

# Pass-Sure Microsoft Reliable AZ-204 Exam Cram Are Leading Materials & 100% Pass-Rate AZ-204: Developing Solutions for Microsoft Azure

2026 Latest TestInsides AZ-204 PDF Dumps and AZ-204 Exam Engine Free Share: <https://drive.google.com/open?id=1sQKCpszbCKRm-ihjzPnnd-KNlwbyrv6>

The TestInsides is committed to making the entire Developing Solutions for Microsoft Azure (AZ-204) exam preparation journey simple, smart, and successful. To achieve this objective the TestInsides is offering the top-rated and updated Developing Solutions for Microsoft Azure (AZ-204) exam practice test questions in three different formats. These formats are Microsoft AZ-204 web-based practice test software, desktop practice test software, and PDF dumps files.

To pass the Microsoft AZ-204 Exam, developers must have a strong understanding of Azure development concepts and hands-on experience with Azure services. They must also be familiar with programming languages such as C# and JavaScript, as well as frameworks like .NET and Node.js. AZ-204 exam is a great way for developers to demonstrate their proficiency in developing cloud-based solutions using Microsoft Azure and enhance their career prospects in the fast-growing cloud computing industry.

## Connect to & Consume Azure/3rd-Party Services: 25-30%

- **Implementing API Management:** this covers skills in creating APIM instances; configuring authentication for APIs; defining policies for APIs.
- **Developing Event-Based Solutions:** the individuals should have the capacity to implement the solutions that utilize Azure Event Grid, Azure Notification Hubs, and Azure Event Hub.
- **Developing Message-based Solutions:** this requires one's skills in implementing solutions that utilize Azure Service Bus and Azure Queue Storage queues.
- **Developing App Service Logic App:** this objective requires that the learners have competence in developing Logic Apps; developing custom-connector for Logic Apps; developing custom-template for Logic Apps.

## New Reliable AZ-204 Exam Cram | Pass-Sure AZ-204: Developing Solutions for Microsoft Azure 100% Pass

In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of AZ-204. Our study tool can meet your needs. Once you use our AZ-204 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our AZ-204 learning material, you will have a good result. After years of development practice, our AZ-204 test torrent is absolutely the best. You will embrace a better future if you choose our AZ-204 exam materials.

### Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q236-Q241):

#### NEW QUESTION # 236

You need to implement the delivery service telemetry data

How should you configure the solution?

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 237

You develop a web application.

You need to register the application with an active Azure Active Directory (Azure AD) tenant.

Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Register a new application using the Azure portal

Sign in to the Azure portal using either a work or school account or a personal Microsoft account.

If your account gives you access to more than one tenant, select your account in the upper right corner. Set your portal session to the Azure AD tenant that you want.

Search for and select Azure Active Directory. Under Manage, select App registrations.

Select New registration. (Step 1)

In Register an application, enter a meaningful application name to display to users.

Specify who can use the application. Select the Azure AD instance. (Step 2) Under Redirect URI (optional), select the type of app you're building: Web or Public client (mobile & desktop). Then enter the redirect URI, or reply URL, for your application. (Step 3)

When finished, select Register.

#### NEW QUESTION # 238

You are developing a Docker/Go using Azure App Service Web App for Containers. You plan to run the container in an App Service on Linux. You identify a Docker container image to use.

None of your current resource groups reside in a location that supports Linux. You must minimize the number of resource groups required.

You need to create the application and perform an initial deployment.

Which three Azure CLI commands should you use to develop the solution? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

You can host native Linux applications in the cloud by using Azure Web Apps. To create a Web App for Containers, you must run Azure CLI commands that create a group, then a service plan, and finally the web app itself.

Step 1: az group create

In the Cloud Shell, create a resource group with the az group create command.

Step 2: az appservice plan create

In the Cloud Shell, create an App Service plan in the resource group with the az appservice plan create command.

Step 3: az webapp create

In the Cloud Shell, create a web app in the myAppServicePlan App Service plan with the az webapp create command. Don't forget to replace with a unique app name, and <docker-ID> with your Docker ID.

### NEW QUESTION # 239

You are creating an app that uses Event Grid to connect with other services. Your app's event data will be sent to a serverless function that checks compliance. This function is maintained by your company.

You write a new event subscription at the scope of your resource. The event must be invalidated after 3 specific period of time. You need to configure Event Grid to ensure security.

What should you implement? To answer, select the appropriate options in [he answer are a.

NOTE: Each correct selection is worth one point

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/event-grid/security-authentication>

### NEW QUESTION # 240

You are developing a serverless Java application on Azure. You create a new Azure Key Vault to work with secrets from a new Azure Functions application.

The application must meet the following requirements:

- \* Reference the Azure Key Vault without requiring any changes to the Java code.
- \* Dynamically add and remove instances of the Azure Functions host based on the number of incoming application events.
- \* Ensure that instances are perpetually warm to avoid any cold starts.
- \* Connect to a VNet.
- \* Authentication to the Azure Key Vault instance must be removed if the Azure Function application is deleted.

You need to grant the Azure Functions application access to the Azure Key Vault.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Step 1: Create the Azure Functions app with a Consumption plan type.

Use the Consumption plan for serverless.

Step 2: Create a system-assigned managed identity for the application.

Create a system-assigned managed identity for your application.

Key Vault references currently only support system-assigned managed identities. User-assigned identities cannot be used.

Step 3: Create an access policy in Key Vault for the application identity.

Create an access policy in Key Vault for the application identity you created earlier. Enable the "Get" secret permission on this policy. Do not configure the "authorized application" or applicationId settings, as this is not compatible with a managed identity.
