.com/en-us/azure/devops/migrate/security-validation-cicd-pipeline?view=azure-devops&vi So:
PR: Static Code Analysis
CI: Static Code Analysis
CD: PenTest

NEW QUESTION # 536
You have a project in Azure DevOpsnamed Project1. Project1 contains a published wiki.
You need to change the order of pages in the navigation pane of the published wiki in the Azure DevOps portal.
What should you do?

- A. Rename the pages in the navigation pane.
- B. Drag and drop the pages in the navigation pane.
- C. At the root of the wiki, create a file named order that defines the page hierarchy.
- D. At the root of the wiki, create a file named wiki.md that defines the page hierarchy.

Answer: B

Explanation:
Explanation
Reorder a wiki page
You can reorderpages within the wiki tree view to have pages appear in the order and hierarchy you want. You can drag-and-drop
a page title in the tree view to do the following operations:
Change the parent-child relationship of a page
Change the order of the page within the hierarchy
Reference:
https://docs.microsoft.com/en-us/azure/devops/project/wiki/add-edit-wiki

NEW QUESTION # 537
Your company a concerned that when developers introduce open source Libraries, it creates licensing compliance issues.
You need to add an automated process to the build pipeline to detect when common open source libraries are added to the code

base.
What should you use?

- A. Jenkins
- B. Microsoft Visual SourceSafe
- C. Black Duck
- D. Code Style

Answer: C

Explanation:
Secure and Manage Open Source Software
Black Duck helps organizations identify and mitigate open source security, license compliance and code-quality risks across application and container portfolios.
Black Duck Hub and its plugin for Team Foundation Server (TFS) allows you to automatically find and fix open source security vulnerabilities during the build process, so you can proactively manage risk. The integration allows you to receive alerts and fail builds when any Black Duck Hub policy violations are met.
Note: WhiteSource would also be a good answer, but it is not an option here.
