### NEW QUESTION: 1

A photography company provides online purchase of photographs. The core of the business operates from an Oracle database that stores all company images. New photos are continuously added to the database at widely variable intervals. Company policy only requires the database to be protected. Which Veeam Feature will provide complete backup and recovery for this database?

- A. Use the Veeam Explorer to identify and backup the database and logs daily along with the log backup set to 15-minute interval.
- B. Use the Veeam Plug-in for Oracle RMAN Back up the database daily Back up the archived redo logs at 15-minute intervals.
- C. Use the Veeam Agent. Back up the entire server including the database with Consistent Server Backup feature
- D. Use the Veeam Plug-in for Oracle RMAN Back up the entire host server including the database and logs daily.

**Answer: B (LEAVE A REPLY)**

The Veeam Plug-in for Oracle RMAN is designed specifically for efficient backup and recovery of Oracle databases. It allows for direct integration with Oracle RMAN (Recovery Manager), ensuring that the backups are consistent and reliable. For a photography company that relies heavily on an Oracle database with new photos being continuously added, this feature provides an ideal solution. The daily backup of the database ensures that all new content is secured regularly, while the 15-minute interval for archived redo logs ensures that any recent transactions are also protected. This approach aligns well with the company's requirement to protect only the database.

### NEW QUESTION: 2

If the selected proxy transport mode does not work or is not available, which mode can a backup Job default to?

P.S. Free & New VMCE\_v12 dumps are available on Google Drive shared by Prep4King: [https://drive.google.com/open?id=1qZW9gXcNOTB7fwhE1q2uaP7F4oQ\\_59MR](https://drive.google.com/open?id=1qZW9gXcNOTB7fwhE1q2uaP7F4oQ_59MR)

Don't underestimate the difficulty level of the Veeam VMCE\_v12 certification exam because it is not easy to clear. You need to prepare real VMCE\_v12 exam questions to get success. If you do not prepare with actual VMCE\_v12 Questions, there are chances that you may fail the final and not get the VMCE\_v12 certification.

The most important thing for preparing the VMCE\_v12 exam is reviewing the essential point. Some students learn all the knowledge of the test. They still fail because they just remember the less important point. In order to service the candidates better, we have issued the VMCE\_v12 test engine for you. Our company has accumulated so much experience about the test. So we can predict the real test precisely. Almost half questions and answers of the real exam occur on our VMCE\_v12 practice material. That means if you study our study guide, your passing rate is much higher than other candidates. Preparing the VMCE\_v12 exam has shortcut. From now, stop learning by yourself and try our test engine. All your efforts will pay off one day.

## 100% Pass Quiz 2026 Veeam VMCE\_v12 Perfect Sample Questions Pdf

Equally amazing are Prep4King's VMCE\_v12 dumps. They focus only the utmost important portions of your exam and equip you with the best possible information in an interactive and easy to understand language. Think of boosting up your career with this time-tested and the most reliable exam passing formula. VMCE\_v12 Brain Dumps are unique and a feast for every ambitious professional

who want to try VMCE\_v12 exam despite their time constraints. There is a strong possibility that most of these dumps you will find in your actual VMCE\_v12 test.

## Veeam VMCE\_v12 Exam Syllabus Topics:

| Topic    | Details                                                                                                                                                                                       |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1  | <ul style="list-style-type: none"><li>Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.</li></ul>              |
| Topic 2  | <ul style="list-style-type: none"><li>Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.</li></ul>                   |
| Topic 3  | <ul style="list-style-type: none"><li>Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.</li></ul>                            |
| Topic 4  | <ul style="list-style-type: none"><li>Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.</li></ul> |
| Topic 5  | <ul style="list-style-type: none"><li>Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.</li></ul>        |
| Topic 6  | <ul style="list-style-type: none"><li>Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.</li></ul>                                   |
| Topic 7  | <ul style="list-style-type: none"><li>Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.</li></ul>                               |
| Topic 8  | <ul style="list-style-type: none"><li>Core components: This section of the exam covers exploring the functionality of Veeam Backup &amp; Replication and system requirements.</li></ul>       |
| Topic 9  | <ul style="list-style-type: none"><li>Initial security considerations: This section defines ways and tools to secure the Veeam backup server.</li></ul>                                       |
| Topic 10 | <ul style="list-style-type: none"><li>Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.</li></ul>                   |
| Topic 11 | <ul style="list-style-type: none"><li>Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.</li></ul> |
| Topic 12 | <ul style="list-style-type: none"><li>Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.</li></ul>        |

