

Salesforce Plat-Dev-210 Valid Exam Topics | Plat-Dev-210 Exam Dumps Collection

With our Plat-Dev-210 study materials, all your agreeable outcomes are no longer dreams for you. And with the aid of our Plat-Dev-210 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our Plat-Dev-210 learning questions. Come and buy our Plat-Dev-210 practice engine, you will be confident and satisfied with it and have a brighter future.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
Topic 2	<ul style="list-style-type: none">Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 3	<ul style="list-style-type: none">Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Topic 4	<ul style="list-style-type: none"> • Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
Topic 5	<ul style="list-style-type: none"> • Omniscritps: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.

Valid free Plat-Dev-210 test questions and answers, Salesforce Plat-Dev-210 practice test

Our Plat-Dev-210 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our Plat-Dev-210 guide torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. So we hope you can have a good understanding of the Plat-Dev-210 Exam Torrent we provide, then you can pass your exam in your first attempt.

Salesforce Certified Omnistudio Developer Sample Questions (Q73-Q78):

NEW QUESTION # 73

A developer has a requirement to create a child FlexCard that contain all of its parent FlexCard's records in a Datatable.

- A. {Records[0]}
- B. {Params.records}
- **C. {Records}**
- D. {recordId}

Answer: C

Explanation:

The correct syntax for passing all of the parent FlexCard's records to a child FlexCard is {Records}, which represents an array of records. The other options are incorrect because they either use an invalid syntax or refer to a single record instead of an array of records.

NEW QUESTION # 74

A healthcare company wants to enable its subscribers to add, edit, or delete dependents related to their policy Community portal. The developer on the project decides to use an MiniScript.

How should the developer configure the OmniScript to provide this functionality?

- A. Use an Input Block element and a DataRaptor Post Action element.
- **B. Use an Edit Block element configured with Remote Actions.**
- C. Use a Text Block element and a Remote Action element.
- D. Use an Edit Block element configured with SOQL statements.

Answer: B

Explanation:

An Edit Block element configured with Remote Actions allows the developer to create a dynamic table that can display, add, edit, or delete records from a Salesforce object. The Remote Actions can be configured to perform CRUD operations on the object using SOQL or Apex.

NEW QUESTION # 75

A customer has a new Engagement Manager who is going to be the new Primary Contact for the Account. What type of mapping does a DataRaptor Load use to create the new contact and then add it as the new Primary Contact?

- A. Lookup Key
- B. Lookup Mapping
- C. Relationship Query
- **D. Linked Mapping**

Answer: D

Explanation:

According to the DataRaptor Load Overview page, a Linked Mapping is used to "create or update multiple records in different objects that are related by lookup fields".

NEW QUESTION # 76

Which JSON from the DRGetAccountDetails action would display all six values correctly in the Omniscript structure shown? BlkContacts is a Repeat Block.

□

- A. Option C
- B. Option B
- **C. Option A**
- D. Option D

Answer: C

Explanation:

From the OmniStudio OmniScript Documentation:

- * A Repeat Block (like BlkContacts) expects an array of objects.
- * Each item in the array must contain fields that exactly match the UI elements inside the block.
- * The parent JSON must include any top-level values used by individual input fields (like AccountName, AccountPhone).

Why the Other Options Are Incorrect:

- * B. Uses Contacts instead of BlkContacts, and is incomplete/malformed.
- * C. Repeats keys at the same level instead of using an array structure. This causes the data to overwrite and fail to display properly.
- * D. Uses incorrect keys like "Name" and "Phone" instead of expected "ContactName" and "ContactPhone", breaking field binding.

Salesforce OmniStudio Developer Guide # OmniScript Repeat Blocks & Data JSON Structure DataRaptor Extract Output # Mapping JSON for OmniScripts

NEW QUESTION # 77

Refer to the exhibit.

What JSON code correct represent the step in the OmniScript Structure panel shown?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: A

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with three elements: Step, Block, and Telephone. The Step element is an empty object, the Block element is an object with two properties: Text and Telephone, and the Telephone element is a string. Therefore, the JSON code that correctly represents the step in the OmniScript Structure panel shown is option C, which has the following structure:

The other options have different structures that do not match the OmniScript structure shown. Therefore, the correct answer is C.

NEW QUESTION # 78

.....

Our Plat-Dev-210 study materials are famous at home and abroad, the main reason is because we have other companies that do not have core competitiveness, there are many complicated similar products on the market, if you want to stand out is the selling point of needs its own. Our Plat-Dev-210 Study Materials with other product of different thing is we have the most core expert team to update our Plat-Dev-210 study materials , learning platform to changes with the change of the exam outline.
