In today's SAP world getting the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) certification exam is very crucial. With the growing popularity of credentials, the demand for C-ACDET-2506 certification exam holders has increased. Success in the C-ACDET-2506 Exam has become the need of time. People who fail the SAP C-ACDET-2506 certification exam face loss of time and money.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none">Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

C-ACDET-2506 Original Questions: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite & C-ACDET-2506 Answers Real

Questions & C-ACDET-2506 Exam Cram

Our company will provide first class service on C-ACDET-2506 exam questions for our customers. As a worldwide leader in offering the best C-ACDET-2506 exam guide, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in C-ACDET-2506 Study Materials application as well as interactive sharing and after-sales service. As long as you need help, we will offer instant support to deal with any of your problems about our C-ACDET-2506 exam questions

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q26-Q31):

NEW QUESTION # 26

When you create a custom field, how do you define where the field is added?

- A. The field is added to a class, identified by a class name
- B. Each field can be linked to multiple screens, identified via UI GroupClass ID
- C. The field is added to a project header, identified by the templateClass ID
- D. The field is added to a class, identified by the record ID

Answer: A

Explanation:

In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

NEW QUESTION # 27

Which scenarios are applicable when moving templates from the test site to the production site by ICM? Note: There are 2 correct answers to this question.

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. Draft templates on the source site are skipped.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. New templates that successfully migrated to the production site are in Draft state.

Answer: B,C

NEW QUESTION # 28

How can you create a field label with italics?

- A. By using standard HTML formatting like label can be added to the field label
- B. By selecting the option "Italic label"
- C. By marking the text in the field and select Ctrl-1
- D. Formatting of a field label is not possible

Answer: A

NEW QUESTION # 29

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Relation and Relation Entries
- B. User to Group Mapping
- C. Enumerations

- D. Units of Measure

Answer: A,C

Explanation:

After migrating configurations using ICM, Enumerations and Relation entries require manual loading into Production because they are not included in automatic migration bundles. Enumerations provide picklist values, while Relations define dependencies between fields. Units of Measure are typically part of standard configuration or migrated automatically. User to Group Mapping is managed separately through provisioning or identity management tools, not via ICM. Manual loading of these data elements ensures data integrity and avoids missing references.

NEW QUESTION # 30

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Enable field property "Enable for Template Field Setter" in the Advanced tab
- B. Load Relation types and Relation entries
- C. Define a Visibility Condition in the Conditions tab
- D. Enable field property "Use relationship chooser" in the Advanced tab
- E. **Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab**

Answer: E

Explanation:

To filter a custom field's available values based on another field's value in SAP Ariba, you populate the "Relation Name" and "NameTableConstraintFieldPath" properties in the field's Advanced tab. This configuration links the field to a predefined relation type and specifies the constraint field used for filtering.

Simply loading relation types (B) is a prerequisite but does not configure filtering on the field itself. Visibility conditions (C) control whether a field is shown, not the filtering of its values. Enabling "Use relationship chooser" (D) is necessary but insufficient alone without defining the relation and constraint field. The "Enable for Template Field Setter" (E) option is unrelated to filtering. This filtering enables dynamic picklists where options depend on another field's selection, improving data accuracy and user experience.

NEW QUESTION # 31

.....

We will provide you with comprehensive study experience by give you C-ACDET-2506 free study material & SAP exam prep torrent. The questions & answers from the SAP practice torrent are all valid and accurate, made by the efforts of a professional IT team. The authority and validity of SAP C-ACDET-2506 training practice are the guarantee for all the IT candidates. We arrange our experts to check the update every day. Once there is any new technology about C-ACDET-2506 Exam Dumps, we will add the latest questions into the C-ACDET-2506 study pdf, and remove the useless study material out, thus to ensure the C-ACDET-2506 exam torrent you get is the best valid and latest. So 100% pass is our guarantee.
