You must try Dumpexams C_ACDET_2506 exam questions today.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q32-Q37):

NEW QUESTION # 32
A customer requests a dynamic list from CSV. Which field type supports that?

- A. Flex Master Data-based field
- B. Hyperlink
- C. Computed Field
- D. Single-Select Enum

Answer: A

Explanation:
The Flex Master Data (FMD)-based field type supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.
Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.
Hyperlink fields store URLs, unrelated to selection lists.
FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 33
A customer has requested that a Contracts field be added to an export event. After creating the field, assigning the appropriate checkbox in the advanced section, and publishing, this field still cannot be found in the export.
What can be done to rectify this? (Select 2 correct answers)

- A. A custom visibility expression needs to be added stating isVisibleInExport == true
- B. The data definition needs to be refreshed
- C. The field must be accepted and published in the data definition
- D. Custom fields cannot be added to import/exports

Answer: B,C

Explanation:
To ensure a custom Contracts field appears in export events, it must be accepted and published in the Data Definition within the Integration Manager, which formally exposes it for integrations (B). Also, the Data Definition should be refreshed (D) so that the export metadata is updated. A custom visibility expression is unnecessary, and custom fields can be added to import/export when configured correctly.

NEW QUESTION # 34

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Ariba Enablement Workbook
- B. SAP Cloud Project Studio
- C. SAP for Me
- D. SAP Cloud Application Lifecycle Management

Answer: A

Explanation:
The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

NEW QUESTION # 35

You need to revise a published form template.
What steps do you follow?

- A. Clone and change ID
- B. Delete and recreate
- C. Create a new version, edit, test, and publish
- D. Edit directly in production

Answer: C

NEW QUESTION # 36

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field change value, your custom field does not change.
What scenarios could cause this? Note: There are 3 correct answers to this question.

- A. The custom field has the property Lock Inital value enabled, which prohibits a field to be changed once it's set
- B. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled
- C. Your dependent field does not have the property Refresh screen on value change enabled
- D. The defaulting Expression sets a value that violates the custom field Validity Condition
- E. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field

Answer: A,C,E

NEW QUESTION # 37

......

This is a desktop-based exam simulator software. The user can easily get used to its format and it is compatible with Windows. It has a bank of the actual SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam questions, going through them will prove to be vital for your SAP C_ACDET_2506 exam preparation since a candidate must know his lacking points.
