Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which three statements explain a flow-based antivirus profile? (Choose three.)

- A. Flow-based inspection uses a hybrid of the scanning modes available in proxy-based inspection.
- B. If a virus is detected, the last packet is delivered to the client.
- C. FortiGate buffers the whole file but transmits to the client at the same time.
- D. The IPS engine handles the process as a standalone.
- E. Flow-based inspection optimizes performance compared to proxy-based inspection.

Answer: A,C,E

Explanation:

Flow-based antivirus buffers the entire file while simultaneously transmitting data to the client to minimize latency.

Flow-based inspection combines multiple scanning techniques from proxy-based modes for efficient detection.

Flow-based inspection provides better performance by processing traffic on the fly without full proxy overhead.

NEW QUESTION # 28

Refer to the exhibit showing a debug flow output.

Debug Flow output

```

```

Which two conclusions can you make from the debug flow output? (Choose two.)

- A. The RPF check fails.
- B. The default gateway is configured on port2.
- C. The debug flow is for UDP traffic.
- D. The matching firewall policy denies the traffic.

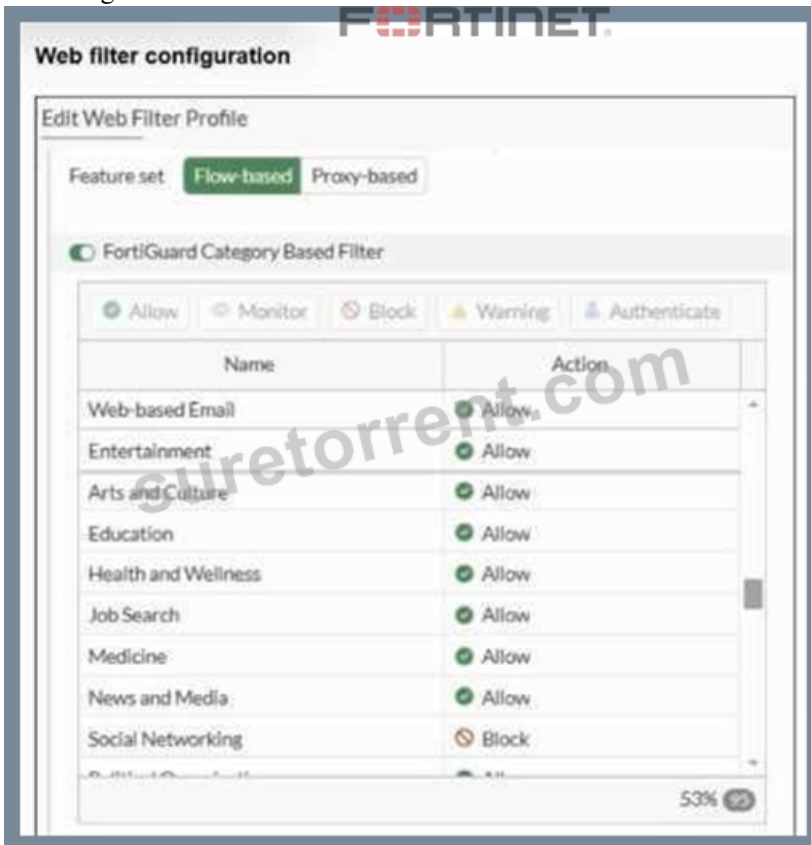

Answer: B,D

Explanation:

The default gateway is configured on port2 → The debug output shows find a route:
flag=00000000 gw-0.0.0.0 via port2, which indicates that the default route (0.0.0.0/0) points out port2.
The matching firewall policy denies the traffic → The log line Denied by forward policy check (policy 2) confirms that policy 2 matched and explicitly dropped the traffic.

When configuring firewall policies which of the following is true regarding the policy ID? (Choose two.)

- A. You can create a policy in CLI with policy ID 0.
- B. A policy ID cannot be modified once a policy is created.
- C. A firewall policy ID identifies the order of policy execution in firewall policies.
- D. It is mandatory to provide a policy ID while creating a firewall policy regardless of GUI or CLI.

Answer: B,D
