NEW QUESTION # 51

The main benefit of a multi-tenancy SOC solution for an MSSP is:

- A. Decreased overhead costs.
- B. The ability to host multiple tenants within a shared environment.
- C. Automatic software updates across all agents.
- D. Increased storage capacity for logs.

Answer: B

NEW QUESTION # 52

From where does the rule engine load the baseline data values?

- A. The profile report
- B. The daily database
- C. The profile database
- D. The memory

Answer: C

Explanation:

The rule engine in FortiSIEM loads baseline data values from the profile database. This database stores historical trends and behavioral baselines for various metrics, such as CPU usage, network activity, and authentication patterns.

Profile database maintains long-term aggregated statistics for anomaly detection.

Baseline values are used to compare current events against expected behavior.

This helps in detecting deviations, such as a sudden increase in failed logins or unusual traffic spikes.

NEW QUESTION # 53

Refer to the exhibit.

PROCESS	UPTIME
phParser	DOWN
phAgentManager	DOWN
phCheckpoint	DOWN
phDiscover	DOWN
phEventPackager	DOWN
phPerfMonitor	DOWN
phEventForwarder	DOWN
phMonitor	13:04
phMonitorAgent	DOWN
Rsyslogd	DOWN

An administrator deploys a new collector for the first time, and notices that all the processes except the phMonitor are down. How can the administrator bring the processes up?

- A. Rebooting the collector will bring up the processes.
- B. The processes will come up after the collector is registered to the supervisor.
- C. The administrator needs to run the command phtools - start all on the collector.
- D. The collector was not deployed properly and must be redeployed.

Answer: B

Explanation:

When a FortiSIEM collector is deployed for the first time, most of its processes remain down until it is successfully registered with the supervisor.

The phMonitor process is running because it monitors system health, but other services remain inactive until the collector establishes communication with the supervisor.

Once the collector registers to the supervisor, it receives configurations and policies, and its processes will start automatically.

NEW QUESTION # 54
