MB-500 Exam measures the candidate's ability to apply their knowledge of these topics to real-world scenarios.

## Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q145-Q150):

### NEW QUESTION # 145

You need to configure security for the Vendor Exclusion List report.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new privilege and assign it to an output menu item. Add the new privilege to a duty extension and then add the duty extension to a role.
- B. Create a new privilege, add a reference to an output menu item, and then add the new privilege to a role.
- C. Create a new security policy and add an output menu item. Add the new security policy to duty extension and then to a role extension.
- D. Create a new privilege extension and add an output menu item. Add the privilege to a duty extension and then to a role extension.

**Answer: A,B**

Explanation:

Scenario: Develop necessary security permissions to view and maintain the new Vendor exclusion list functionality and reporting. Users with maintain rights will be able to create, update, and delete the exclusion list. Permissions must be assigned to security roles to match company security model.

The privileges are simply a way to grant permissions to an entry point, which can be services, to a duty, role, or even directly to a user. Typically, we only add entry points to a privilege, such as menu items.

D: You can extend a Security Role or a Security Duty to add new duties/privileges to these elements.

Incorrect Answers:

C: We can't extend security privileges, we would always create a new privilege.

### NEW QUESTION # 146

A company uses Dynamics 365 Finance

You implement the Insert method for a table you create. The class must meet the following requirements:

- \* If FieldA is equal to "Hello," then FieldB must save the integer value 10.
- \* If FieldA is equal to "World," then FieldB must save the integer value 20.
- \* Otherwise FieldB must save the integer 0.

You need to implement the code

Which two code segments can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.
- B.
- C.
- D.

**Answer: D**

### NEW QUESTION # 147

A company plans to implement Dynamics 365 Finance.

The company is unsure whether to use a cloud implementation or an on-premises implementation.

You need to determine the features that you can use for each implementation.

Which feature can you use? To answer, drag the appropriate features to the correct implementation types. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

### NEW QUESTION # 148

A company has an extension that makes changes to a base form.

You need to identify all extension changes made to the base form.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. In the search bar on the base form, enter the text c:.
- B. In the search bar on the form extension element, enter the text c:.
- **C. In search bar on the form extension element, enter the text e:.**
- D. In the search bar on the base form, enter the text e:.
- **E. Right-click the base form and select view references**

**Answer: C,E**

Explanation:

A: Customization and Extension

B: Example: Navigate to FM Rental.Extension in the Tree Designer

1. In the Visual Studio, in Solution Explorer, in the FleetManagement Discounts project, expand User Interface > Form Extensions.

The FM Rental.Extension element is an extension element that extends the functionality of the FM Rental form by adding two new data sources and a new tab control.

2. In Solution Explorer, double-click FM Rental.Extension to open the designer.

3. In the designer's search box, type 'e:' as shown in the image below. This filters the current designer to only show nodes that belong to the current extension.

### NEW QUESTION # 149

You need to update the CashDisc report to meet the requirements.

What should you do?

- A. Duplicate the existing CashDisc report in the extension model and add the new field to the design.
- B. Customize the existing CashDisc report in the overlaying model and add the new field to the design.
- **C. Extend the existing CashDisc report in the extension model and add the new field to the design.**
- D. Delete the existing CashDisc report in the extension model and create a new report.

**Answer: C**
