EC-COUNCIL Computer Hacking Forensic Investigator (CHFI-v11) Sample Questions (Q423-Q428):

NEW QUESTION # 423

You are working as Computer Forensics investigator and are called by the owner of an accounting firm to investigate possible computer abuse by one of the firm's employees. You meet with the owner of the firm and discover that the company has never published a policy stating that they reserve the right to inspect their computing assets at will. What do you do?

- A. Inform the owner that conducting an investigation without a policy is not a problem because the company is privately owned
- B. Inform the owner that conducting an investigation without a policy is a violation of the employees' expectation of privacy

- C. Inform the owner that conducting an investigation without a policy is not a problem because a policy is only necessary for government agencies
- D. Inform the owner that conducting an investigation without a policy is a violation of the 4th amendment

Answer: B

NEW QUESTION # 424

Paul's company is in the process of undergoing a complete security audit including logical and physical security testing. After all logical tests were performed; it is now time for the physical round to begin. None of the employees are made aware of this round of testing. The security- auditing firm sends in a technician dressed as an electrician. He waits outside in the lobby for some employees to get to work and follows behind them when they access the restricted areas.

After entering the main office, he is able to get into the server room telling the IT manager that there is a problem with the outlets in that room.

What type of attack has the technician performed?

- A. Backtrapping
- B. Tailgating
- C. Fuzzing
- D. Man trap attack

Answer: B

NEW QUESTION # 425

Investigators can use the Type Allocation Code (TAC) to find the model and origin of a mobile device.
