## Microsoft GH-900 PDF Dumps

With many advantages such as immediate download, simulation before the real test as well as high degree of privacy, our GH-900 actual exam survives all the ordeals throughout its development and remains one of the best choices for those in preparation for exams. Many people have gained good grades after using our GH-900 real test, so you will also enjoy the good results. Don't

hesitate any more. Time and tide wait for no man. If you really long for recognition and success, you had better choose our GH-900 exam demo since no other exam demo has better quality than our GH-900 training questions.

## Microsoft GitHub Foundations Sample Questions (Q40-Q45):

### NEW QUESTION # 40

What are two recommended ways of improving the discoverability of a repository? (Choose two.)

- A. Add labels to categorize the repository.
- B. Register the repository with GitHub search.
- C. Add topics to classify the repository.
- D. Create a README file describing the repository.

**Answer: C,D**

Explanation:

Two recommended ways to improve the discoverability of a repository on GitHub are:

B). Create a README file describing the repository: A well-written README file provides essential information about the project, such as what it does, how to use it, and how to contribute.

This is often the first thing potential users or contributors will see, making it critical for discoverability.

D). Add topics to classify the repository: Adding topics to your repository helps classify it under specific categories, making it easier for others to find it through GitHub's search and exploration features. Topics act like tags, helping to connect your project with users interested in similar subjects.

Registering a repository with GitHub search and adding labels are not applicable actions for improving discoverability in the broader sense.

### NEW QUESTION # 41

What is GitHub?

- A. A proprietary software platform for nurturing creativity in developers and building a technology community
- B. A centralized version control system designed for nurturing a community of developers and providing access to open source projects
- C. A platform that focuses on facilitating the growth and sharing of code, specifically designed for new developers to hone their skills
- D. A cloud-based hosting service for version control and collaboration, focused on creating a safe and collaborative environment for developers

**Answer: D**

Explanation:

GitHub is a cloud-based platform that provides hosting for software development and version control using Git. It offers tools for collaboration, project management, and security to create a safe and productive environment for developers.

\* GitHub Overview:

\* Option B is correct because GitHub is primarily known as a cloud-based hosting service for Git repositories, offering a collaborative environment where developers can work together on projects, manage version control, and implement security practices.

\* Incorrect Options:

\* Option A is incorrect because GitHub is not proprietary in the sense of being closed off from version control standards; it is widely recognized as an open platform for collaboration.

\* Option C is incorrect because, while GitHub is accessible to new developers, it is designed for developers of all skill levels and not specifically tailored for beginners.

\* Option D is incorrect because GitHub is not a centralized version control system; it supports Git, which is distributed.

### NEW QUESTION # 42

What is the minimum access needed to contribute to a repository?

- A. Write

- B. Triage
- C. Maintain
- D. Read

**Answer: A**

Explanation:

To contribute to a GitHub repository, a user typically needs to be able to create branches, push changes, and open pull requests. These actions require Write access, which is the minimum level of access needed to contribute code directly to a repository.

\* Write Access:

\* Option D is correct because " Write " access allows users to contribute to the repository by pushing changes, creating branches, and opening pull requests. This is the minimum required access level for contributing code.

\* Incorrect Options:

\* Option A (Read) is incorrect because " Read " access only allows viewing the repository, not making changes.

\* Option B (Triage) is incorrect because while Triage access allows managing issues and pull requests, it does not allow pushing code.

\* Option C (Maintain) is incorrect because " Maintain " access includes additional permissions beyond those needed for basic contributions, such as managing repository settings.

### NEW QUESTION # 43

Which of the following attributes are on the Milestone page? (Each correct answer presents a complete solution. Choose two.)

- A. each milestone ' s completion percentage
- B. GitHub Action workflows that need to be executed to complete the milestone
- C. a summary list of GitHub Projects tagged to the milestone
- D. a list of the open and closed issues associated with the milestone

**Answer: A,D**

### NEW QUESTION # 44

The difference between GitHub Desktop and github.com is that Desktop:

- A. Offers a graphical user interface.
- B. Is only available on Windows operating systems.
- C. Is a standalone software application.
- D. Enables integration with office suite applications.
- E. Is a self-hosted version of GitHub.

**Answer: A**

Explanation:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on github.com.

Graphical User Interface:

Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

Incorrect Options:

Option A is partially correct in that GitHub Desktop is a standalone application, but the key difference is the GUI.

Option B is incorrect because GitHub Desktop does not specifically enable integration with office suite applications.

Option C is incorrect because GitHub Desktop is available on both Windows and macOS.

Option E is incorrect because GitHub Desktop is not a self-hosted version of GitHub; it is a client application for accessing GitHub repositories.
