C1000-196 in the first attempt.

IBM DataPower Gateway v10.x Administrator - Professional Sample Questions (Q79-Q84):

NEW QUESTION # 79

How can you perform a full restore of the DataPower appliance from a backup?

- A. Run a CLI command to restore the appliance settings from an external server
- B. Use the backup option from the appliance's web GUI to restore configurations
- C. Reboot the appliance and use the restore wizard to automatically apply the backup
- D. Manually reconfigure the appliance by copying settings from the backup file

Answer: A

NEW QUESTION # 80

Scenario: A critical application running on the DataPower appliance has been intermittently failing, and users report slow response times. You notice the appliance's system logs do not show any errors.

What troubleshooting steps should you take next to diagnose the issue? (Choose two)

- A. Reboot the appliance to see if the issue persists after reset
- B. Check for high CPU or memory usage by inspecting system resource utilization
- C. Review the appliance's configuration settings for any recent changes
- D. Use packet capture to check if there is any network latency or packet loss

Answer: B,D

NEW QUESTION # 81

Which of the following actions is recommended when the DataPower appliance's memory usage is consistently above 90%?

- A. Increase the memory allocation for the appliance
- B. Quiesce non-essential services to free up memory
- C. Disable logging to reduce memory usage
- D. Reboot the appliance to clear the memory

Answer: B

NEW QUESTION # 82

Scenario: While configuring DataPower to enhance security, you are tasked with setting up user access controls.

What should be your first two actions to ensure that access to the appliance is secure? (Choose two)

- A. Create specific roles and assign them based on users' responsibilities
- B. Allow users to log in without passwords for easier access
- C. Set up detailed access logs to track all user activities
- D. Disable all user accounts that have not been assigned roles

Answer: A,C

NEW QUESTION # 83

Which of the following security practices should be followed to protect sensitive communications on a DataPower appliance?

- A. Allow only unencrypted HTTP traffic to reduce overhead
- B. Disable encryption to improve system performance
- C. Use plain HTTP for all communications
- D. Implement SSL/TLS encryption for all external communications
