Salesforce Certified B2C Commerce Architect Sample Questions (Q61-Q66):

NEW QUESTION # 61
The client provided these business requirements:
* The B2C Commerce storefront will integrate with the client's Order Management System (OMS).
* The storefront will provide reel-time order export of successfully pieced orders The OMS supports both web service export end SfTP batch order export, but the client has expressed concern about the availability of the OMS.
Which two solutions satisfy the requirements and address the OMS reliability concern?

Choose 2 answers

- A. Implement a Iive export of orders during checkout via SFTP, marking the processed order as exported when it has completed successfully.
- B. Implement a live export of orders during checkout vie web service, marking the processed order as exported when the AM returns successfully.
- C. Implement a batch export of orders to SFTP, excluding exported orders. This runs as a scheduled fc>b with a high-frequency run rate end marks processed orders as exported upon success.
- D. implement a batch export of orders via web service, excluding exported orders. This runs as a scheduled Job with an hourly run rate end marks processed orders as exported upon success.

Answer: B,C

NEW QUESTION # 62

A client has a single site with multiple domains, locales, and languages. Afterlaunch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.
Which version of aliases,Json file below will accomplish this task?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: D

Explanation:
Option C correctly addresses the requirement for showing the same maintenance page across multiple locales by having each different domain alias ("nto.eu", "nto.at", "nto.de") mapped to the same www domain ("www.
nto.eu"). This setup allows all traffic, regardless of the original locale-specific domain, to be directed to a single, unified maintenance page hosted under the "www.nto.eu" domain. This ensures consistency in the maintenance message presented to all users, irrespective of their regional domain.

NEW QUESTION # 63

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by *total time" column. The following come as the top Ave items:
Which controller should the Architect focus on to further investigate the performance issue?

- A. Search Show as this Is one of the key controllers that the customer uses
- B. Home-IncludeHeaderMenu as It has highest average time.
- C. Product-HitTile asit has the highest hits during the load test.
- D. Product-Detail as It has the highest total time and highest maximum time.

Answer: D

Explanation:
Focusing on the 'Product-Detail' controller is prudent given that it has the highest total time and the highest maximum time (Answer C), suggesting that it significantly contributes to the overall load and potential slowdowns on the site. By analyzing and optimizing this controller, the architect can potentially achieve the most substantial improvement in performance. Efforts might include optimizing database queries, caching frequently requested data, or simplifying complex logic in the Product-Detail page's processing.

NEW QUESTION # 64

Cross-site scripting (XSS) lets attackers inject client-side JavaScripts into a web page viewed by a targeted user. Which encoding will you use in the <isprint> tag to avoid cross site scripting:
<script type="text/javascript"> var data = "<isprint encoding="" value="${unsafeData} "/>"; </script>

- A. jsattribute
- B. jshtml
- C. htmlunquote

- D. jsblock

Answer: D

NEW QUESTION # 65

During code review, the Architect found that there is a service call on every visit of the product detail woe (PDP).
What best practices should the Architect ensure are followed for the service configuration?
Choose 2 answers

  - A. Service logging is disabled.
  - B. Service timeout is set.
  - C. Circuit breaker is enabled.
  - D. Service mock up call is configured.

Answer: D
