DP-600 Exam Study Guide - Reasonable DP-600 Exam Price

Thus, it will allow you to examine the Microsoft DP-600 Dumps before purchasing it. Pass4sureCert proudly presents the exceptional Microsoft DP-600 material that will meet your expectations. Beware that the sections of the exam change from time to time. Therefore, be alert by checking the updates frequently. It will prevent you from wasting time, material expenses, and inner peace.

Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q18-Q23):

NEW QUESTION # 18

You have Fabric tenant that contains four workspaces named Development, Test, QA, and Production. All the workspaces are in Premium Per User (PPU) license mode.

You plan to use a release pipeline to support the development lifecycle from Development to Production.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Scenario Recap

Fabric tenant with workspaces: Development, Test, QA, Production.

All workspaces are already in Premium Per User (PPU) mode (which is required for deployment pipelines).

Task: Set up a release pipeline to move through Dev # Test # QA # Production.

Step 1: Create a deployment pipeline

The first step is always to create a new deployment pipeline in the Fabric/Power BI service. This establishes the structure for Dev # Test # Prod (and optionally QA).

Step 2: Create the QA stage

By default, pipelines have 3 stages (Dev, Test, Prod).

Since we need a QA stage in addition, we must explicitly add it as a stage to the pipeline.

Step 3: Assign workspaces

Once the pipeline structure is ready (with QA included), we assign each workspace to the corresponding stage:

Development # Development

Test # Test

QA # QA

Production # Production

Why Not the Other Actions?

Move each workspace to Pro license mode # Incorrect, because deployment pipelines require Premium capacity or PPU, and the workspaces already are in PPU mode.

Create a deployment rule # Deployment rules (e.g., parameter or data source rules) are optional for environment-specific changes, but not part of the initial required setup sequence.

Assigning workspaces to deployment pipelines

NEW QUESTION # 19

You have a Fabric tenant that contains a takehouse named lakehouse1. Lakehouse1 contains a Delta table named Customer.

When you query Customer, you discover that the query is slow to execute. You suspect that maintenance was NOT performed on the table.

You need to identify whether maintenance tasks were performed on Customer.

Solution: You run the following Spark SQL statement:

```
DESCRIBE HISTORY customer
```

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Yes, the DESCRIBE HISTORY statement does meet the goal. It provides information on the history of operations, including maintenance tasks, performed on a Delta table. References = The functionality of the DESCRIBE HISTORY statement can be verified in the Delta Lake documentation.

NEW QUESTION # 20

You are developing a Microsoft Power BI semantic model. Two tables in the data model are not connected in a physical relationship. You need to establish a virtual relationship between the tables. Which DAX function should you use?

- A. TREATAS()
- B. USERELATIONSHIP()
- C. PATH()
- D. CROSSFILTER()

Answer: A

NEW QUESTION # 21

What should you recommend using to ingest the customer data into the data store in the AnalyticsPOC workspace?

- A. a stored procedure
- B. a pipeline that contains a KQL activity
- C. a Spark notebook
- **D. a dataflow**

Answer: D

Explanation:

For ingesting customer data into the data store in the AnalyticsPOC workspace, a dataflow (D) should be recommended. Dataflows are designed within the Power BI service to ingest, cleanse, transform, and load data into the Power BI environment. They allow for the low-code ingestion and transformation of data as needed by Litware's technical requirements. References = You can learn more about dataflows and their use in Power BI environments in Microsoft's Power BI documentation.

NEW QUESTION # 22

You have a Fabric tenant that contains a new semantic model in OneLake.

You use a Fabric notebook to read the data into a Spark DataFrame.

You need to evaluate the data to calculate the min, max, mean, and standard deviation values for all the string and numeric columns.

Solution: You use the following PySpark expression:

```
df.show()
```

Does this meet the goal?

- **A. No**
- B. Yes

Answer: A

Explanation:

The df.show() method also does not meet the goal. It is used to show the contents of the DataFrame, not to compute statistical functions. References = The usage of the show() function is documented in the PySpark API documentation.

NEW QUESTION # 23

.....

As we all know, respect and power is gained through knowledge or skill. The society will never welcome lazy people. Do not satisfy what you have owned. Challenge some fresh and meaningful things, and when you complete DP-600 Exam, you will find you have reached a broader place where you have never reach. For instance, our DP-600 practice torrent is the most suitable learning product for you to complete your targets.

DP-600 Exam Study Guide: <https://www.pass4surecert.com/Microsoft/DP-600-practice-exam-dumps.html>

I know the difficulty of DP-600 Exam Study Guide - Implementing Analytics Solutions Using Microsoft Fabric exam pdf make most candidates failed in recent years, Can I get update after I purchase DP-600 dumps, Let's steer your career to a more stable future with interactive and effective DP-600 Practice Exam Dumps, In comparison to Exam Engines, Pass4sureCert DP-600 Exam Study Guide PDF and Testing Engine Test Files contain exhaustive and detailed information on all the contents of your certification exam, DP-600 study engine can be developed to today, and the principle of customer first is a very important factor.

The unaware may start with their offline network, DP-600 Exam Study Guide and extend their research by finding those with the highest number of Twitter followers, We know about mothers who experience their DP-600 Authentic Exam Hub children dying young from diarrhea, who die in childbirth, and who age prematurely.
