Cisco 100-160 Exam Bible - Exam 100-160 Discount

Our 100-160 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening. As the questions of exams of our 100-160 exam dumps are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our 100-160 Practice Engine can serve as a conducive tool for you make up for those hot points you have ignored. You will be completed ready for your 100-160 exam.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 2	<ul style="list-style-type: none">Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 3	<ul style="list-style-type: none">Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection prevention systems, providing insight into how threats are mitigated within network environments.
Topic 4	<ul style="list-style-type: none">Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.

- Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q336-Q341):

NEW QUESTION # 336

Which of the following log file entries would most likely indicate a successful brute-force attack on an authentication system?

- A. "Failed login attempt from user 'bob' at 11:23:45 due to incorrect password."
- B. "Password reset request from user 'jane' received and processed."
- C. "Successful login attempt from user 'admin' at 10:15:32."
- D. "Multiple failed login attempts from IP address 192.168.1.100 within a short time."

Answer: D

Explanation:

A brute-force attack involves continuously and systematically attempting various combinations of passwords until the correct one is found. Thus, multiple failed login attempts from a specific IP address within a short time frame is a strong indication of a brute-force attack. This log entry suggests that an attacker is repeatedly attempting to gain unauthorized access to the system by systematically cycling through different passwords.

NEW QUESTION # 337

Which of the following helps to ensure the confidentiality of data in computer operations?

- A. Data integrity controls
- B. Access control lists (ACLs)
- C. Antivirus software
- D. Intrusion Detection System (IDS)

Answer: B

Explanation:

Access control lists (ACLs) are a security mechanism used in computer operations to enforce and manage access permissions for users and resources. ACLs enable organizations to control who can access specific data or resources, helping to ensure the confidentiality of sensitive information.

NEW QUESTION # 338

Which of the following is a benefit of utilizing automated threat intelligence within a cybersecurity system?

- A. All of the above
- B. Reduced false positives
- C. Increased vulnerability detection
- D. Improved incident response time

Answer: A

Explanation:

Automated threat intelligence systems gather and analyze vast amounts of data to identify potential threats and vulnerabilities. By utilizing these systems, organizations can benefit from reduced false positives, increased vulnerability detection, and improved incident response time. This comprehensive approach enhances the overall effectiveness of a cybersecurity system.

NEW QUESTION # 339

Which of the following is a common security threat that targets web applications?

- A. Man-in-the-middle attack
- **B. SQL injection**
- C. Distributed Denial of Service (DDoS)
- D. DNS poisoning

Answer: B

Explanation:

Option 1: Correct: SQL injection is a common security threat that targets web applications. It involves inserting malicious SQL code into input fields to manipulate the application's database and gain unauthorized access or retrieve sensitive information.

Option 2: Incorrect: DNS poisoning is not a common security threat that targets web applications. It involves corrupting the DNS cache and redirecting users to malicious websites.

Option 3: Incorrect: Man-in-the-middle attack is not a common security threat that specifically targets web applications. It involves intercepting communication between two parties and can affect various types of network communication.

Option 4: Incorrect: Distributed Denial of Service (DDoS) is not a common security threat that targets web applications specifically. It involves overwhelming a target system with a flood of traffic from multiple sources, rendering it inaccessible.

NEW QUESTION # 340

What is the main motivation for attackers to conduct cyber attacks?

- A. Curiosity
- B. Revenge
- C. Knowledge
- **D. Financial gain**

Answer: D

Explanation:

The primary motivation for many cyber attackers is financial gain. By conducting cyber attacks, attackers may aim to steal sensitive information, such as credit card details or personal data, which they can then use or sell for financial profit.

NEW QUESTION # 341

.....

Our 100-160 exam braindumps can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality exam materials may bring discredit on the company.
