Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q71-Q76):

NEW QUESTION # 71
When basing decisions on economics, how are lead time, product cost, value, and development expense used?

- A. To recover money already spent
- B. To take into account sunk costs
- C. To limit work in process (WIP)
- D. To understand solution tradeoffs

Answer: D

Explanation:
Explanation
According to the SAFe Agilist 6.0 domain of Apply SAFe Principles, when basing decisions on economics, lead time, product cost, value, and development expense are used to:
Evaluate the economic impact of different design alternatives
Optimize the flow of value delivery by minimizing delays and waste
Maximize the return on investment by delivering the most valuable features first Balance the tradeoffs between speed, quality, and cost

NEW QUESTION # 72
During the PI Planning event, when are planning adjustments agreed upon?

- A. During the draft plan review
- B. During breakout sessions
- C. During the management review and problem-solving meeting
- D. During the Coach Sync

Answer: C

Explanation:
Planning adjustments are agreed upon during the management review and problem-solving meeting in the PI planning event. The management review and problem-solving meeting is a session that occurs at the end of day one of the PI planning event. In this session, the management team reviews the draft plans of all the teams in the ART, identifies any issues or risks that need to be resolved, and proposes any changes or adjustments that are necessary to achieve the program objectives. The management team then communicates their feedback and recommendations to the teams on day two of the PI planning event. References: PI Planning, Management Review and Problem-Solving

NEW QUESTION # 73
Deploy, verify, monitor, and respond are all activities of what?

- A. Continuous Integration
- B. Continuous Deployment
- C. Release on Demand
- D. Continuous Exploration

Answer: B

NEW QUESTION # 74
What triggers the need for a Value Stream?

- A. Epic request
- B. Feature request
- C. User Story request
- D. Spike request

Answer: B

Explanation:
According to the SAFe Agilist 6.0 domain of Lean Thinking, a value stream is triggered by a demand for some value, such as a new feature, a change request, or a defect fix1. A feature is a service that fulfills a stakeholder need2. Therefore, a feature request is a

valid trigger for a value stream.

A spike request is a type of exploration enabler that addresses technical uncertainty or risk3. A user story request is a type of backlog item that represents an end user goal or function4. These are not triggers for a value stream, but rather work items that flow through a value stream.

NEW QUESTION # 75

Which statement is true about ART events?

- A. The Inspect and Adapt is the only ART event required to create a closed-loop system
- B. Team events run inside the ART events, and the ART events create a closed-loop system
- C. ART events run inside the team events, and the team events create a closed-loop system
- D. The daily stand-up is an ART event that requires the scrum of scrums and Program Owner syncinvolvement in the closed-loop system

Answer: B
