Are you still feeling distressed for expensive learning materials? Are you still struggling with complicated and difficult explanations in textbooks? Do you still hesitate in numerous tutorial materials? 1z0-1075-25 study guide can help you to solve all these questions. 1z0-1075-25 certification training is compiled by many experts over many years according to the examination outline of the calendar year and industry trends. 1z0-1075-25 Study Guide not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. 1z0-1075-25 guide torrent uses a very simple and understandable language, to ensure that all people can read and understand.

The Oracle expert team use their knowledge and experience to make out the latest short-term effective training materials. This training materials is helpful to the candidates. It allows you to achieve the desired results in the short term. Especially those who study 1z0-1075-25 while working, you can save a lot of time easily. Prep4cram's training materials are the thing which you most wanted.

Famous 1z0-1075-25 Training Quiz Bring You the Topping Exam Questions - Prep4cram

Our 1z0-1075-25 practice questions are on the cutting edge of this line with all the newest contents for your reference. Free demos are understandable and part of the 1z0-1075-25 exam materials as well as the newest information for your practice. And because that our 1z0-1075-25 Study Guide has three versions: the PDF, Software and APP online. So accordingly, we offer three versions of free demos for you to download.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

A Production Operator needs to load work order operation transactions from an external system into Manufacturing Cloud. What is the correct sequence of tasks to achieve this?

- A. Load data to data repository > Load file from UCM to interface table > Export file to UCM server > Process import operations transactions.
- **B. Load data to data repository > Export file to UCM server > Load file from UCM to interface table > Process import operations transactions.**
- C. Load data to data repository > Export file to UCM server > Process import operations transactions > Load file from UCM to interface table.
- D. Export file to UCM server > Load data to data repository > Process import operations transactions > Load file from UCM to interface table.

Answer: B

Explanation:

When loading work order operation transactions from an external system into Oracle Manufacturing Cloud, the correct sequence of tasks is:

- * Load data to the data repository : This step ensures the external data is available in Oracle Manufacturing Cloud.
- * Export file to UCM server : The data file is then exported to the Universal Content Management (UCM) server, which acts as a staging area for further processing.
- * Load file from UCM to interface table : The data from the UCM server is loaded into the appropriate interface table.
- * Process import operations transactions : Finally, the system processes the imported transactions and updates the work orders accordingly.

Incorrect sequences:

- * Options A, B, C do not follow the correct order, particularly around the interaction between the UCM server and the interface tables.

Oracle Manufacturing Cloud documentation on File-Based Data Import (FBDI) explains the necessary steps and sequence for loading work order transactions from external systems.

NEW QUESTION # 42

You create a work order, in which some of the operations have components with the Push supply type. While reporting material consumption on the Report Material Transaction page, you want the Push components to default whenever the operator selects Show Components.

Which setup task must you perform in the Manage Plant Parameters section to achieve this?

- A. Set Default Transaction Mode to Entered.
- **B. Set Default Transaction Mode to Work Definition.**
- C. Set Default Transaction Mode to AIL.
- D. Set Default Transaction Mode to Entered and Default Transaction Quantity to Work Definition.

Answer: B

Explanation:

To ensure that Push components are automatically defaulted when reporting material consumption on the Report Material Transaction page, you must configure the system to use the Work Definition as the default source for transactions.

- * Setting Default Transaction Mode to Work Definition ensures that the system automatically pulls the component list and quantities as defined in the work order or work definition when operators perform material transactions. This setting streamlines the material consumption process for Push supply type components.

Oracle Manufacturing Cloud 's " Plant Parameters " configuration guide explains how to set the Default Transaction Mode to manage material transactions efficiently, particularly when dealing with Push components.

NEW QUESTION # 43

In a Manufacturing Cloud implementation, users are finding it difficult to track information about work orders executed across various work centers.

Which three information types in the Work Order Traveler can help users in this situation?

- A. Item on-hand quantity
- **B. Product serial Information**
- C. Hard pegging of items
- **D. Work definition details**
- **E. Reservation against sales orders**

Answer: B,D,E

Explanation:

The Work Order Traveler in Oracle Manufacturing Cloud provides detailed information about work orders to help users track and manage work orders across various work centers. The following types of information are especially useful:

* Work definition details (D) : This provides detailed information about the operations and resources required to complete the work order, helping users understand the manufacturing process and requirements.

