

Choosing Mule-Dev-201 Valid Test Blueprint Makes It As Easy As Eating to Pass Salesforce Certified MuleSoft Developer

The pass rate is 98.65%, and we pass guarantee and money back guarantee if you fail to pass the exam by using Mule-Dev-201 learning materials of us. We have a broad market in the world with the high quality of Mule-Dev-201 exam dumps, and if you choose us we will help you pass the exam just one time. In addition Mule-Dev-201 Training Materials of us also have free update for one year after purchasing. We also have the professional service stuff to answer all questions of you. If you have a try, you will never regret.

There are more opportunities for possessing with a certification, and our Mule-Dev-201 study tool is the greatest resource to get a leg up on your competition. When it comes to our time-tested Mule-Dev-201 latest practice materials, for one thing, we have a professional team contains a lot of experts who have devoted themselves to development of our Mule-Dev-201 Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our Mule-Dev-201 study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.

2026 100% Free Mule-Dev-201 –Accurate 100% Free Valid Test Blueprint | Salesforce Certified MuleSoft Developer Exam Demo

The Salesforce Mule-Dev-201 web-based practice test software is very user-friendly and simple to use. It is accessible on all browsers. It will save your progress and give a report of your mistakes which will surely be beneficial for your overall exam preparation. A useful certification will bring you much outstanding advantage when you apply for any jobs about Salesforce company or products.

Salesforce Certified MuleSoft Developer Sample Questions (Q236-Q241):

NEW QUESTION # 236

An organization is beginning to follow Mulesoft's recommended API led connectivity approach to use modern API to support the development and lifecycle of the integration solutions and to close the IT delivery gap.

What distinguishes between how modern API's are organized in a MuleSoft recommended API-led connectivity approach as compared to other common enterprise integration solutions?

- A. The API interfaces are specified as macroservices with one API representing all the business logic of an existing and proven end to end solution
- B. The API implementations are monitored with common tools, centralized monitoring and security systems
- C. The API implementation are built with standards using common lifecycle and centralized configuration management tools
- D. The API interfaces are specified at a granularity intended for developers to consume specific aspect of integration processes

Answer: D

Explanation:

Correct answer is The API interfaces are specified at a granularity intended for developers to consume specific aspect of integration processes

NEW QUESTION # 237

A

web client submits a request to `http://localhost:8081?accountType=personal`. The query parameter is captured using a Set Variable transformer to a variable named `accountType`.

What is the correct DataWeave expression to log `accountType`?

- A. Account Type: `#[vars.accountType]`
- B. Account Type: `#[flowVars.accountType]`
- C. Account Type: `#[attributes.accountType]`
- D. Account Type: `#[message.inboundProperties.accountType]`

Answer: A

Explanation:

`vars`: Keyword for accessing a variable, for example, through a DataWeave expression in a Mule component, such as the Logger, or from an Input or Output parameter of an operation. If the name of your variable is `myVar`, you can access it like this: `vars.myVar`
Hence correct answer is Account Type: `#[vars.accountType]`

NEW QUESTION # 238

Refer to the exhibit.

□

How should be the where clause written for the configured input parameters in such a way that it achieves below SQL query?

- A. WHERE city = :city AND state = :state
- B. WHERE city := city AND state := state
- C. WHERE city = attributes.city AND state = attributes.state
- D. WHERE city = \${city} AND state = \${state}

Answer: A

Explanation:

Correct syntax to use where clause is `WHERE city = :city AND state = :state` This question validates knowledge on using dynamic queries in DB select operation.

Configure Dynamic Queries in the Select Operation

When you need to parameterize not only the WHERE clause but also parts of the query itself (for example, queries that compare tables that depend on a condition, or complex queries for which the project table columns need to vary), you can configure dynamic queries.

In the following example, you configure a dynamic query by using a full expression with a string in which the table depends on a variable `$(vars.table)`. Although some of the query text is dynamic ("SELECT * FROM `$(vars.table)`"), the WHERE clause still defines the WHERE condition using input parameters: in this case, `WHERE name = :name`. In your Studio flow, select the Select operation.

In the operation configuration screen, set the SQL Query Text field to `SELECT * FROM $(vars.table) WHERE name = :name`. Set the Input Parameters field to `{'name' : payload}`.

The following screenshot shows the configuration in Studio:

Graphical user interface, application Description automatically generated

□

Figure 3. Dynamic query configuration

In the XML editor, the `<db:sql>` configuration looks like this:

```
* <set-variable variableName="table" value="PLANET"/>
* <db:selectconfig-ref="dbConfig">
* <db:sql>#"SELECT * FROM $(vars.table) WHERE name = :name"</db:sql>
* <db:input-parameters>
* #['name' : payload]
* </db:input-parameters>
* </db:select>
```

You can apply input parameters only to parameters in a WHERE clause. To modify any other part of the query, use the DataWeave

interpolation operator.

NEW QUESTION # 239

A

Mule application contains two HTTP Listeners, each configured for different API endpoints: `http://acme.com/apis/orders` and `http://acme.com/a pis/customers`.

What base path value should be set in an HTT? Listener config element so that it can be used to configure both HTTP Listeners?

- A. `/apis/`
- B. `/apis/orders|customers`
- C. `/apis/?`
- D. `/apis/*`

Answer: D

Explanation:

Option 2 is the correct answer as `/api/*` accepts everything starting with `/api/`

NEW QUESTION # 240

In the execution of scatter gather, the "sleep 2 sec" Flow Reference takes about 2 sec to complete, and the "sleep 8 sec" Flow Reference takes about 8 sec to complete.

About how many sec does it take from the Scatter-Gather is called until the "Set Payload" transformer is called?

□

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Correct answer is 8 as events are processed in parallel in case of scatter gather router

NEW QUESTION # 241

.....

Mule-Dev-201 study material applies to all types of candidates. Buying a set of learning materials is not difficult, but it is difficult to buy one that is suitable for you. For example, some learning materials can really help students get high scores, but they usually require users to have a lot of study time, which is difficult for office workers. However, Mule-Dev-201 Study Material is to help students improve their test scores by improving their learning efficiency. Therefore, users can pass exams with very little learning time.