## Veeam Certified Engineer v12 Sample Questions (Q127-Q132):

### NEW QUESTION # 127

A company needs to restore a database server without restoring sensitive information due to data sovereignty requirements. How can the company meet this requirement?

- A. Configure the virtual lab and select SureBackup mode in the restore wizard.
- B. Configure the Secure Restore settings to prevent sensitive data restoration based on YARA rules.
- C. Configure the SureRestore settings to prevent sensitive data restoration based on YARA rules.
- **D. Configure a virtual lab and select Staged Restore mode in the restore wizard.**

**Answer: D**

Explanation:

To restore a database server without sensitive information, the company can use Staged Restore mode. This feature allows the execution of scripts (e.g., SQL scripts) within a virtual lab to modify or remove sensitive data during the restore process. By setting up a virtual lab, the restore occurs in an isolated environment where sensitive data can be removed or altered before completing the

recovery. This approach ensures compliance with data sovereignty requirements while restoring the database server.

#### NEW QUESTION # 128

Which Veeam replication failover function ensures that changes made during a failover are copied to the original production VM?

- **A. Fallback**
- B. Permanent failover
- C. Undo fallback
- D. Undo failover

**Answer: A**

Explanation:

In Veeam replication, the function that ensures changes made during a failover are copied back to the original production VM is Fallback. This process involves reversing the replication direction after a failover, ensuring that any changes made while running on the replica are synchronized back to the original VM.

#### NEW QUESTION # 129

The director of a business needs a folder of MS Office files restored from the corporate shared drive. This drive sits on a Windows VM backed up by Veeam Backup & Replication. The director wants the files restored to their original location and to replace the original files. What functionality will be used to restore the folder using the Veeam Guest OS restoration wizard?

- **A. Restore the files using the "Overwrite" function. Original files will be removed.**
- B. Restore the files using the "Keep" function. Original files will be untouched.
- C. Restore the files using the "Replace" function. Original files will be removed.
- D. Restore the files using the "Hold" function. The director can then determine the status of the original and restored files.

**Answer: A**

Explanation:

Explanation

#### NEW QUESTION # 130

You want to deploy an On-Demand Sandbox. While creating the application group, which sources can be used to add virtual machines to the Application Group? (Choose three.)

- A. Backup Copy in Backup repository
- **B. Storage Snapshot**
- C. Backup in Cloud Repository
- **D. Backup on Backup Repository**
- **E. Replica on non-Cloud Connect VMware vSphere host**
- F. Replica on Cloud Connect VMware vSphere host

**Answer: B,D,E**

#### NEW QUESTION # 131

For Veeam agent backup jobs, what feature is only available with Veeam Agent for Microsoft Windows?

- A. Application-aware processing of
- B. File-level backup
- **C. Backup from storage snapshots**
- D. Volume backup

**Answer: C**

Explanation:

You can use Veeam Backup & Replication and Veeam Agent for Microsoft Windows operating in the managed mode (within the Veeam Agent management scenario) to create backups from native storage snapshots.

Native storage snapshots allow the following:

Veeam Backup & Replication to use backup proxy servers to process storage systems.

Veeam Agent to use hardware Volume Shadow Copy Service (VSS) provider and capabilities of native snapshots that are created on production storage systems to create backups.
