1z0-1057-25 Exam Quiz - Demo 1z0-1057-25 Test

The Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) is one of the popular exams of 1z0-1057-25. It is designed for Oracle aspirants who want to earn the Oracle Project Management Cloud 2025 Implementation Professional (1z0-1057-25) certification and validate their skills. The 1z0-1057-25 test is not an easy exam to crack. It requires dedication and a lot of hard work. You need to prepare well to clear the 1z0-1057-25 test on the first attempt. One of the best ways to prepare successfully for the 1z0-1057-25 examination in a short time is using real Oracle 1z0-1057-25 Exam Dumps.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q66-Q71):

NEW QUESTION # 66

Identify the valid approval group type applicable to Oracle Project Financial Management Cloud. (Choose the best answer.)

- A. Position
- B. Dynamic
- C. Flexfield
- D. Job
- E. Static

Answer: E

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/applications-common/19b/acia/define-approval-management.htm#FACIA3124477>

Topic Approval Groups

Each approval group includes a set of users that you configure to act on tasks in a certain pattern. Tasks can be defined to get routed to an approval group instead of an individual user. You can nest approval groups within approval groups.

You have two options for defining the group:

* Static: Select the specific users to include in the group.

* Dynamic: Provide the logic to use to determine the users in the group.

NEW QUESTION # 67

Identify three correct statements about the integration of Primavera P6 Enterprise Project Portfolio Management and Oracle Project Portfolio Management Cloud. (Choose three.)

- A. Projects and task definitions flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.
- B. Summarized actual quantity and cost flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.
- C. Billing events flow from Primavera P6 Enterprise Project Portfolio Management to Oracle Project Portfolio Management Cloud.
- D. Event completion flows from Primavera P6 Enterprise Project Portfolio Management to Oracle Project Portfolio Management Cloud.
- E. Project plans and progress flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.

Answer: A,B,D

Explanation:

Ref: https://docs.oracle.com/cd/E48434_01/fusionapps.1118/e49622/F1125394AN6D254.htm Primavera P6 Enterprise Project Portfolio Management and Oracle Fusion Project Portfolio Management: How They Work Together Use Oracle Fusion Project Integration Gateway to integrate Oracle Fusion Project Portfolio Management with Primavera P6 Enterprise Project Portfolio Management. The integration enables project accountants, project billing specialists, and executives to centrally perform project costing, billing, accounting, and executive reporting tasks in Oracle Fusion Project Portfolio Management while enabling each project manager to perform detailed project planning and scheduling in Primavera P6 Enterprise Project Portfolio Management.

Oracle Fusion Project Integration Gateway ensures data security, integrity, and efficiency by defining a set framework in which data is exported from and imported into Oracle Fusion Project Portfolio Management.

The following table and diagram provide an overview of the flow of information.

NEW QUESTION # 68

Which three file-based data imports are available for use in Oracle Project Portfolio Management Cloud?

- A. Project Tasks
- B. Project Budgets
- C. Project Billing Events
- D. Project Templates
- E. Capital Rate Schedule

Answer: A,B,C

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oeffp/toc.htm>

NEW QUESTION # 69

Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit. Why is he not able to see the transactions for the China business unit? (Choose the best answer.)

- A. The JOB role relevant to the China business unit is not assigned to the project accountant.
- B. The project accountant is not assigned to the external role that grants access to the China business unit.
- C. The China business unit is associated with a different legal entity than the US and UK business units.
- D. The US and UK business units are linked to different ledgers than the China business unit.

Answer: B

Explanation:

To access transactions for a business unit, the project accountant needs to be assigned to an external role that grants access to that business unit. The external role is defined by the security profile of the business unit and can be different for each business unit. The job role and the legal entity are not relevant for accessing transactions for a business unit. The ledger is relevant for accounting transactions, but not for project transactions. NEW QUESTION # 70

Shift is one of the key elements in defining project and resource calendars.

Which two additional key elements are required to define the project and resource calendars? (Choose two.)

- A. Time off
- B. Accounting Calendar
- C. Schedule Exceptions
- D. Workday Patterns
- E. Expenditure Type

Answer: C,D

Explanation:

Shift is one of the key elements in defining project and resource calendars. Two additional key elements that are required to define

the project and resource calendars are:

* Schedule Exceptions: These are dates or periods that override the regular workday patterns and shifts of a calendar. They can be used to define holidays, vacations, or other special events that affect the availability of resources or projects.

* Workday Patterns: These are patterns of working and nonworking days that repeat over a period of time. They can be used to define the standard working days and hours for a calendar. Time off, expenditure type, and accounting calendar are not key elements in defining project and resource calendars. Time off is an attribute of a resource assignment that reduces the availability of a resource.

Expenditure type is a classification of costs that determines how they are processed and accounted.

Accounting calendar is a calendar that defines the accounting periods and dates for transactions.
