## Quiz 2026 Marvelous MS-721: Frequent Collaboration Communications Systems Engineer Updates

Managing time during the Microsoft MS-721 exam is a challenging task. Most candidates cannot manage their time during the Microsoft MS-721 exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the MS-721 Exam. Microsoft MS-721 practice exam on the software help you identify which kind of MS-721 questions are more time-consuming, and they would be able to assess their efficiency in answering questions.

## Microsoft Collaboration Communications Systems Engineer Sample Questions (Q165-Q170):

### NEW QUESTION # 165

You have a dial plan named DPI.

You need to assign DPI to a new Microsoft Teams user named User1. You must verify that the appropriate dial plan and the associated normalization rules are assigned to User1.

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation:

Graphical user interface, text, application, email Description automatically generated

### NEW QUESTION # 166

You are deploying Microsoft Teams Calling Plans to three users as shown in the following table.

You need to resolve the issues.

What should you assign to each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 167

You have a Microsoft 365 E5 subscription that uses Microsoft Teams Phone.

You are reconfiguring a SIP handset to use SIP Gateway.

You discover that the Teams sign-in option fails to appear on the handset.

You need to ensure that the Teams sign-in option appears on the handset.

What should you do?

- A. Connect your computer to the PC port of the handset.
- B. Change the handset's default administrator password to a complex password.
- C. Configure the handset to use IPv6.
- **D. Set the provisioning server URL for the handset.**
- E. From the Microsoft Teams admin center, add the MAC address of the handset.

**Answer: D**

Explanation:

Set the SIP Gateway provisioning server URL

You can set the SIP Gateway provisioning server's URL in your Dynamic Host Configuration Protocol (DHCP) server. Users who work remotely must configure it manually.

Using DHCP

For each SIP device, set one of the following SIP Gateway provisioning server URLs:

EMEA: <http://emea.ipp.sdg.teams.microsoft.com>

Americas: <http://noam.ipp.sdg.teams.microsoft.com>

APAC: <http://apac.ipp.sdg.teams.microsoft.com>

Add SIP devices to your Teams organization by configuring the above SIP Gateway provisioning server URL in your DHCP server.

To learn more about DHCP server, see Deploy and manage DHCP.

### NEW QUESTION # 168

Your company has offices in Seattle.

You deploy Microsoft Teams Phone. You have three Session Border Controller (SBCs) named SBC1, SBC2, and SBC3.

You need to configure voice routing to meet the following requirements:

All calls to area codes 425 and 206 must attempt to go to SBC1, and if SBC1 is unavailable, fail over to SBC2.

All other calls to the United States and Canada must go out through SBC2.

International calls must go out through SBC2 or SBC3.

How should you complete the PowerShell script? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

## NEW QUESTION # 169

### Case Study 1 - Litware, Inc

#### Overview

Litware, Inc. is an online retailer.

Litware is replacing its telephony platform with Microsoft Teams Phone.

Currently, all users are assigned Microsoft 365 E3 licenses.

#### Existing Environment

##### Telephony Environment

The existing telecommunications system has several third-party IP-PBXes at the corporate and warehouse sites. Currently, the PBXes are linked through the corporate WAN and an inter-office dial plan is in place.

A unique PSTN direct inward dial (DID) is assigned to each user. The last five digits of each DID are used as an extension.

Litware piloted Microsoft Skype for Business Server Enterprise Voice, but has since decided to migrate directly to Teams Phone.

During the pilot, a response group was created, and the response group is still in use. Agents in the response group use Skype for Business Server- certified handsets.

##### Locations

Litware has global retail stores and datacenters.

The telephony topology contains the following four types of sites:

##### Corporate sites

The corporate sites contain information workers who collaborate by using the Teams desktop client and SharePoint Online.

The reception desk at each corporate site has an analog intercom with an integrated door control.

Each intercom connects to an existing PBX by using an FXS Analog Telephony Adapter (ATA).

SIP trunks are delivered directly to the site by using a resilient WAN that connects directly to the on-site PBX solution.

##### Warehouse sites

The warehouse sites are critical to the business. Users at these sites use either the Teams desktop client or the Teams mobile client.

Each warehouse has a public announcement (PA) system that connects to the PBX by using a SIP ATA, along with the sites' existing ISDN trunks.

Currently, users at the company's warehouse in Georgia can call the PA system by dialing 123456.

All calls to emergency services from the warehouses are played over the warehouses' PA system automatically.

WAN connectivity at the warehouses can be unreliable, so local PSTN connectivity is preferred as compared to centrally hosted connectivity.

##### Retail sites

Each retail site has only one or two desk phones and a specialized point of sale (POS) computer that cannot run the desktop or web versions of the Teams client.

Users at the retail sites have the Teams app and an associated data plan installed on their mobile device.

Currently, each retail uses a managed SD-WAN appliance to connect to both the internet and the corporate WAN.

The users report that in the event of an internet outage at the retail sites, they can use their mobile devices, which have strong reception.

#### Requirements

##### Planned Changes

Litware plans to implement the following changes:

Maintain the existing emergency call PA integration.

Replace the existing IP-PBX solutions by using Teams Phone.

Consolidate all its PSTN trunks by using region-specific datacenters, whenever possible. During the planned deployment of Teams Phone, Litware will open a new retail site in the United Kingdom that will have five users. Litware does not have any existing telephony in the United Kingdom. Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.

You are opening a new warehouse site in Melbourne. The new warehouse will connect to a phone carrier by using a Session Border Controller (SBC). Dialing rules are an area code of two digits beginning with a zero followed by a subscriber number of eight digits.

For example, an

E.164 number of +61370105550 will be translated to 03 7010 5550 and +61255505550 will be translated to 02 5550 5550.

##### Technical Requirements

Litware identifies the following technical requirements:

Minimize the amount of voice traffic over the WAN.

Whenever possible, use natively supported Teams solutions.

Avoid replacing existing analog device adapters and SIP phones.

Assign a Microsoft 365 Phone System license to all the users listed in a CSV file.

Ensure that the retail sites can place and receive calls in the event of a WAN failure.

Assign a phone number of +61370105550 to a user named User1. User1 is located at a corporate site.

Ensure that the warehouse sites maintain calling in the event of an internet outage or Teams service failure.

Provide users at the United Kingdom retail site with phone numbers. The users must only be allowed to make in-country calls.

Replace the response group from the Skype for Business Server Voice Enterprise pilot with a call queue. The agents must be able to

You need to recommend a PSTN solution for the Teams Phone deployment at the retail sites. The solution must meet the technical requirements. What should you include in the recommendation?

- Answer: D**

Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.