* Product serial information (E) : Tracking serial numbers for products is critical, especially in industries where traceability and product lifecycle management are important.

* Reservation against sales orders (A) : This information links work orders to specific sales orders, providing clarity on how the work order aligns with customer demand.

Incorrect options:

* Hard pegging of items (B) and Item on-hand quantity (C) are not typically tracked through the Work Order Traveler report, as this report focuses more on the work order 's execution rather than inventory management.

Oracle Manufacturing Cloud documentation on the Work Order Traveler report explains the different types of information provided to help users track work orders and manage production.

NEW QUESTION # 44

Which statement is NOT true about user-defined work order statuses?

- A. They are displayed on work order reports.
- **B. The system automatically updates user-defined work order statuses.**
- C. It is not recommended to update the name of the system status.
- D. All the new statuses are searchable so you can filter your job and manage the work order life cycle more easily.

Answer: B

Explanation:

User-defined work order statuses provide flexibility in managing the lifecycle of work orders in Oracle Manufacturing Cloud.

However, the following is not true :

* The system does not automatically update user-defined work order statuses . These statuses are manually updated by users to reflect the work order 's progress through custom-defined states.

Correct statements:

* Displayed on work order reports : User-defined statuses are visible in work order reports, allowing users to track the status of different orders.

* Name changes to system status : It is not recommended to alter system-defined status names as it could disrupt core system processes and workflows.

* Searchability of new statuses : User-defined statuses are searchable, making it easier to manage and track work orders.

Oracle Manufacturing Cloud guide explains that user-defined statuses are not automatically updated and require manual input for lifecycle management.

NEW QUESTION # 45

An employee is responsible for dealing with different manufacturing practices and processes, machines, tools, and equipment that turn raw material into a product.

Which seeded job role must you assign to this employee?

- A. Production Engineer
- B. Production Supervisor
- C. Manufacturing Supervisor
- **D. Manufacturing Engineer**
- E. Production Operator

Answer: D

Explanation:

In Oracle Manufacturing Cloud, the Manufacturing Engineer role is responsible for dealing with various manufacturing practices, processes, machines, tools, and equipment that transform raw materials into finished products. This role focuses on defining and managing production processes, resources, and operations in manufacturing plants.

* Manufacturing Engineer : This role involves creating and maintaining manufacturing processes, production resources, and work instructions. It ensures that products are manufactured efficiently and in compliance with quality standards.

Oracle Cloud documentation for " Manufacturing Engineer " describes this role as the primary one for handling manufacturing setups, process definitions, and equipment management in the system.

NEW QUESTION # 46

.....

The best valid and most accurate Oracle 1z0-1075-25 exam study material can facilitate your actual test and save your time and money. Generally, you are confused by various study material for 1z0-1075-25 preparation. Now, please pay attention to Prep4cram 1z0-1075-25 reliable study material, which is the best validity and authority training material for your preparation. The 1z0-1075-25 actual test will bring you full scores.

Reliable 1z0-1075-25 Braindumps Files: https://www.prep4cram.com/1z0-1075-25_exam-questions.html

Therefore, adopting our 1z0-1075-25 test dumps, especially the PDF version, has profound implications for you, Trust me, our 1z0-1075-25 test dumps will be helpful for your career, Oracle Test 1z0-1075-25 Study Guide Please don't worry about the purchase process because it's really simple for you, All these three Oracle 1z0-1075-25 exam questions formats contain the real and updated 1z0-1075-25 exam questions, We are sure that our 1z0-1075-25 updated questions will enable you to crack the Oracle 1z0-1075-25 test in one go.

This is so that you see an entire working configuration rather than the relevant 1z0-1075-25 segment for configuring a particular networking nuance, The following table describes the minor extension points covered in this article.

1z0-1075-25 Exam Resources & 1z0-1075-25 Best Questions & 1z0-1075-25 Exam Dumps

Therefore, adopting our 1z0-1075-25 Test Dumps, especially the PDF version, has profound implications for you, Trust me, our 1z0-1075-25 test dumps will be helpful for your career.

Please don't worry about the purchase process because it's really simple for you, All these three Oracle 1z0-1075-25 exam questions formats contain the real and updated 1z0-1075-25 exam questions.

We are sure that our 1z0-1075-25 updated questions will enable you to crack the Oracle 1z0-1075-25 test in one go.
