New 156-521 Test Format, Exam 156-521 Introduction

We offer 24 - hour, 365 – day online customer service to every user on our 156-521 study materials. Our service staff will help you solve the problem about the 156-521 training materials with the most professional knowledge and enthusiasm. We believe that can completely dispel your worries on 156-521 Exam Braindumps. So please feel free to contact us if you have any trouble on our 156-521 practice questions.

CheckPoint Check Point Certified Automation Specialist - R81.20 (CCAS) Sample Questions (Q210-Q215):

NEW QUESTION # 210

What is the role of UID in Management API commands?

- A. Acts as firewall rule ID
- B. Encrypts traffic
- C. Defines object permissions
- D. Uniquely identifies objects

Answer: D

Explanation:

Each object in Check Point's management database has a UID (unique identifier), which is essential for operations like modifying or deleting objects when the name is ambiguous or duplicated.

NEW QUESTION # 211

What security measure helps protect the Management API from abuse?

- A. IP whitelisting
- B. User password complexity
- C. License enforcement
- D. Automatic password rotation

Answer: A

Explanation:

Check Point uses IP whitelisting via the `apiclient.conf` file or SmartConsole to restrict which systems can access the API. This ensures that only trusted sources can initiate API calls.

NEW QUESTION # 212

Which command is used to add a new host object using `mgmt_cli`?

- A. create host
- B. new host
- C. add host
- D. set host

Answer: C

Explanation:

The `add host` command is used with `mgmt_cli` to define a new host object. Required parameters typically include the object's name and IP address, among other optional fields.

NEW QUESTION # 213

Which Gaia operating system setting can be managed via the Gaia API? (Choose two)

- A. Rule base editing
- B. Antivirus blade activation
- C. NTP server configuration
- D. Static routing

Answer: C,D

Explanation:

The Gaia API is focused on system-level configuration such as NTP, routing, DNS, SNMP, and backups. Rule base or blade management is handled by the Management API, not Gaia API.

NEW QUESTION # 214

You executed a command via Gaia API to change the NTP server. What must be done next for the change to take effect?

- A. Logout and re-login
- B. Run a publish command
- C. Restart the API server
- D. Nothing, change is applied immediately

Answer: D

Explanation:

Unlike the Management API, most Gaia API changes (such as NTP, hostname, or DNS) are applied immediately and do not require a publish step. They persist automatically upon execution.
