We know that consumers want to have a preliminary understanding of the product before buying it. So, before you buy our C_BCSBS_2502 exam braindumsp, we will offer you three different versions of the trial. They are free demos. At the same time, the installation and use of our C_BCSBS_2502 Study Materials is very safe and you don't need to worry about viruses. We will also protect your personal privacy sufficiently. And we will give you the best service on our C_BCSBS_2502 practice engine.

SAP C_BCSBS_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.
Topic 2	• Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.
Topic 3	• Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.

SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q13-Q18):

NEW QUESTION # 13
Which SAP module is specifically designed for supplier management and procurement processes? Please choose the correct answer.

- A. SAP Transportation Management
- B. SAP Business Network
- C. SAP Ariba
- D. SAP SuccessFactors

Answer: C

NEW QUESTION # 14
What is a key advantage of SAP Business Data Cloud Intelligent Applications?

- A. They provide pre-configured dashboards with AI-driven insights for faster decision-making.
- B. They primarily focus on raw data collection with minimal integrated analysis capabilities.
- C. They remove the requirement for formal data governance and compliance policies.

Answer: A

Explanation:
The question asks for a key advantage ofSAP Business Data Cloud Intelligent Applications, which are prebuilt, AI-powered applications withinSAP Business Data Clouddesigned to deliver actionable insights and automate business processes. According to official SAP documentation and the provided search results, the primary advantage is that these applications provide pre-configured dashboards with AI-driven insights for faster decision-making, enabling business users to access ready-to-use analytics with minimal setup. This makes Option A the correct answer.
Explanation of Correct answer:
Option A: They provide pre-configured dashboards with AI-driven insights for faster decision-making.
This is correct becauseSAP Business Data Cloud Intelligent Applicationsare designed to deliver pre- configured, SAP-managed dashboards and analytics that leverage AI to provide actionable insights, significantly reducing the time-to-value for business users. These applications combine data fromSAP Datasphereand visualization capabilities fromSAP Analytics Cloud, infused with AI- driven features like predictive analytics and simulations, to enable agile and informed decision-making. TheDescribing the Key Capabilities and Benefits of SAP Business Data Cloudlesson on learning.sap.com states:
"New to SAP Business Data Cloud (SAP BDC) are context-aware SAP Business Data Cloud Intelligent Applications. These pre-configured dashboards provide ready-to-run insights by combining planning and analysis, all infused with trusted Artificial Intelligence (AI) to drive smarter, faster decisions. The intelligent applications enable agile decision-making, predictive analysis, and simulations, leading to better business outcomes." learning.sap.com Additionally, theIntelligent Applications in Business Data Cloudpage onwww.sap.comelaborates:
"Surface actionable insights and recommendations for analytics and planning with intelligent applications connected directly to your business data. ... These intelligent applications are adaptive, AI-powered applications that learn from your data, understand business context, and act on your behalf to transform business outcomes." sap.com For example, applications likeWorking Capital InsightsorPeople Intelligenceprovide prebuilt dashboards that integrate operational and financial data, offering AI-driven recommendations for areas like cash flow optimization or workforce planning. The installation of these applications automates the creation of underlying data models, replication flows, andSAP Analytics Cloudstories, requiring only a few clicks to deploy, as noted in theManaging and Leveraging SAP Business Data Cloud Intelligent Applicationslesson:
"From a business user perspective, the result of an installed Intelligent Application is a ready-to-use dashboard. The Intelligent Application is presented to the business user as an SAP Analytics Cloud story which is connected to one or more underlying SAP Datasphere models. The story and all of these connected models are automatically created during the installation of an Intelligent Application." learning.sap.com This pre-configured, AI-driven approach ensures faster decision-making by eliminating the need for extensive manual configuration, making Option A the key advantage.
Explanation of Incorrect Answers:
Option B: They remove the requirement for formal data governance and compliance policies.
This is incorrect becauseSAP Business Data Cloud Intelligent Applicationsdo not eliminate the need for formal data governance and compliance policies. In fact, these applications rely on robust governance to ensure data quality, security, and compliance, which are

critical for trusted AI and analytics outcomes. The SAP Business Data Cloudoverview onwww.sap.comemphasizes:
"SAP Business Data Cloud delivers fully managed capabilities for business data fabric, ... ensuring data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." sap.com Furthermore, data products withinSAP Business Data Cloudinclude metadata and governance policies to maintain trust and compliance:
"In SAP BDC, data products are curated, reusable, and business-ready data assets designed to deliver immediate value. They encapsulate not just raw data, but also metadata, business context, and governance policies, making them trusted, actionable tools for analysis, planning, and decision-making." learning.sap.com This indicates that governance and compliance are integral to the platform, not removed, making Option B incorrect.
Option C: They primarily focus on raw data collection with minimal integrated analysis capabilities.
This is incorrect becauseSAP Business Data Cloud Intelligent Applicationsare designed to provide advanced analytics and AI-driven insights, not just raw data collection. They integrate data from SAP and non-SAP sources, enrich it with business semantics, and deliver sophisticated analysis through prebuilt dashboards and AI capabilities, as opposed to focusing on raw data. TheSAP Business Data Cloudfeatures page onwww.sap.
comstates:
"Deliver transformational insights for advanced analytics and planning with prebuilt applications and data products across all lines of business. ... Make faster, smarter decisions with prebuilt analytical apps across your enterprise for Core Enterprise Analytics, People Analytics, and more." sap.com TheSAP Sapphire Innovation Guide 2025further highlights:
"Intelligent applications within SAP Business Data Cloud deliver transformational insights across the entire SAP Business Suite, integrating analytics, AI, and simulations into transactional workflows." sap.com This focus on integrated analytics and AI-driven insights directly contradicts Option C, which misrepresents the applications as having minimal analysis capabilities.
Summary:
The key advantage ofSAP Business Data Cloud Intelligent Applicationsis that they provide pre-configured dashboards with AI-driven insights for faster decision-making, as stated in Option A. These applications leverageSAP Analytics CloudandSAP Datasphereto deliver ready-to-use, context-aware analytics, enabling rapid deployment and agile decision-making. Option B is incorrect because governance and compliance remain essential, and Option C is incorrect because the applications prioritize advanced analytics over raw data collection. This aligns with SAP's strategy to streamline data-to-decision processes withinSAP Business Suite, as supported by the provided search results and official documentation.
